Members of the Board of Governors,
University of Western Ontario,
London, Ontario.

Gentlemen:

As President and Vice-Chancellor I have the honour to present to you the report on the work and condition of the University for 1934-1935, the fifty-seventh year of the University's existence.

Respectfully yours,

W. Sherwood Fox,
President and Vice-Chancellor.

OBITUARY

Mr. John Stanley Lovell

The late J. Stanley Lovell, a Senator of the University, was a native of London and a product of her schools. As a young man he joined the London Life Insurance Company and served in various capacities until on January 1, 1935 he was appointed to the joint office of Assistant General Manager and Executive Secretary. From early manhood he had an intense interest in the development and training of young men in Christian citizenship, an interest that explains his devotion to the Excelsior Club for boys in his own Church, to the work of the Young Men's Christian Association, and to the activities of the London Board of Education of which he was a member from 1932 to 1934. Mr. Lovell was a staunch supporter of the University of Western Ontario. He personally maintained a number of students at the University for several years. In his will he provided for the nucleus of a loan fund by bequeathing \$17,000 to the University the income from which is to be loaned to students for the purpose of helping to pay expenses during their courses. His presence will be sorely missed, but his example and his constructive endeavor remain as a permanent influence for good.

Dr. Muriel MacLennan

Upon receiving her degree of Doctor of Medicine in McGill University in 1927 Dr. Muriel MacLennan entered upon an internship in Victoria Hospital, London. This position she held for three successive years. In 1930 she was appointed Assistant in Anaesthesia in the Faculty of Medicine and became one of the staff of anaesthetists of Victoria Hospital. She also opened up a practice in London and became Medical Examiner of Women Students in the University. During her all too brief association with the University Dr. MacLennan made a deep impression upon the Faculty and students of Medicine as a person of fine culture and as a medical scientist of high standing and great promise.

Dr. Fulton S. Vrooman

Since 1930 Dr. Vrooman had served as Associate Professor and Head of the Department of Psychiatry in the Faculty of Medicine of the University. In his professional capacity and as a man he enjoyed the complete respect and esteem of all his colleagues. Since 1907 he had been associated with various branches of Ontario Hospital work. In 1916 the Dominion Government placed him in charge of the hospital for shell-shocked veterans at Cobourg, the first hospital of the kind in the Dominion. As an officer of the Canadian Army Medical Corps he went to England and saw service in several hospitals there. After the war he was made Superintendent of the Queen Street Ontario Hospital in Toronto and later of the Ontario Hospital in London. His sudden passing on July 10, 1934 was deeply lamented by his many friends and associates. The memory of his life and service in the University will long live among us.

MEMORIAL SERVICE

The annual Memorial Service was held in the Auditorium of the University College of Arts on April 14th. The President had charge of the order of service and Professor Arthur G. Darland delivered the memorial address.

ROLL OF THE DEAD

Dr. H. M. Barrett, '12	Medical Graduate
Dr. W. W. Beasley, '31	Medical Graduate
Dr. Spurgeon Campbell, ex'04	Former Medical Student
William M. Chambers	Second Year Student in Arts
Dr. E. A. Creighton, '99	Medical Graduate
Dr. Chas. C. Elliott, '00	Medical Graduate
Dr. J. I. Ferguson, '00	Medical Graduate
Dr. T. J. Gowan, '92	Medical Graduate
Dr. John Haggart, '87	Medical Graduate
Dr. B. L. R. Kelly, '30	Medical Graduate
Dr. G. R. MacKay, '27	Medical Graduate
Dr. Muriel MacLennan	Member of the Faculty
Dr. G. H. McGuffin, '27, '30	Arts and Medical Graduate
Hon. Richard M. Meredith	Former Chancellor
Ernest Penrose, '31	Arts Graduate
Dr. C. T. Pigot, '00	Medical Graduate
Dr. T. L. Ryan, '99	Medical Graduate
L. P. Shenks	Former Member of the Faculty
Dean Norman L. Tucker, D.D., '22	Honorary Graduate
Dr. F. S. Vrooman	Member of the Faculty
Richard Williamson	Member of the Senate
Rev. Louis Wood, D.D., '34	Honorary Graduate

RESIGNATION OF DEAN A. B. MACALLUM

At the close of the academic year Dr. A. Bruce Macallum who had served as Dean of the Faculty of Medicine since the summer of 1927 tendered his resignation from the Deanship. His freedom from the numerous executive duties associated with this office will afford him an opportunity to devote more time and attention to the important research work in the field of Bio-chemistry which he has been conducting for a number of years. His colleagues and other friends wish him all success in his endeavors.

APPOINTMENT OF DEAN F. J. H. CAMPBELL

Early in the year Dr. F. J. H. Campbell, Associate Professor of Medicine, was appointed Acting Dean in succession to Dean Macallum. At the termination of the year he was made Dean. At his own request the appointment was made for a period of three years to be counted from his appointment as Acting Dean. Dean Campbell has during his year's tenure of office revealed marked executive powers and a capacity to give leadership in educational policy.

EDUCATIONAL COMMENTS

Needs of the University

So important are the several needs of the University that it would be a rash person who would venture to specify their relative urgency. In the life of a university that is growing in influence as well as in size certain needs will always be pressing; if they were not, that very fact would be evidence of the university's weakness. The pressure of other needs will vary in degree from time to time.

Education the Supreme Mission of a University

The material needs of a university are often so imperative that one loses sight of the institution's chief mission, education. For this reason I am now taking pains to set forth our university's educational requirements first. While complete meeting of some of these requirements depends to a certain extent upon an increase in resources, the most important requirements can be met by thorough and patient study and by gradual adjustment. In a word, these requirements are associated with the intellectual phases of university activity, the phases that take supremacy above all others.

Research

Undoubtedly, more attention should be given to research in both those fields which may be broadly designated as scientific and literary. Much more

research of a high order has been carried on for years than most people are aware, but the programme is as yet not proportionate to the status of the University. Especially impressive and commendable are the research accomplishments of the Faculty of Medicine. It seems reasonable to believe that a continuous studied endeavor to effect modifications in teaching schedules and to encourage the spirit of research would bring about a progressive increase in the amount of investigations undertaken. If, in addition, definite and concerted efforts are made by the Administration and Faculties to secure from numerous sources as yet untouched financial support ear-marked for research, the result cannot be in doubt.

Constant Improvement in Curricula

It is perfectly evident that the University several years ago reached a stage at which growth in student attendance takes care of itself. Instead, the major problem now is how to maintain and to improve the educational facilities offered to the large student body now enrolled in all Faculties. In genuine education there is no such thing as a static condition. Changes must be taking place all the time, but these must be wise, logical and devoid of an abruptness that is violent and disconcerting. What these changes should be requires keen observation and profound understanding of educational values.

An illustration or two may make my meaning clear. Admittedly, there is a pronounced reaction in society against the narrow specialization of the past twenty-five years. How can we construct a course that will tend to develop the "all-round" student and yet preserve the valuable discipline of mind given by intensive work in a limited field? The question is not easily answered. Moreover, even if it were, society will be very leisurely and cautious in accepting it.

Again, none will deny that no two universities should offer identically the same curricula. Nevertheless, who can say offhand just what regional influences should mould the differences in curricula in various regional universities? The matter is one calling for close scrutiny, penetrating judgment, and broad experience. The University of Western Ontario must expect to offer courses of study that are peculiar to it and when it does so must be able to present sound and convincing reasons for its selections.

Yet again, changing conditions throughout the world must be recognized in all branches of education, especially in the higher. It is not expected that university students be equipped with memorized formulae and crystallized procedures for facing immutable situations in life. Rather it is the university's duty so to guide students during their undergraduate years that they acquire the twofold habit, first, of expecting the situations of real life to be new, and, secondly, of independently thinking their way through each new situation as it comes. Anticipation of the fact that the life of the world is constantly changing cannot but exert a qualifying influence upon university curricula and methods of instruction. It is the task of the Faculty to determine what specific form this influence will be given; otherwise, the

university will fail in its mission to give youth adequate preparation for life.

Fine Arts Deserve Attention as Well as Liberal Arts

Still another illustration can be offered. Few will deny that in North America at least, and especially in Canada, the purely intellectual phases of higher education have been stressed to a degree that has left little or no place for the more spiritual phases of individual and social life. Music and the other fine arts have been ignored in the educational programmes we habitually call cultural. Scrutiny of the experience of Europe will quickly show us that through our narrow conception of culture we in North America have missed great values in life. In some way the Fine Arts must be given definite recognition in our universities both beside and combined with the Liberal Arts. The technique of recognition presents a very difficult problem, but one which I believe is nevertheless capable of solution. The difficulty lies in the fact that by their very nature the Fine Arts are not readily measured. Who dare attempt to gauge the worth of endeavor in music or in painting as, for example, in mathematics? Here is the crux of the problem --- the establishment of reasonable equivalencies among subjects in order that high educational standards may be assured. It seems to me that if only attainment of an exceptionally high order in the Fine Arts is accorded recognition, the way to a solution of our problem has been opened. We believe that in giving music its due place in the programme of the University of Western Ontario we can begin making a definite contribution to the development of the cultural life of Canada. The success of the experiments in music in our Summer Session seem to be a good augury of success in the larger field. Knowledge of what has been done elsewhere in the world gives us courage to extend our venture.

Devotion and Efficiency of the Faculty

The members of the Faculty are all reasonable persons who comprehend clearly that the reason of the ten per cent. cut in salaries that went into effect three years ago is to be found in general economic conditions. Despite the difficulties, and in many cases despite genuine hardships entailed by the reductions in personal income, the Faculty have accepted the situation understandingly and have continued their work with unabated devotion and success. In the meantime the registration of students has steadily increased and the number and weight of staff duties have increased proportionately. It is plain that under this load the efficiency of the Faculty, however great their consecration to their tasks may be, cannot continue indefinitely. At the first opportunity offered by improved economic conditions the University should put forth a strong concerted effort to secure at least partial restoration of grants as well as augmentation of other income for the express purpose of putting salaries back to their original figure. The achievement of this aim would enhance to a marked degree all phases of the University's work. But the endeavor should not stop merely at restoration; it should be extended much further in order to bring the salary average in our university at least up to the level of salaries in other leading universities. The present inequality puts Western at a disadvantage in several

ways that are too obvious to require mention.

Need of a System for Providing Retiring Annuities

With the reduction of salaries is inextricably associated the lack of a system of retiring annuities for the members of the Faculty. Of necessity this lack tends to magnify such anxiety as may be caused by the diminution of salary. In each of my annual reports for several years I have set forth the reasons why the provision of a retiring system is one of the University's major needs. To set these forth again would make me seem importunate and also to ignore the fact that the Governors have for many years been unanimous as to the validity of these reasons.

Need of Students' Residences and Students' Social Union

On page 57 of my report for 1933-1934 I discuss the need for dormitories for students of all faculties and of both sexes. To that passage also I wish to direct attention again in order to refresh our thinking as to the real contribution made by dormitory life through the improvement it effects in human relations. This enhancement of human relations among students is something that cannot be neglected by universities for more than a certain period without lowering the quality of the university's service. Undoubtedly dormitories -- or if one prefers the British terms, hostels, or halls of residence -- are the best means of producing this enhancement but one must not forget that there are other means also. Generally speaking these are not as successful as student residences but nevertheless they provide some facilities for enabling students to prepare themselves for the social relations they must have with their fellows in life that comes after university. There is a real danger, I believe, that in our university the secondary means may be overlooked because of our continued concentration of thought upon dormitories.

My reasons for this belief are not obscure. The erection of even one or two modern hostels, sufficient to house no more than two hundred persons -- a mere fraction of our present student body -- would involve heavy costs. At a time when the demand for increased outlay for maintenance of staff is of prime urgency to expend a large sum of money upon a building programme would seem reprehensible and tend to produce unrest. Consequently, unless the University were to be presented with a gift of money definitely earmarked for the erection of a hostel, it is very unlikely that the University will enter upon any such building project in the near future. In the meantime the need for some equipment for promoting human relations among the students not merely continues but grows rapidly, and the University suffers accordingly. If there is some other means for giving even a partial service in this respect, study and consideration of it should begin now.

I venture to suggest to the Board of Governors that the erection of a Students' Union would provide this kind of service. Such a building could be constructed by units, and neither of the first units, one for men and one for women, need be expensive. Both together would cost less than a single dormitory large enough to be worthwhile. A Union would give the students a

social meeting place of their own. Incidentally it would release in the existing academic buildings space that is now sorely needed for lecture rooms and offices. Moreover, it would remove the present disability from which the scholastic work now suffers to a certain degree through the contiguity of social rooms and academic rooms.

All three Faculties of the University are equally in need of separate facilities such as a Union would provide. The acquisition of a building near the Medical School to serve as a Social Union for Medical students would add greatly to the real educational facilities of the University. It would be quite feasible for certain student groups in each Faculty to set before themselves the definite objective of raising money for the construction of specified units of what would ultimately become a University Students' Union.

Field House

The need of a Field House which has been stressed for several years is greater than ever. That our university has been able to carry on a very comprehensive programme in the interests of the physical health of the students is due to the efficiency and progressiveness of the Department of Physical Education and to the admirable vision of the Governors in supporting the Department's policies. It is hard to realize the difficulties of directing the numerous activities of the Department, carried on as they are in rented quarters in several parts of the City. To those institutions, such as the Technical School and the Young Men's Christian Association, which have placed their athletic facilities at the disposal of the University, we express deepest gratitude for their cooperation.

The acquisition of a Field House would enable the University to bring all the indoor features of its programme of physical education under one roof. Among these would be included the work of the University's Canadian Officers' Training Corps. It is worthwhile to note that provision is made by the Federal Government towards the financial upkeep of academic buildings of the nature of Field Houses in which university Training Corps can carry on their various activities. Such a contribution would lessen the burden of maintenance falling upon the University.

More Scholarships Urgently Required

The need for the establishment of more scholarships is an urgent one. As admission to university from secondary schools becomes more and more selective and the most gifted and promising scholars are given preference, the need for greater aid becomes more pressing. If such aid is not forthcoming it means that many of our brightest young people, who could profit best by the privileges of university study, will be deprived of the opportunity of developing their powers. Moreover, their deprivation would be a definite loss to the country, for it is through such citizens as these young men and women can become that the country will find her soundest growth. The gradual increase in university

fees magnifies the normal difficulty experienced by families of modest means in sending their sons and daughters to university. The example of Great Britain, New Zealand, Australia and South Africa should be followed by Canada. In the small Dominion of New Zealand alone there is as much money devoted to matriculation scholarships and bursaries as in all the provinces of Canada combined. Two paragraphs from a report upon matriculation scholarships in Canada prepared by the Dominion Bureau of Statistics are very instructive.

"The table indicates that about one university student in twelve or thirteen benefits from matriculation scholarships and that the average value of an award is about \$200, or less than the equivalent of two years' tuition fees.

"Considered from the side of the schools, the scholarships seem still more scarce. Since nearly 50,000 students matriculate annually, and there are only about 500 awards, only about one in a hundred can hope to win assistance. Moreover, more than half of the scholarships and nearly three-fourths of their value are in one province, Ontario."

We appeal to the numerous municipalities both urban and county, to all institutions and individuals of Western Ontario who are interested in the healthy and adequate intellectual development of our ablest young people, to found scholarships in our university to make this development possible. We can assure prospective donors that their benefactions will be enjoyed by the youths who need and merit them the most. For already the University has the machinery for selecting them.

There is an idea all too common in the country that universities are places primarily for the well-to-do if not for the rich. The truth is exactly the opposite, for the majority of our students are drawn from the families of moderate means and from the poor. It surprises most people to learn that such a statement is true even of Oxford and Cambridge. A report on the British universities published a year or two ago revealed the fact that forty-two per cent. of the students of all the universities of Great Britain are supported by scholarships and bursaries. As high as thirty-eight per cent. of the students of Oxford are in this class. The figure for Cambridge is substantially the same.

I wish also to point out that gifts of scholarships to the University are virtually contributions to the Endowment Fund in that they make assured additions to the University's permanent resources.

Increase in Registration of Students

One of the most striking features of the Registrar's report is the announcement of another increase in student attendance. Last year the total attendance was 1913 as compared with 1756 of the year before. This means that there were 1913 different persons in actual attendance in the several faculties and colleges of the University. The number of registrations was 2152, but

inasmuch as 239 of these represented registrations in more than one faculty or college or separate department, this latter number had to be subtracted from the grand total in order that the figure recording the number of different persons in attendance might be ascertained.

In order to understand the facts concerning attendance the Registrar's report upon that phase requires study. One should observe that the registration of full-time students is practically static. Practically every noteworthy increase is in departments which exist chiefly for part-time students. Apparently this is in harmony with the reports of other universities. It seems to reveal a tendency that prevails throughout the Dominion. As prosperity returns the graduates of secondary schools are finding employment somewhat easier and consequently are turning in larger numbers to business rather than to university courses in the Liberal Arts. This fact accounts for a standstill or retreat in full-time enrolment in Arts. Parallel to this is a general tendency toward an increase in enrolment in professional faculties; the movement toward better financial conditions accounts for this also.

The increase recorded in part-time enrolment, such as in Summer School and the several forms of Adult Education, would indicate an enhanced appreciation of the value of higher education and the determination of those engaged in the professions and other vocations to take advantage of the many opportunities to enable them to continue their education indefinitely. This phenomenon is one of the most cheering signs of the times. It means that there is an appreciably increasing interest in everything that makes for genuine culture. It also means that there is a much greater and clearer understanding of the real nature of education -- that it is a continuous process which goes on through life, rather than the attainment of a fixed goal which, once reached, may be left behind and forgotten.

Increase in Fees

It was with the utmost regret that the members of the Board of Governors found themselves compelled by circumstances to raise the fees for all three Faculties. Before finally deciding upon a method of making up the deficit created by the reduction in income from grants, the heads of all three universities concerned conferred regarding the common problem confronting them. After due study of the situation they decided that an advance in fees was the only course open. Besides it was agreed that it was wise and considerate for the three universities to make the increase practically uniform and thus distribute the burden as evenly as possible over the entire province.

It is not irrelevant to remark at a time when parents and students in Ontario are very conscious of the somewhat increased cost of higher education that nowhere in Canada are university tuition fees as high as they are in the United States. Even in many small and weak colleges in the United States the fees in Arts are as much as two hundred and fifty dollars a year. In some of the stronger and well-known institutions on private foundations the figures run from six hundred to eight hundred dollars. It is evident that as yet in

Canada the student is not himself paying as large a proportion of the costs of his education in the Liberal Arts as is his fellow-student across the line. The same statement may be made concerning students in the professional faculties.

New Educational Activities

It is gratifying to realize that during this period of financial stringency it has been possible for the University to undertake certain new activities without drawing upon ordinary income. That is to say, every new activity has financed itself through fees paid by those who benefit from the innovation. The significance of this fact is at least twofold. It means that during a period when many enterprises have been forced to contract our university has been able to expand its programme of studies. It also means that an expansion has been effected without encroaching at all upon the funds required for the payment of salaries and maintenance of the established activities of the University. Undoubtedly the wider range of public contacts afforded by the new enterprises will be of incalculable benefit to the University when better conditions return.

Information concerning the identity and scope of the new activities will be found in the reports of the Director of Extension, Adult Education and Workers' Educational Association course, and the Director of Summer School and Extramural studies, the Director of the Summer School for French at Trois-Pistoles, Quebec.

Religious Organizations in the University

Since the University proper is established on a non-denominational basis all of its religious activities must be of a non-denominational and voluntary character. This requirement has always been faithfully respected. Attendance upon such religious services as the University conducts from time to time is in no respect compulsory for students. Nevertheless, despite the distance of the University Auditorium from the City, the services are often well attended by the undergraduates. One cannot but believe that when the University can offer adequate residential facilities on or near the Campus one of the greater hindrances to a satisfactory attendance will have been removed. In the meantime the University must continue to hold services for the benefit of those who take advantage of them as well as to emphasize the place of religion in human life.

The chief services of the year are: the Inaugural Service held each autumn on the second Sunday after the beginning of registration; the Memorial Service held in March or April; the Baccalaureate Service held on the Sunday before Spring Convocation. During the winter session many of the churches conduct special student services in many of which members of the University Faculty take part.

In the student body there are two voluntary religious organizations -- the Student Christian Movement and the Christian Fellowship.

Admission of Upper School Pupils by Recommendation

During the latter part of the academic year the Matriculation Conference of Ontario, a body composed of representatives of the Department of Education and of the five universities of the Province, agreed to admit Upper School pupils to universities through principals' recommendations as well as through examinations. This new method of admission was to go into effect for the year 1935-36. It is but an extension of the method employed for the past few years in reference to Middle School pupils. While this new application of the principle was accepted with formal unanimity, yet some of those accepting it entertained, and probably still entertain, several apprehensions.

Apparently the most pronounced of these is the suspicion that the standard of Honour Matriculation -- which is what the Upper School studies are nominally claimed to be -- may be generally lowered and that the quality of the majority of university entrants will decline correspondingly. One cannot but remember that formerly the candidates for Honour Matriculation were a selected group capable of undertaking advanced studies with profit and distinction. For one who so recalls the past it is natural to wonder whether the fine attainments of a selected group can be maintained by the average candidate for university entrance merely by making the advanced studies a general requirement. When more than a certain number of secondary school pupils are debarred from entering universities by reason of failure to meet requirements, a public protest, at least in a democratic country, is the common result. The suspicion cannot be suppressed that fear of just such a result may (human nature being what it is) have the influence of lowering the standards of admission. All those who appreciate the vital importance of high standards in education will watch the effect of the new experiment very closely, and, we hope, with suspended judgment.

REGISTRAR'S DEPARTMENT

Registrar: K. P. R. Neville, M.A., Ph.D.

Associate Registrar: Helen M. Allison, B.A.

Assistant Registrar: Olga A. Miller, B.A.

The Registrar's report as submitted to the President is not of a nature to warrant its complete reproduction here. Obviously some of its tables of statistics are solely for the guidance of the Administration. Such tables as are given herewith have been selected because of their inherent interest for the Governors and for others to whose attention this report will be brought.

UNIVERSITY COLLEGE OF ARTS

Dean: K. P. R. Neville, M.A., Ph.D.

"There are no matters of major importance or interest to record but several minor happenings in the academic year may be worthy of reference.

"The special feature of the Summer Session (to which reference will probably be made in other reports), namely, the Master School of Music under the direction of Mr. Edgar Schofield of New York City; also the continuation of the experiment of 1933 -- the French Summer School at Trois-Pistoles, Quebec -- with increased attendance, enthusiasm and efficiency.

"The reduction in cash value of undergraduate scholarships from seventy-five to sixty dollars each all because of the downward trend in interest rates.

"The extension of the recommendation system previously operative in the Middle School to Upper School examinations. The existence of our Junior Group System leaves us free to choose our own honour course students regardless of the apparent quality of their secondary school performance.

"A year's experience with the operation of our Junior Group System revealed some apparent major weaknesses. As a result an adjustment was made in Junior Group 1 so that the total number of credits might be materially decreased for the better students. A fourth group was added to make our English and History course more closely parallel to that required in other universities. This involved the reduction of the three languages formerly required to two."

Dean Neville sets forth convincingly the effects of the prolonged financial depression upon his Faculty. Since his argument coincides with the representations made concerning the other Faculties, attention is given to the situation elsewhere in this report.

FACULTY OF MEDICINE

Dean: F. J. H. Campbell, B.A., M.D., M.R.C.P., F.R.C.P.(C).

"Following the session of 1934-1935 the Faculty of Medicine graduated thirty-three students at the Spring Convocation and one graduate was granted the degree of Master of Science. All members of the graduating class were successful in the Dominion Medical Council examinations and have obtained internships or teaching appointments for the coming year.

"The enrolment of the Faculty of Medicine increased from 139 to 191 during the year 1934-1935. This increase was due to the change in the course which now consists of one year premedical work, one year with some premedical and medical work, and four years of medicine. Several departments have been very overcrowded owing jointly to the overlapping of the new and old timetables and to the size of the classes.

"During the past year an agreement was effected with Victoria Hospital whereby the University is given control of the Staff Wards of the Hospital. This agreement was incorporated in a bill known as the Victoria Hospital Act and was given approval by the Provincial Legislature.

"There has been no inspection of the Medical Schools of the United States and Canada for the last ten years. However, a new inspection is now being initiated under the combined auspices of the American Medical Association, the Association of American Medical Colleges, and the Joint Association of State Boards. The American schools are to be inspected first. Since several of the Canadian schools have already invited inspection, it is likely that our school will be inspected during the coming session.

"One of the requirements that must be met is the availability of sufficient clinical material in relation to the number of students registered. This will mean that the size of our classes must be kept within certain limits. In this connection it should be pointed out that some rebuilding of Victoria Hospital will assuredly be necessary in the near future. Victoria Hospital was built when the City of London was very much smaller than it is at present and when hospital facilities were utilized much less than at present.

"Research activities have been going on in all departments during the year in spite of reduced technical staff and an increased amount of teaching. In addition the departments of Pathology, Pathological Chemistry and Radiology, as well as the clinical departments, have had much more routine work as a result of the increased number of patients on relief, or near relief, who require hospital services.

"Many members of the staff have as usual contributed papers at various association meetings and meetings of scientific societies."

FACULTY AND INSTITUTE OF PUBLIC HEALTH

Dean and Director: A. J. Slack, M.D., D.P.H.

"Student registration in the Faculty of Public Health was practically the same as in the previous year with 9 full-time, 8 part-time and 2 special students registered in the Public Health Nursing Courses. 10 students were graduated at the Spring Convocation, 4 with the degree of Bachelor of Science in Nursing, 4 with the Certificate of Public Health Nurse and 2 with the Certificate of Hospital Administration. During the year regular lecture courses were given to 112 students registered in the Faculty of Medicine and to 168 different individual undergraduate nurses in the Training Schools of Victoria, St. Joseph's and the Ontario Hospitals, making a total of 299 individual students receiving instruction from the full-time staff of the Institute.

"The Institute Library now contains 665 bound volumes, 400 of which have been catalogued in the Library of Congress classification. Besides this many unbound volumes of journals are on the shelves. During the year 435 books and 1,110 journals were loaned. Accessions during the year include 35 new books and 43 bound volumes of journals. During the academic year the Library is in constant use as a reading room and is rapidly outgrowing its present location.

"In a Public Health Laboratory the routine analyses must take precedence over any other line of endeavor. Analyses must be performed promptly and reports made without delay.

"The opportunity for research, which would be of advantage to both staff and institution, is always present, but the continuous increase in routine prevents its development.

"We gratefully acknowledge the continued hearty cooperation of the Department of Health of Ontario, the other Departments of the University, and the loyal support of the Institute staff which has made possible the completion of another year of progress."

Since Dean Slack's report is published in full in the printed Announcement of the Faculty of Public Health for 1935-1936, I recommend to all those who are interested in the tremendous and growing number of laboratory examinations conducted at the Institute of Public Health that they secure a copy of the Announcement and read with care that part of it that deals with laboratory examinations. Suffice it to say that the total number of examinations conducted during the year ended June 30th, 1935 was 73,638 as against 67,369 for the previous year. The laboratories now provide public health service for more than 200 municipalities. Dean Slack also points out that acting for the Provincial Department of Health the Institute distributed 29,836 outfits for the collection of specimens and 17,199 packages of free biological products exclusive of insulin.

DEPARTMENT OF SUMMER SCHOOL, EXTRAMURAL STUDIES,
UNIVERSITY EXTENSION AND ADULT EDUCATION

Chairman: Professor H. R. Kingston

(a) Division of Summer School and Extramural Studies
Director: Professor H. R. Kingston

"The total attendance in the Summer School this year was 571, an increase of 84% over that of last year. A comparison table of figures for 1935 and 1934 follows:

<u>Registration</u>			
	<u>1935</u>	<u>1934</u>	<u>Increase</u>
Number registered in credit courses:			
in London	314	211	49%
in Trois-Pistoles	44	42	5%
Number registered in non-credit courses:			
Orchestral Music	41	0	
Master Vocal Music	62	17	265%
Total	461	270	
Duplicates	10	1	
Total numbered "registered"	451	269	68%
Department of Education Vocal Music	149	44	239%
Piano Classes at Western Ontario Conservatory of Music	24	0	
Total	624	313	
Duplicates	53	3	
NET TOTAL ATTENDANCE	<u>571</u>	<u>310</u>	84%

"There are two principal causes of the marked advance in Summer School attendance this year. The first is the regulation of the Department of Education proclaimed in June that teachers wishing to make permanent their Interim First Class Certificates would be required to do a year of university work in addition to the Upper School courses taken for the Interim First Class Certificate. This work replaces the second year at Normal formerly required. The response to this requirement was immediate and is reflected in the fact that in the 1935 Summer School there were 163 new students who paid First Registration Fees, as compared with 47 last year. The second cause of the increase in attendance was the emphasis placed by the Department of Education on the teaching of school music, and the definite assurance that music was soon to play a larger role not only in the elementary schools but also in the secondary schools as well. This new attitude is clearly indicated by the appointment last summer of a Provincial Director of Music for both the elementary and the secondary schools. The reaction to the above is

seen in the increase from 44 to 149 in the attendance at the vocal music courses of the Department of Education held here. This increase is entirely in addition to that referred to above since these vocal music students of the Department of Education paid no First Registration Fee to the University.

"The Master Classes in Vocal Music, inaugurated last year under Mr. Edgar Schofield, were continued this year under the directorship of his brother, Mr. Ernest Schofield. Several facts contributed to the success of this course this year. The classes were concentrated in either of two terms of three weeks and the tuition fee was reduced to a scale more commensurate with that usually paid in Canada for the best instruction in music; several scholarships in the classes were subscribed by interested citizens of Western Ontario; the Department of Education formally approved the course and sent out, along with other literature, twenty-one thousand pamphlets on the course, to the teachers of Ontario. All these factors coupled with the momentum gathered from the offering of the classes last year produced a most satisfactory result this summer.

"The Vocal Music courses of the Department of Education, for the Elementary, the Supervisors' and the Specialists' Certificates, were given again this year under the Directorship of Mr. Charles E. Percy, Director of Music at the Normal-Model School, Toronto, assisted by Mr. E. W. G. Quantz and Mr. T. C. Chattoe of London. These courses were most successful and the large increase in attendance is indicative of the minds of the teachers in regard to the future position of music in our schools.

"While these Vocal Music courses of the Department of Education are in no way connected with the University curriculum, the fact that 53 students in these courses took also one or more of our university courses is strong evidence of the value to the University of the holding of these courses in our Summer School. Other advantages also are at once apparent.

"The French Summer School at Trois-Pistoles had a very successful eight weeks' session with an enrolment of 44. This school is not only giving students in this and other universities a very practical, efficient training in speaking the French language but is providing also an opportunity for these students to obtain a sympathetic understanding of the life and ideals of a cultured type of French life. Out of this there is now emerging a plan whereby French students from Quebec will come to our University Summer School at London and not only obtain proficiency in speaking English but gain in addition an intimate knowledge of life in a typical English community. This whole project is receiving the most cordial and enthusiastic support not only of the people of Trois-Pistoles but also of many of the leaders in the educational life of the Province of Quebec and bids fair to becoming a strong factor in bringing about a new and happier understanding and cordiality between the people of Quebec and Ontario.

of the people of Trois-Pistoles but also of many of the leaders in the educational life of the Province of Quebec and bids fair to becoming a strong factor in bringing about a new and happier understanding and cordiality between the people of Quebec and Ontario.

of the people of Trois-Pistoles but also of many of the leaders in the educational life of the Province of Quebec and bids fair to becoming a strong fac-

first time. This service to the teachers who are unable to attend the winter sessions of the University at the present time is well worthwhile, but is entailing a heavy load of work which is a matter of deep concern to all engaged in it. As was mentioned in last year's report, it would seem advisable at the earliest opportunity to increase the intramural staff so that this work can be handled to a greater degree directly by those actually engaged in teaching intramural work. Thus will it be easier to keep the standard of this work up to a high level and in every way to give the best possible service to our extramural students.

"Last June there graduated twenty students who had taken part or all of their course through the Summer School or Extramural Department. This makes a total of 165 extramural students who have graduated with the B.A. degree previous to July 1, 1935. Eight more graduated at the October Convocation of the present year."

(b) Division of French Summer School, Trois-Pistoles, Quebec.

Directors: Professor H. E. Jenkin
Professor M. E. Bassett

Director Jenkin submits the following excellent report:

"The group at Trois-Pistoles this year numbers forty-four, all of whom are taking full courses. It had been expected to reach fifty but withdrawals at the last moment leave the number at one more than last year. Nevertheless, this represents a solid advance because each of the students is taking the full course and last year a number attended for part time only. One of the students is a bilingual French Canadian from Ottawa and McMaster who is interested in phonetics.

"This year's group is more homogeneous than that of 1934, and has been consequently more easy to organize. For Professor Bassett's work it has been divided into three nearly equal groups:

1. Those who have already taken the course at Trois-Pistoles or the corresponding one at the University of Western
has been consequently more easy to organize. For Professor Bassett's work it has been divided into three nearly equal groups:

"We have received the same hearty welcome this year as in the past and the installation of office furniture has been accepted as tangible proof of our determination to continue the work here and has afforded very great satisfaction. More people than ever have offered to board students, and it has been possible in two cases to allot some of our number to new households without depriving our former hostesses.

"The usual arrangements for swimming and tennis have been made and the students are taking full advantage of the facilities provided. The payment in advance of the fee for recreational activities has made the provision of these much easier.

"The provision of a library consisting of books belonging to the University of Western Ontario will greatly assist the students in their studies and in their recreational reading.

"The painting group, though smaller than last year, has already begun to work enthusiastically.

"An Advisory Committee of the leading citizens has been formed to cooperate with us in matters concerning the students' welfare at Trois-Pistoles.

"The Honourable Jacob Nicol, Colonel Bovey and the Honourable R. F. Stockwell have again contributed money prizes, and the Honourable Cyrille Pelé, Superintendent of Public Instruction in Quebec, has again made his generous gift of medals."

(c) Division of Extension and Adult Education
Director: Professor S. F. Maine

"Late afternoon and evening classes for credit and non-credit students were maintained in Chatham, Windsor, Sarnia, Brantford, Kitchener and London. The subjects offered were in the fields of English, History, Psychology and Economics. It was reported a year ago that three classes had been established in Windsor, two of which were instructed by members of the staff of Assumption College. This arrangement was continued during the past year with increasing success as all three classes were well attended. The principle was extended to Kitchener where a second course was offered under the instruction of a member of the staff of Waterloo College. In the six centres noted, a total of twelve courses was offered. This continues to be one of the most important phases of our university extension work and, in conjunction with the Summer School, gives excellent service to our constituency.

"Great credit should be given to the public libraries in the various centres which, in the majority of cases, have cooperated wholeheartedly in this educational service.

"In cooperation with local clubs, societies and organizations of various types in different centres, the Extension Department arranged numerous series of lectures. The Browning Club of the City of London has

added another year to its successful career. A current topic group, drawn largely from the financial institutions of the City, had a membership of nearly one hundred and met during the winter in the Huron and Erie Building. Alma College again made use of the Extension service and sponsored a series of lectures in St. Thomas on "Recent English Literature." The Watford Reading Club, the oldest organization of its kind looking to the University for its lecturers, not only completed another successful year but inspired other centres to follow its example. As a result, organizations were formed in Arkona and Patrovia and these in turn have completed highly satisfactory lecture series. The Business Women's Club of Woodstock is another new lecture group to appear during the year. Other groups which have been in operation for a year or more also repeated their requests for lectures; i.e., the Y.W.C.A. of Paris, a community organization of Strathroy, Business Women's Canadian Club of London, etc.

"Under this heading several new groups appealed to the University for tutors during the year. The Retail Merchants' Association of London, in conjunction with the Extension Department, organized a series of twenty lectures on retail problems. Lectures were given by the members of the Business Administration Department and the response was eminently satisfactory.

"Through coöperation with brokerage houses interested in mining, a series of sixteen lectures was arranged dealing with such phases of Geology as would be of interest to such a group.

"The Parent Education Class was continued with the coöperation of the local Mental Hygiene Clinic. This class has developed into a teacher-training group for the important work of parent education.

"Again, the Institute of Chartered Secretaries requested the services of a University staff member in preparation for their examinations.

"During March a broadcast under the title "The University of the Air" was presented through the coöperation of Station C.F.P.L., London. The general theme for the first week was "Early Indian History of the London District"; for the second week, "Subjects of Current Interest"; for the third week, "Modern Literature"; and for the fourth week, "Music Appreciation" which was presented in coöperation with Alma College. As is usual, the almost unbroken silence of the Canadian radio audience reveals that there was at least little or no disapproval.

"Arrangements were also made at the request of the Radio Commission for several staff members of the University to broadcast over the Commission network.

"An innovation was established when the Extension Department sponsored a series of lectures on Art Appreciation. The Department continues to consider its task to be the extension to the public of the facilities of the University. However, in this case, while no Department of Fine Arts exists, it was felt that a growing need on the part of the public should be met. With

"the cooperation of Dr. L. D. Longman, Mr. Arthur Lismer and Professor M. E. Bassett, five lectures were given. The attendance was fully equal to the expectation and an Art League was revived in the City, which, in the future, will cooperate with the Department in sponsoring lectures. The League is also making exhibits available in the City.

"A novel experiment was engaged in when a short course in Economics adapted to the needs of young farmers was offered. Thirty persons registered and the course continued for five days. Lectures and discussion groups dealing with such problems as Marketing, Cooperative Buying, etc. were carried on by members of the Economics and the Business Administration staffs. Enthusiastic commendation has been received from members of the school and it is probable that the work will be continued under the auspices of the Workers' Educational Association which is extending its facilities to farm workers.

"Cooperation with the Workers' Educational Association is becoming increasingly important. While this Association is financed by the Provincial Government and the Carnegie Foundation through the University of Toronto, our university has been requested to supply tutors in London, Woodstock, Stratford and Windsor. Our Director of Extension is a member of the Executive of the Association and with other staff members is called upon to participate in the promotional activities of the Association.

"The Extension Department provides a Bulletin which lists approximately two hundred lecture subjects. These Bulletins are distributed widely and frequent calls are made by churches, service clubs and miscellaneous groups of various types for the services offered in the Bulletin. Last year there were seventy-three such occasional lectures having a total attendance of approximately sixty-six hundred persons. Through these the University is able to make extensive contacts with its constituency.

"As in previous years, the Extension Department has cooperated with other departments in the University to promote lectures by persons of importance. With the Classics Society the Department invited Professor Gilbert Norwood to visit the City and lecture on Apuleius. With the Botany Department the Extension Department sponsored a lecture by Professor R. B. Thomson of Toronto, his subject being "A Botanist in the West Indies." Dr. C. T. Currelly was also advertised widely through the churches and a large audience gathered to hear his lecture, "The Common Things of the Common People in the Days of Jesus."

"A total of five hundred and eighty lectures and classes was given under the headings noted above. Disregarding the Workers' Educational Association lectures which, though arranged through the Department, are not actually departmental lectures, a total of five hundred and four lectures was given which is a ten per cent. increase over the previous year.

"In addition to the lectures arranged through the Department, various members of the University staff have reported, for purposes of record, lectures, talks and demonstrations which they have given. Dr. Dorothy Turville reports ten lectures given before various groups and having a total attendance of approximately seven hundred. Professor Fred Landon has reported numerous lectures and addresses. The Director of Extension is called upon frequently to speak to service clubs and educational organizations of various types."

THE LIBRARY BOARD

Chairman: Reverend C. C. Waller
Librarian: Professor Fred Landon

"At this time, a year ago, the Lawson Memorial Library, upon which construction work had begun in January, was nearing completion. Removal of the books and other property commenced in the first week of June and occupied about two weeks. The library was ready for the use of the Summer School when its session opened at the first of July. The formal opening and dedication of the library took place on the evening of Friday, September twenty-eighth, the guest speaker being the Honourable Martin Burrell, Parliamentary Librarian, Ottawa. About six hundred guests attended the dedicatory exercises and afterwards inspected the new building.

"The experience of ten months has shown that the new library building is well adapted to its purposes within the University. The reading rooms are commodious, well lighted, and attractive in appearance. It is the opinion of the library staff that the new environment has had a noticeably beneficial effect upon the study habits of the student body. The very fact that some physical effort is required to go to the reading rooms in the new library has weeded out the casual visitors who were to be found in the library's former quarters.

"The number of volumes in the libraries of the University at April 30th was as follows:

University Library	81,739
Medical School	20,546
Institute of Public Health	613
Uncatalogued (Barnett, remainder, etc., estimated)	17,718
	<hr/> 120,616

"The number of volumes accessioned and catalogued during the year was:

University Library	6,535
Medical School Library	1,190
Institute of Public Health	26
	<hr/> 7,751

"The additions to the Library had their origin as follows:

Purchase (regular)	1,071
Purchase (Carnegie grant)	896
Donations	2,595
Exchanges	1,532
Bindery	685
Barnett remainder	972
	<hr/> 7,751

"The number of books borrowed during the year showed an increase over the previous year, the comparative figures being as follows:

	<u>University Library</u>	<u>Medical School</u>	<u>Institute Library</u>	<u>Total</u>
Loans in 1933-34	64,152	14,469	1,283	79,904
Loans in 1934-35	<u>65,896</u>	<u>15,334</u>	<u>1,392</u>	<u>82,622</u>
Increases	1,744	865	109	2,718

"The comparative loans of books from the two reading rooms in the University Library were as follows:

	<u>For use outside Library</u>	<u>For use inside Library</u>	<u>Total</u>
Main Reading Room	25,151	12,770	37,921
Reserved Reading Room	<u>10,004</u>	<u>17,971</u>	<u>27,975</u>
	35,155	30,741	65,896

"The number of volumes in the library of the Medical Faculty has this year gone well over the 20,000 mark. The additions during the year numbered 1,190 volumes of which 527 were secured through exchange relations with other libraries. Two new journals were added in complete form, the Journal of Allergy and the Journal of Pediatrics. Gifts of books and journals were received from Mrs. H. A. Sabine, Mrs. W. M. English of Hamilton, Dr. John A. Macgregor, Dr. R. R. Ferguson, Dr. R. Schute, Dr. G. W. A. Aitken, Dr. J. W. Crane, Dr. F. R. Miller, Dr. Madge T. Macklin and the Canadian Medical Association. A portrait of David Farrar, M.D. was presented by his daughter, Mrs. Rowat, and a framed portrait of John Hunter was given by Mr. George R. Gardner.

"The Board also feels it its duty to draw attention to the fact that their experience in their new home, the Lawson Memorial Library, does not differ from that recorded in other libraries elsewhere, that the provision of proper housing accommodation and adequate care accelerates donations of books and other valuable material. As guardians or trustees of that material they foresee the approach of a time when the present splendid accommodation will be insufficient and urge upon the administration of the University the desirability of devising some means by which the University may be financially prepared to meet, when necessary, the situation which must inevitably arise."

AFFILIATED COLLEGES

ASSUMPTION COLLEGE

President and Superior: Father T. A. MacDonald, M.A.

"During the past year the student body of Assumption College increased from 231 to 324. The young women of Windsor were given an opportunity to receive a university education through the affiliation of Holy Names College with the University of Western Ontario through Assumption College. During the past year twenty-eight students were registered in the First Year.

"We wish to report the addition of three assistant professors to our staff, as well as to the staff of Holy Names College. During the year 1935-56 the staff of the Mediaeval Institute of Toronto University will give several courses of lectures at Assumption College under the direction of Dr. Gilson.

"A very welcome addition to the activities of 1934-35 was the lecture league. This was sponsored by the student body and they had the privilege of listening to outstanding authorities from Europe, United States and Canada. According to present arrangements the league will function in a much wider field during the coming year.

"During the past year our staff lectured to the extramural students of this district registered in University College. The arrangement was satisfactory from our point of view and several letters have come from the students requesting a continuance of the lectures.

"Thanks to the Carnegie grant and several gifts we have to report many additions to our library. The increased number of students has made the expansion of the library a necessity.

"During the past year our basketball team reached the finals in the Dominion playdowns after winning the Michigan-Ontario Conference. The football team had fair success and the hockey team were champions of the Michigan-Ontario Conference. Competition in debating and public speaking was carried on with several teams from across the border."

HURON COLLEGE

Principal: Reverend C. C. Waller, M.A., D.D.

"The Reverend F. Anderson resumed his labours with renewed vigour. The College was able to retain the full-time services of the Reverend R. T. Appleyard and the part-time help of the Reverend Kenneth Taylor, who had been

helping to fill the vacancy caused by Dr. Anderson's absence. Actually the College therefore enjoyed for the first time, we believe, in its teaching history the full-time services of the Principal, Professor Anderson, the Reverend R. T. Appleyard and the part-time services of Dr. Sage, Reverend J. H. Craig and Reverend K. R. Taylor. The result was a reduction of the hours of the work called for on the full-time members and we believe an increased efficiency in the work of teaching. This programme was in part marred by the indisposition of the Principal during the last three months during which he was ordered to reduce the amount of work he had been previously doing.

"The Sylvanus Joy Memorial Prize was awarded to Mr. Gordon Smith, of Toronto.

"Two years ago the Council lengthened the course in Theology so that in future students would take two years after graduating with a B.A. degree. The full effects of this change have not yet been realized. It would mean, on the one hand, that during the Arts course the student will not be permitted to take extra credits in Theology and, on the other hand, that in the final two years he will have more time for independent reading in theological subjects.

"We are again indebted to the courtesy of the University in holding a special Convocation in connection with the closing exercises of Huron College in order to confer the degree of D.D., jure dignitatis, upon the Very Reverend C. E. Jenkins, B.D., Rector of St. Paul's Cathedral and Dean of Huron. Other degrees won by Huron College students during the year and conferred by the University were two Bachelors of Divinity and four Bachelors of Arts. Six Huron students received the Huron College Diploma of Licentiate in Theology, all of them holding the B.A. degree.

"In conclusion it is worthwhile summarizing the forward steps of progress made by the College in large measure through the liberal cooperation of the University during the last few years.

1. Complete physical examination at entrance and repeated physical examination the three following years.
2. Personality estimation (for all Theological students) conducted by the Ontario Mental Health Clinic.
3. The requirement that all students on admission take the course for the B.A. with Theological options, or, by permission, another B.A. course with honours.
4. The extension of the course to six years from Junior Matriculation.
5. Admission of women to the B.A. course with Theological options as a general preparation for Church work.
6. The inclusion in the Arts course of especially valuable subjects for the ministerial profession; for instance, Christian Ethics, Educational and Abnormal Psychology.

7. Under the direction of Professor D. J. Wilson of the University there was given during the past session a special course in Pastoral Psychology. This proved to be so successful that an endeavor is being made to incorporate the course permanently in the curriculum.
8. The provision of a new site in close proximity to the University buildings.
9. Some part of the English Bible is required in each of the four years of the B.A. course with Theological options and the credit therefore has been doubled.
10. The College has been permitted to substitute a special course in Political Economy adapted to the requirements of Theological students who may be called upon to assist in giving leadership, especially in rural communities.
11. The Faculty of Public Health will provide a special course in Public Health for Theological students in their final or semi-final year in place of the course previously required of all first year students in Public Health and Bacteriology."

URSULINE COLLEGE

Dean: Mother M. St. Anne, M.A.

"The year 1934-1935 at Ursuline College has been a year of remembrance. It is very fitting that at Brescia Hall in London should be celebrated the glory of Brescia in Italian Lombardy where on November 25, 1535, Saint Angela Merici founded the Company of Saint Ursula for the teaching of young girls. As part of the quadricentenary programme our students produced during the class terms two plays on the theme of Saint Angela, one in French and one in English, written by members of the staff. All have found deep interest in a study of this sixteenth century history.

"This year has been also a year of ten per cent. increase in registration and of greater application to honour work. It has inspired a high standard of student effort which was crowned by the award of the Governor-General's medal to an efficient member of our graduating class. The popularity of Modern Languages has been evident from the number of Brescia women who have attended the lively and profitable French Summer School at Trois-Pistoles since its inauguration. It has been evident as well at student parties on the Medway Creek inspired by sing-songs which included numbers in French, German and Spanish. It prompted a third year student to compose a German play on the story of Mozart which provided us with a charming evening's entertainment.

"In memory of our dear Mother M. St. Michael, the gift to the library of one hundred pounds from the estate of her aunt, Miss Thornton, has been most welcome. Added to the three instalments of Carnegie grant, it will increase the future efficiency of our college work at Brescia Hall to which Mother St. Michael gave so generously of her strength and her rich talents.

"St Peter's Seminary library is also increasing in volume and is in process of being catalogued by members of the staff who conferred on the subject with Professor Landon, Librarian of the University.

"Reverend P. F. Pocock, B.A., J.C.D., has been added to the staff as Professor of Canon Law and Moral Theology and assistant in the work of Medieval Latin; Reverend L. A. Wemple, B.A., L.Ph., has been appointed member of the Philosophy Department; and Reverend L. J. Flynn, B.A., S.T.D., who has already spent three years in Rome, is returning, after a summer spent in Ontario, to the Biblical Institute for further study before joining the staff in 1936. These three are all members of the 1926 graduating class of our university."

WATERLOO COLLEGE

President: Reverend Frederick B. Clausen, D.D.
Dean: Willis C. Froats, M.A., B.Paed.

"Waterloo College during the Academic Year 1934-1935 had a registered attendance of 79 Arts students, 26 of whom were taking Honour Courses. It is now equipped to carry 4 Junior Groups and the 6 Specialist and Honour Courses, and has done so successfully. This last year the full 4 years of the 6 Honour Courses were in operation.

"Our timetable has been, as in previous years, so arranged as to include the possibility for those actually engaged in teaching in Public Schools or High Schools in the surrounding localities to take a number of courses intramurally, e.g., English 20, Psychology 20, History 25, etc. Unfortunately there were some duplications on this ground between Waterloo College regular lecture courses and those of the University Extension classes.

"In both the Winter Session and the Summer Session Waterloo College has given, as in past years, only those courses which have been regularly granted as her right to give. No other courses, in any session, have been attempted. Students desiring other courses than the above mentioned have been systematically directed to the University office.

"The graduates in June numbered as follows: 11 in Pass Course; 5 in Honour Courses; i.e. 2 in English and History, 2 in Classics and 1 in

English and French; 1 from the Seminary received the B.D. degree through the College; 1 D.D. degree was granted through affiliation.

"Hans Rabow, Ph.D., University of Berlin, was added to the staff a year ago to replace Helen R. Reese, Ph.D. of Johns Hopkins, as Professor of French, and this July 2nd he entered upon his second year at Waterloo College. Walter H. Johns, Ph.D., Cornell, and graduate of the University of Western Ontario, was engaged a year ago as Professor of Classics, and on July 2nd he, too, began his second year at Waterloo."

ACTIVITIES OF WOMEN STUDENTS

Adviser to Women: Professor Dorothy Turville, Ph.D.

"During the first seven weeks of the Academic Session 1934-1935, 110 fifteen-minute interviews were held by the Adviser to Women with freshmen and other women students entering the intramural courses for the first time. Throughout the session numerous other interviews with women students on matters relating to courses, residence problems, health, sororities, Undergraduate Women's Organization, and employment, resulted in various adjustments to relieve the anxieties of those concerned.

"Of the three Greek letter groups for women, one has been installed as a chapter of the national Pi Beta Phi Fraternity. This marks a step in wider recognition of the quality of personality and scholarship possessed by students in this University. The active members of these groups number as follows:

Alpha Kappa Chi	21
Pi Beta Phi	29
Pi Sigma	<u>25</u>
	75

This total represents 24.1% of the women students in University College and the Faculty of Medicine.

"The fifteen groups of the Undergraduate Women's Organization have been active in raising their voluntary financial allotment, with the result that some three hundred dollars have been added to the fund for building a Women's Union. The number of social gatherings exclusively for women students has been greatly reduced this year owing to the lack of suitable accommodation for such functions.

"As for the housing situation, twenty-five additional homes were inspected and more or less approved by the Adviser to Women. Although all of the houses on the approved list are not in actual use every year, there are not too many to allow for the variety of accommodation required. Of the women

students in University College and the Faculty of Medicine, 155 or 49.8% are from out of town, of whom some find residence with relatives and friends, some 31 are residing in the three sorority houses, while the majority are dependent on the approved list of private homes.

"Attendance at many social functions has provided the Adviser to Women with opportunities for personal acquaintance with the viewpoints and problems of a number of individual students."

DEPARTMENT OF PHYSICAL EDUCATION

Director: Professor J. Howard Crocker, M.P.E.

Directress of Women's Activities: Joyce M. Plumptre, B.A.

"A larger amount of interclass and interfaculty competition was developed this year, nearly all departments taking part in some form of activity. This was particularly noticeable in hockey in which 9 interclass teams participated with an enrolment of 100 students. In badminton 116 students and members of the Faculty and staff participated and 3 representative teams with 12 members on each team, were entered in the City League tournaments which were held during the year.

"Two volleyball teams from the Medical College represented the University in the City Tournament, 'B' team winning the City Championship while 'A' team was a runner-up. In the provincial playdowns, 'B' team won the Western Ontario championship and were the runners-up in the Ontario finals.

"In the Women's Department, Miss Plumptre had an attendance of 90 women students in her Hygiene course - a series of lectures once a week, and a survey of this course showed that the students considered it exceedingly helpful.

"The Stadium Committee has provided additional dressing room space in the Stadium for the better accommodation of the three rugby teams and the track team and this will be available for the Boxing and Wrestling classes later in the season.

"The high light of the year has been the active interest of our Physical Education Board, under the leadership of the Chairman, Dr. Claude Brown. The strength and wisdom of this Board in directing the policy and programs of the Physical Education Department, has accomplished much during the year.

"The Athletic Directorate by adopting the budget plan for the various clubs was able to go through the year without a deficit and with the \$1.00 increase of fee was able to pay off its indebtedness.

"It is with regret that the Department regard the loss of Miss Joyce Plumptre and her assistant, Miss Barbara Crowe. The women's work has been well organized and a large programme of intramural activities marked the growing interest among the women students.

"The loss of our senior rugby coach, Joe Breen, was a source of regret to both students and faculty alike. The appointments of Coach W. J. Storen, of J. Metras as Assistant Coach, and of L. H. Davies as Assistant Physical Director, give promise of a greater and better future for the Department's activities."

Since it is the policy of the University to provide physical education for all students, the following survey of the activities of the Department is given in full in order to convey an adequate idea of the great success the Department is achieving in executing its policy.

Hockey - 9 interclass teams.

Senior team entered in the O.H.A. - played 14 games.

Intermediate team played in the City League - 9 games.

Rugby - Senior Intercollegiate series - played 6 games with 2 pre-season games.

Intermediate rugby - played 1 pre-season game and 4 intercollegiate.

Junior team - played 5 independent games.

Soccer - Senior Intercollegiate series - played 4 games.

Intermediate Intercollegiate series - played 4 games.

Track and Field - Interfaculty Sports Day - competed in the Intercollegiate Intermediate, winning second place. Several members competed in open meets at Toronto and Hamilton.

Harrier Club's team - composed of 6 men - competed in the Harrier meet at Hamilton.

Basketball - 5 teams represented the University in senior, intermediate and junior, 1 entered in the City League and the 5th team played in the Ontario Amateur Basketball league. Senior team finished the season in second place.

Badminton - 2 students' teams and 1 interfaculty team entered in the City League tournament in which 12 persons per team played throughout the entire season.

Our senior team won the Intermediate Intercollegiate Badminton tournament, defeating both McMaster and O.A.C.

B.W. & F. - The splendid accommodation now in the Stadium for Boxing and Wrestling classes during the winter, enabled us to enrol a class of 60 students which provided systematic exercise

during the week and enabled this club to enter the Inter-collegiate tournament and tie for the championship with O.A.C. Members participated as well in several inter-city competitions.

Swimming - E. Orlick as coach of the Swimming Team, developed a group of splendid competitors, who were successful in winning second place in the intercollegiate tournament. This club participated in several meets with St. Andrews' College, Toronto, Y.M.C.A. London and St. Thomas.

Life Saving - The Swimming Club entered into the job of swimming and life saving during the months of March and April with a result that the following awards were won:

Instructors' certificates - 3;
Bronze Medallion & Intermediate certificates: - 14;
Award of Merit - 6.

This work is particularly helpful as students receiving life saving awards receive preference when applying for work at playgrounds, camps, etc., during the summer.

Tennis - The interclass and interfaculty tournaments made it possible to select our representative team to compete in the Intercollegiate Tournament, winning second place.

Golf - An open golf tournament was conducted for all students and later an interfaculty tournament from which was selected the representative team who competed in the Intercollegiate Tournament with the result that Western was the winner of the 1934 championship.

Volleyball - The Medical College entered two teams in the Inter-city competition.

Women's Department

Basketball - Senior Intercollegiate team
Intermediate Inter-Western team
Junior team
4 House League teams

Tennis - Senior Intercollegiate team
4 House League teams
81 students enrolled in instruction tennis classes

Badminton - Intercollegiate team
London Senior Ladies' Championship
City League 'A' and 'P' teams
4 House League teams
65 enrolled

Soccer - Senior and Junior teams
4 House League teams

Archery - Inter-Western tournament
40 enrolled

Dancing - 50 enrolled
3 public performances during the year

Gymnastics - 40 enrolled

Baseball - Inter-Western team

Riding - Class of 10

Golf

Hygiene Course - 90 enrolled

Leaders' Corps - 10 enrolled

"All women students are given a physical examination by physicians appointed by the University. Physical activities for each student are graded according to physicians' recommendations. The students are referred to their family physicians. Individual remedial gymnastics are given at the University when prescribed by physicians."

LOANS OF ART COLLECTIONS

The interest of the students in art has been greatly increased during the past year through loans of pictures made to the University by the National Gallery of Canada, The College Art Association of the United States and the Hart House Camera Club, Toronto.

GIFTS

The University is constantly receiving gifts of various kinds from its friends. These and the generous spirit that prompted them are acknowledged most gratefully.

\$17,000 was bequeathed to the University by the late John Stanley Lovell to form the nucleus of a student loan fund.

The residue of the estate of Rose Ann Grant of St. Thomas has been left to the University for the establishment of a scholarship to be known as the Andrew Grant Scholarship in Political Science. This scholarship will be worth approximately \$400.00 a year.

The University received \$5,000.00 from the estate of the late John Hall of London who died in 1922.

Dr. B. T. McGhie, Deputy Minister of Health, has offered a prize of \$25.00 to the student taking the highest standing in the Psychiatry examination.

Mr. Isaac Sisking presented the University with a trailer which is particularly useful for the transportation of rare trees and shrubs of Western Ontario from their native habitat to the University grounds.

Mr. R. D. Hume, K.C., of Toronto, has given the University a small collection of Indian relics originating near Arkona.

Among those who have made donations to the Library are:

Professor Gilbert Tucker (B.A. '21, M.A. '22) of Yale University -- the gift of the library of his father, the late Dean Tucker.

Reverend R. J. Bowen -- Collection of early Yukon newspapers.

Mrs. U. A. Buchner -- pictures and books.

Miss Amelia Harris -- a large number of historical papers.

Mr. T. G. Cannon, Goderich -- books.

Mr. I. F. Hellmuth, K.C. -- an illuminated address presented to his father, the late Bishop Hellmuth, in 1871.

Mr. J. E. Keays -- bound volumes of ornithological journals.

Mrs. Elizabeth Gerrans, Oxford -- books.

Miss Doris Liddicoatt, (B.A. '15, M.A. '16) -- about 175 volumes of books.

Arts Class '35 -- painting by Mr. St. Thomas Smith.

The following contributed scholarships of \$15.00 each to make it possible for a number of students to take advantage of the Master Classes in Vocal Music offered in the Summer School:

Mrs. Hume Cronyn	Judge Wearing	Mr. H. Duplan
Mr. T. H. Yull	Mr. O. Roy Moore	Mr. A. E. Silverwood
Mr. J. M. Dobson	Mr. J. D. Good	Mrs. C. L. Jeffery
Mr. G. Copeland	Dr. W. Sherwood Fox	Mr. F. G. Fuller
Mr. Cliff. Robinson	Mr. J. D. Isaacs	Mr. H. W. Strudley

APPOINTMENTS AND AWARDS RECEIVED BY ALUMNI

Honourable W. J. Roche, M.D. 1883, formerly Minister of the Interior in Sir Robert Borden's Cabinet, for many years Chairman of the Civil Service Commission of Canada and sometime Chancellor of our university, was honoured by His Majesty the King in the distribution of the Royal birthday honours by being made a Companion of the Order of St. Michael and St. George.

Honourable R. D. Morand, M.D. '12, at one time a member of the Meighen Cabinet, received the great honour of being appointed Deputy Speaker of the House of Commons in succession to the late M. Armand Lavergne. This is the second time that a comparable distinction has come to a graduate of our university, for the first graduate in Arts, the Honourable R. F. Sutherland of the class of 1883, served at one time as Speaker of the House.

During the year Frank Riggall, M.D. '34, achieved the remarkable record of passing the examinations leading to three of the most important medical degrees of Great Britain: M.R.C.P. (Edin.); L.R.C.P. (Lond.); M.R.C.S. (Eng.).

James Talman, B.A. '25; M.A. '27; Ph.D. (Toronto) has been appointed Archivist of the Province of Ontario and Acting Librarian of the Legislative Library.

Hall Newell, B.A. '30, has been appointed to the staff of the University of Toronto Schools. This appointment is based upon Mr. Newell's outstanding success as a teacher in the East York Collegiate Institute and in the Malvern Collegiate Institute, Toronto.

J. S. McGregor, B.A. '23; M.D. '27; was admitted to the Fellowship of the Royal College of Surgeons of Edinburgh.

Angus D. McLachlin, M.D. '32, Rhodes Scholar 1933, has passed the primary examinations for the Fellowship of the Royal College of Surgeons of England.

Joseph Bowen, M.D. '32, has passed the surgical examination for residency in the New York Postgraduate Hospital. On October first he assumed his post and remains there for twenty-seven consecutive months' training in surgery.

D. A. McLarty, B.A. '34, has accepted the position of Assistant in Botany in Columbia University, New York.

Hugh Dowker, B.A. '33, M.A. '35 (Toronto), has been awarded a Fellowship in Mathematics in Princeton University.

Goldwin Smith, B.A. '33, M.A. '34 (Toronto), is continuing as Assistant in History at Cornell University, Ithaca, New York.

Maurice Kingston, B.A. '35, and Carson Mark, B.A. '35, have received Fellowships in Mathematics at the University of Toronto.

H. G. Trimble, B.A. '35, has been appointed Fellow in Mathematics at the University of Wisconsin, Madison, Wisconsin.

Florence Winnifred Ashplant, C.P.H.N. '29 (Public Health), was awarded last year a Rockefeller Foundation Fellowship for postgraduate study in the Lobenstein Clinic of New York. At the expiry of her Fellowship she was appointed to the National Office of the Victorian Order of Nurses for Canada.

THE ALUMNI AND ENDOWMENT DEPARTMENT

Director: J. Mackenzie Dobson, B.A. (Arts)

Associate Director: J. W. Crane, M.B. (Medicine)

Endowment Fund

"It is with great satisfaction that we report the completion of payments on many overdue pledges. The unpaid balance on the endowment fund is accounted for to the extent of eighty per cent. by pledges to the class funds made on a twenty year basis. The first transfer of class funds to the endowment fund is due in 1947.

Sir Arthur Currie Memorial Scholarship Fund

"Already a total of \$6,635 has been subscribed to this fund and additional subscriptions are still being sent in. It is very gratifying to know that all payments on pledges are being paid as they come due.

Alumni Loan Fund

"This year the Alumni Loan Fund has been greatly augmented from two sources. Mrs. W. J. Hanna of Sarnia, who takes an active interest in the University, has made a generous donation of \$1,000. As noted elsewhere in the President's Report the late Mr. J. Stanley Lovell left to the University a bequest of \$17,000 a part of which in a year or two will be available for loans to needy students.

"The Alumni Loan Fund is what is technically known as a revolving fund. That is to say, the amounts received on the repayment of loans are available for new loans. Our fund is now beginning to derive advantage from its revolving character in that students who a few years ago were aided by the Fund are starting to repay the amounts they have borrowed and are thus making it possible for the Fund to be of assistance to their present successors.

"Thus far it has not been found necessary to refuse a loan to any student in a final year. Sometimes applicants have been persuaded, in their own

interests, to reduce the amount of the loan they have requested, but in every such case it was definitely ascertained that the applicant was not being caused any hardship thereby.

Alumni Activities

"Successful reunions of alumni have been held in Toronto, Montreal and London. Contacts with alumni of all faculties have been constantly maintained in other places also. According to our reading of the spirit and desire of the alumni we believe that the time is about ripe for the organization of a General Alumni Association. The graduates in Public Health and Arts are ready even now to take such a step and it is becoming plainer that graduates in Medicine are realizing that organic union of the graduates of all faculties would add greatly to the strength of the University and the usefulness of the Alumni.

The Alumni Director and the Western Ontario Conservatory of Music

"For the past year and a half the Director of Alumni Activities has been serving as Registrar and Bursar of the Western Ontario Conservatory of Music. While technically the duties of these offices are not part of his normal functions, yet they have made it possible for him to achieve more of the purposes that the Directorship is designed to achieve than he could have done otherwise. He has been thus able to increase the number of contacts between the public and the University and to add appreciably to the group of the University's friends and supporters. The Conservatory of Music is growing very rapidly and is enlarging the range of service the University is rendering to the people of Western Ontario in the field of culture."

RESEARCH AND PUBLICATION

Faculties of Arts, Medicine and Public Health

(The following names are arranged alphabetically).

<u>Name</u>	<u>Research and Publication</u>
Andrus, Paul M.	A new method for the radiographic exploration of the mediastinum and concealed portions of the pulmonary fields. Radiology, July 1934, Vol. XXIII, No. 1, pp. 97-101. The mechanics of respiration. An Analysis of the causes of bronchiectosis.

APPENDIX

CHANGES IN THE FACULTIES

APPOINTMENTS -- 1934-1935

ARTS

Richard A. Barrett, B.A., M.B.A. (Harvard) - Instructor in Business Administration for 1934-1935, vice Lloyd W. Sipherd.

MEDICINE

F. J. H. Campbell, B.A., M.D. (Western), M.R.C.P., F.R.C.P. (C) - Dean of the Faculty.

1935-1936

Donald G. Steer, M.D. (Western) - Instructor in Anatomy.
J. B. McKay, M.D. (Western) - Instructor in Pathological Chemistry.
J. L. Blaisdell, M.D., B.Sc. (Toronto) - Instructor in Pathology and Bacteriology.
T. Howard Clarke, B.A., M.D. (Western) - Instructor in Pathology and Bacteriology.
John A. Lewis, M.D. (Western) - Instructor in Pathology and Bacteriology.
Charles D. Russell, M.D. (Western) - Instructor in Pathology and Bacteriology.
G. S. French, B.A., M.D. (Toronto) - Instructor in Radiology.
J. B. C. Robinson, M.D., M.Sc. (Western) - Fellow in Surgery.

PUBLIC HEALTH

W. S. Dick, M.D., M.Sc. (Western) - Assistant in Pathology and Bacteriology.

PROMOTIONS -- 1935-1936

ARTS

A. Willena Foster, M.A.	From Assistant Professor to Associate Professor of Physics.
Margaret G. Keyes	From Assistant Professor to Associate Professor of Secretarial Science.
Christian Sivertz, M.Sc., Ph.D.	From Assistant Professor to Associate Professor of Chemistry.
Kenneth W. Hunten, M.Sc., Ph.D.	From Instructor to Assistant Professor of Chemistry.
Edward Taube, Ph.D.	From Instructor to Assistant Professor of German.
Hartley M. Thomas, Ph.D.	From Instructor to Assistant Professor of History.
Douglas J. Wilson, Ph.D.	From Instructor to Assistant Professor of Psychology.

MEDICINE

- D. W. Crombie, M.D.C.M., M.R.C.S., L.R.C.P. From Instructor to Assistant Professor of Medicine.
- D. D. Ferguson, M.D. From Instructor to Senior Instructor in Medicine.
- W. J. Brown, M.D.C.M., F.A.C.S. From Instructor to Assistant Professor of Ophthalmology, Otology, Rhinology and Laryngology.
- J. R. Armstrong, M.D. From Instructor to Senior Instructor in Ophthalmology, Otology, Rhinology and Laryngology.
- H. A. Mosser, M.D. From Instructor to Senior Instructor in Pathology and Bacteriology.
- R. A. Waud, M.D., M.Sc., Ph.D. From Associate Professor to Professor of Pharmacology.
- J. K. W. Ferguson, M.A., M.B. From Instructor to Assistant Professor of Physiology.
- P. M. Andrus, M.D., F.R.C.P. From Instructor to Assistant Professor of Radiology.

TRANSFERS -- 1935-1936

MEDICINE

- G. W. A. Aitken, M.D. From Instructor in Medicine to Assistant in Anaesthesia.

RESIGNATIONS -- 1934-1935

ARTS

- Louise C. Wismer, B.A. Instructor in Secretarial Science.
- Joyce M. Plumptre, B.A. Instructor in Physical Education.

MEDICINE

- D. M. Lawrason, M.D., M.Sc. Senior Instructor in Pathology and Bacteriology.
- L. C. Fischer, M.D. Instructor in Pathology and Bacteriology.
- M. W. M. Sloane, M.D.C.M. Instructor in Anatomy.
- W. T. Hollands, M.D. Instructor in Pathological Chemistry.

PUBLIC HEALTH

- A. R. K. Matthews, B.A., M.D. Assistant in Pathology and Bacteriology.

LEAVE OF ABSENCE -- 1934-1935

ARTS

- Lloyd W. Sipherd, B.A., M.B.A. Assistant Professor of Business Administration.
- John D. Ralph, B.A. Assistant Professor of Classics.
- Edward E. Reilly, M.Sc. Associate Professor of Economic and Political Science.
- Helen B. Berdan, M.A. Assistant Professor of Botany.

1934 - 1935
