GENERAL INFORMATION

The University of Western Ontario is composed of three units, the College of Arts (University College), the Medical School and the Institute of Public Health; affiliated with the University are three colleges teaching full four-year Arts courses, viz. Assumption College, Sandwich; Ursuline College, London; Waterloo College, Waterloo; one Junior College teaching the first two years in Arts only, Alma College, St. Thomas; one theological college, Huron College, London.

By the 1908 amendments to the act incorporating the University of Western Ontario, it was stipulated that the government of the University should be absolutely undenominational and be under public, municipal or provincial control or any or all of these.

THE LIBRARIES

The libraries of the University of Western Ontario total about 75,000 volumes, with several thousand pamphlets.

In the Barnett collection are many exceedingly rare volumes, not to be found elsewhere in Canada. The Shakespeariana number about 1,500 volumes and several thousand pamphlets. The Barnett collection also includes a large assortment of rare items in Canadian and American history with extensive selections in folklore, English literature, European history, the drama, church history and other fields.

DEGREES

By its charter the University of Western Ontario may confer degrees in Arts, Medicine, Science, Agriculture, Law, Education and Theology, upon persons who, having complied with the requirements prescribed, are admitted to such degrees by the Senate.

The degrees at present conferred by the University are:

1. Honorary Degrees: *Doctor of Divinity; Doctor of Science; Doctor of Laws.
2. Degrees by examination: Bachelor of Arts (B.A.); Bachelor of Science in Nursing (BSc.); *Bachelor of Divinity (B.D.); Bachelor of Laws (LL.B.); Master of Arts (M.A.); Master of Science (M.Sc.); Doctor of Medicine (M.D.); Diploma of Public Health (D.P.H.); Doctor of Public Health (Dr.P.H.); Certificate of Public Health Nurse (C.P.H.N.); Certificate of Instructor in Nursing (C.I.N.); and Certificate of Hospital Administrator (C.H.A.); *Doctor of Divinity (D.D.)

*The degrees so indicated can be conferred by the University only on the recommendation of an affiliated theological college. The last degree, Doctor of Divinity by examination, is under the jurisdiction of the Board of Theological Colleges of the Church of England in Canada.

REGULATIONS

MATRICULATION

Subjects: Pass Junior

A candidate for Pass Matriculation must write upon the examinations conducted by the Department of Education of Ontario in the following subjects of the Middle School:

Latin (Authors, one paper; Composition, one paper).
English (Literature, one paper; Composition, one paper).
History (British, one paper; Ancient, one paper).
Mathematics (Algebra, one paper; Geometry, one paper).

Any two of:

Greek (Authors, one paper; Composition, one paper).
French (Authors, one paper; Composition, one paper).
German (Authors, one paper; Composition, one paper).
Spanish (Authors, one paper; Composition, one paper).

or

Italian (Authors, one paper; Composition, one paper).
Experimental Science (Physics, one paper; Chemistry, one paper).

or

Agriculture (Part I, one paper; Part II, one paper).

In certain cases foreign students may present themselves for examination in their language instead of Greek or French or German or Spanish or Italian, when the language and the curriculum in that language have been approved by the Senate. The examination in an approved language consists of two papers similar in character to those in English.

NOTE:—Students registered with theological bodies may present First Year Hebrew in lieu of one optional subject.

Subjects: Honour

A candidate for Honour Matriculation must write upon the examinations conducted by the Department of Education of Ontario in one or more of the following subjects of the Upper School:

Greek (Authors, one paper; Composition, one paper).
Latin (Authors, one paper; Composition, one paper).
English (Literature, one paper; Composition, one paper).
French (Authors, one paper; Composition, one paper).
German (Authors, one paper; Composition, one paper).
Spanish (Authors, one paper; Composition, one paper).
History (one paper).
Mathematics (Algebra, one paper; Geometry, one paper; Trigonometry, one paper).
Physics (one paper).
Chemistry (one paper).
Biology (Botany, one paper; Zoology, one paper).

These examinations, both Pass and Honour, are conducted by the Department of Education at various centres throughout the Province of Ontario in June of each year.

Percentages: Pass Junior

A candidate for Pass Matriculation will be allowed to write on one or more papers at a time in any order, and on obtaining at least fifty per cent. of the marks assigned to any paper will be given credit for having passed in such paper and will receive a certificate of such standing.

A candidate for Honour Matriculation will be allowed to write on one or more papers at a time in any order.

Percentages: Honour

In order to secure First Class Honours in a subject a candidate must obtain at one examination at least seventy-five per cent. of the marks assigned to that subject and at least fifty per cent. in each paper of that subject.

In order to secure Second Class Honours in a subject a candidate must obtain at one examination at least sixty-six per cent. of the marks assigned to that subject and at least fifty per cent. in each paper of that subject.

In order to secure Third Class Honours in a subject a candidate must obtain at one examination at least sixty per cent. of the marks assigned to that subject and at least fifty per cent. in each paper of that subject.

A candidate who fails to obtain First, Second or Third Class Honours in a subject under the above regulations, may secure credit for the subject by obtaining at least fifty per cent. on each paper of the subject, not necessarily at one examination.

Such credit in a subject will be accepted by the University as covering the Honour Matriculation requirements with respect to that subject for admission to any faculty.

EQUIVALENT EXAMINATIONS

Certificates of having passed the subjects common to Pass or Honour Matriculation, and any of the following examinations will be accepted *pro tanto*, provided always that the standards of these certificates as to subjects and percentages meet the requirements of this University.

Province of Ontario—The examinations for Second or First Class Entrance to Normal Schools.

Province of Quebec—The University School Leaving examination; Intermediate School Diploma.

Province of New Brunswick—The examination for Superior and Grammar School Licenses (Grades XI and XII).

Province of Nova Scotia—The Junior and Senior Leaving examinations (Grades XI and XII).

Province of Manitoba—Grade XI and Grade XII examinations.

Province of British Columbia—The Intermediate and Senior Grade examinations; Junior and Senior Matriculation examinations.

Province of Prince Edward Island—The First Class Teachers' License examination.

Province of Alberta—Grade XI and Grade XII examinations.

Province of Saskatchewan—The First and Second Class Teachers' examinations; the Senior and Junior Matriculation examinations.

Newfoundland—Associate in Arts examinations.

The local examinations conducted by the University of Oxford and the University of Cambridge may be accepted *pro tanto.*

ADMISSION

All intending students of The University of Western Ontario should secure application blanks for entrance sufficiently early to enable them to return the blanks and their qualifying certificates to the Registrar by Sept. 10th, if possible.

General Course

Candidates will be admitted to the General Course in **Arts** if they present certificates of complete Pass Junior Matriculation or the equivalent, as outlined above (p. 34).

Candidates will be admitted to the first year of the **Pre-medical course** if they present certificates of complete Pass Junior Matriculation as outlined above (p. 34) and a certificate of registration with their provincial licensing board.

Honour Courses: By Honour Matriculation

Candidates presenting Upper School Certificates or the equivalent in at least four subjects, together with complete Pass Junior Matriculation, will be admitted to the Honour Course of the First Year in the Departments in the subjects of which their certificates show that they have obtained at least Third Class Honours (60 per cent.) in each subject.

Honour Courses: By First Year General

Students who have completed the first year of the General Course and who have obtained at least 60 per cent. of the aggregate marks in the work of that year may enter upon the first year of an Honour Course in any Department in which they have obtained 66 per cent. of the aggregate marks in the work of that Department. Candidates who wish to enter the Honour Course in Mathematics and Physics must have obtained 66 per cent. in Trigonometry of the second year as well as satisfied the above requirements.

Students who have obtained 60 per cent. of the aggregate marks in the work of the first year of the General Course will be admitted to the Honour Course in Philosophy and may complete the course in three years.

Honour Courses: By First and Second Years General

Students who have completed the first and second years of the General Course and who have obtained 60 per cent. of the aggregate marks in each year may enter upon the second year of an Honour Course in any subject in which they have obtained 66 per cent. of the aggregate marks in that subject in the first and second years, except in the courses in Mathematics and the Sciences.

Candidates asking admission on certificates other than those mentioned above must present the official evidence of their academic standing to the Registrar at least two weeks before the opening of the session that they wish to attend.

LENGTH OF COURSES

The General Course is a four-year course from Pass Junior Matriculation, but it can be completed in three years of satisfactory work by a student who presents a First Class Certificate obtained at the examinations of the Department of Education of the Province of Ontario; see page 64. The Honour Courses, except as mentioned below, are five-year courses from complete Pass Junior Matriculation or four-year courses from complete Pass Junior Matriculation and Honour Matriculation in four subjects specified for each course. The Honour Courses in Philosophy and in Economic and Political Science require four years from complete Pass Junior Matriculation.

ADVANCED STANDING

From Collegiates

Candidates presenting Upper School certificates in Ancient or Modern Languages or Mathematics, or the recognized equivalents of such certificates, may be credited with the first year in the General Course in those subjects.

From Universities

All applications for advanced standing, except on certificates indicated above, must be accompanied by official certificates from the institution where previous work has been done, and be presented to the Registrar not later than September 10. These official documents must include certificate of honourable dismissal from the institution last attended. No student can register in the University of Western Ontario if he cannot register in the institution from which he wishes to transfer.

SPECIAL STUDENTS

Students who are over twenty-one years of age, though they may not be able to present qualifications for admission to candidacy for degrees, may be admitted to classes in the University, if, in the opinion of the professors in charge, they are qualified to pursue satisfactorily the courses chosen. Such special students must satisfy the professors in regard to regular attendance and attention to the work of their classes. They will not be allowed to advance from year to year in a department without taking the regular examinations. Special students will not be admitted to more than ten credits of work in any year.

The special student who has satisfactorily completed the work of the first year in the General Course will be considered to have secured standing sufficient to permit his proceeding to a degree on the same terms as one who at entrance presents complete Pass Junior Matriculation.

The registration of special students in the Premedical Course will not be permitted.

EXAMINATIONS

General Course

Regular examinations will be held for the General Arts Courses in January and in May. Students must obtain the required percentage, at least 50, both for the first and the second term's work in each course.

Students in the General Courses will be ranked in order of merit in each course in six grades, A, B, C, D, E, F. The minimum for Grade A is 75 per cent. of the marks obtainable; for Grade B, 66 per cent.; for Grade C, 60 per cent.; for Grade D, the minimum passing grade, 50 per cent. A mark that falls in class E, 40 to 49 per cent., entitles the student to a supplemental, subject to the regulations governing supplementals (see page 39). Grade F, less than 40 per cent., indicates a total failure; this means that the course has to be repeated in class.

No student will be admitted to the degree of Bachelor of Arts in the General Course who has not obtained grade D on all the prescribed and elective work of his course and who has not obtained grade C on one-half the credits required for his degree, and grade C on one-half his credits of his senior year.

Honour Courses

The regular examinations for the Honour Courses will be held in May; but where an Honour Course or a definite portion of an Honour Course has been completed by the end of the fall term the instructor may set a final examination on that portion of the work. This examination is to be held during the regular January examination period.

Candidates in the Honour Courses in any department will be ranked in order of merit in that department in four classes; those obtaining 75 per cent. or over of the total number of marks will be placed in Class I; those obtaining 66 per cent. and less than 75 per cent. will be placed in Class II; those who obtain 60 per cent. and less than 66 per cent. will be placed in Class III; those who obtain 50 per cent., the minimum for pass, but less than 60 per cent., will be placed in Class IV; but an average of Class IV over all the honour subjects of the fourth year will entitle the candidate to a General Course and not an Honour Degree. (See page 41, paragraph 6).

Term Work

In all subjects of the General Course, except the Sciences, the ratio of term work marks to examination marks will be as 50 to 100. To pass, a student must obtain 50 per cent. on the whole of a subject, with 50 per cent. in term work and 50 per cent. in examinations. In the Sciences the ratio of term work marks to examination marks is determined by the teaching staff in each subject.

In Honour Courses the ratio of term work marks to examination marks is determined by the teaching staff in the subjects involved.

Term work in a course will not be credited to a student beyond the year in which the course is taken.

SUPPLEMENTALS

A supplemental examination is an examination set on work in which a student has been conditioned. Such examinations will be held in September for those who have been conditioned in the first term or in the second term or in the work of the whole year in any course. (See first paragraph under **Failures**).

A supplemental will be set in May for those candidates

for graduation who have been conditioned in work of the first term of their final year. But these students are subject to the same restrictions as are here set down for all other students.

Supplemental examinations will not be allowed any one student in more than four credits of work.

Students conditioned at the January or May examinations will be expected to attempt to remove their conditions at the supplemental examinations of the September following such failure.

Students whose grade is F will not have the privilege of writing a supplemental. They must repeat the course in class.

No supplemental examination will be allowed in Honour subjects except in cases where Honour subjects are offered by General Course students to complete the necessary credit requirements of their course.

No special supplemental examination will be set within three months of failure.

FAILURES

Any student who at the midyear examinations of any year fails to get credit for one-half of the work for which he or she is registered will be automatically dropped from the University for the second term of that year, but may re-register for the following winter session. Such student will get no credit for the part of his or her work successfully carried in the first term.

General Course

Students who fail to obtain 50 per cent. in the regular or supplemental examinations in a course will not be eligible for re-examination without a further year's attendance on the lectures in the course in which they have failed. **Provision must be made by the student to repeat such course the year after failure no matter what subject or subjects must be postponed to make this possible.**

A student may repeat no single course oftener than once.

No student will be allowed to take more than three credits in excess of the credits required for the year of his course for which he is registered, except on permission of the Academic Standing Committee. For any extra credits in excess of three permitted by action of Academic Standing Committee the student will be charged an extra tuition fee of $6.00 per credit, together with such laboratory and caution fees as pertain to the extra course.

In subjects where each year's work depends directly upon that of a preceding year, no student who has failed may take up the work of the following year. The interpretation and application of this rule rests with the Committee on Academic Standing.

A student, who at the close of the September supplementals, has not obtained standing in at least two-thirds of the credits of his year will not rank as a student of the following year.

A student who for two consecutive years has failed to obtain credit in one-half the work for which he has registered each year will be automatically dropped from the University.

A student who has not been granted complete first year standing may not enter upon any work of the third year; a student who has not been granted complete second year standing may not enter upon any work of the fourth year.

Pre-medical

A student who fails in a science course of the first or second premedical year will be compelled to repeat all the sciences of that year in which he has obtained less than sixty per cent., and he must obtain an average of sixty per cent. in all the sciences prescribed for that year.

Honour Course

A student who, in an Honour Course, for two successive years averages below 60 per cent. in the honour subjects of his course, or who in honours in any one year gets no rating higher than 59 per cent. in the honour subjects of this year, shall be automatically transferred to the General Course, subject to such conditions and limitations as the Committee on Academic Standing may impose.

A candidate who competes for Honours at the examination for the degree of Bachelor of Arts and fails to obtain the requisite per cent. to entitle him to be classed in Honours may, on the recommendation of the Committee on Academic Standing, be awarded a degree in the General Course, it being the option of the candidate to accept the award of such degree or at a subsequent examination compete again for a degree in Honours.

A candidate who fails on the first examination for the degree of Bachelor of Arts will be charged an additional fee of **five dollars** on each subsequent attempt.

ATTENDANCE AT LECTURES

Students who have attended less than 90 per cent. of the lectures in a course **for the term** shall be debarred from taking the regular examinations on that course.

APPEALS

Regulations have been made by the Senate governing appeals by students where such action is necessary. A copy of these regulations can be seen in the Registrar's office should occasion arise.

CONDUCT

No student will be registered in any year, or be allowed to continue in attendance after registration, if his presence is deemed to be prejudicial to the interests of the University. Registration in any year does not entitle a student to registration in a subsequent year.

Students are required to conduct themselves in an orderly manner in the lecture rooms and every other part of the University premises, not only during lectures, but at all times.

The name of the University is not to be used in any connection in any publication without the permission of the University authorities, and no class or group of students is to engage in any public effort as a body representing the University, or any class or other organization within the University, without the permission of the said authorities.

The Dean may suspend any student until such time as his case may be considered by the Administration.

GENERAL

When a student begins a foreign language in the University, no credit towards a degree will be given for the first year of that language unless that year is followed by a second year in the same language.

Preparatory Greek is offered as an option in the first year of the General Course for students who present for entrance complete Pass Junior Matriculation without Greek. Credit towards a degree for this preparatory Greek will not be given unless it is supplemented by at least two years of College Greek, either New Testament or Classical.

No course that is an optional course need be given unless it is elected by at least five students.

THE B.A. EXTRAMURAL COURSE

The Department of Education of Ontario approves of a degree in this course as academic qualification for an ordinary High School Assistant's certificate.

An extramural course is one which a student may pursue without attendance upon classes (except as provided below), and in which he may write the examinations at the periods prescribed for resident students. The conditions for admission to such courses are the same as those required for admission to the intramural general courses (see page 36).

No extramural student is eligible for a degree, unless he has attended classes in this University for two academic years or one academic year and two summer schools, or the equivalent in summer sessions (6).

No student may take intramural and extramural work concurrently.

Extramural courses are of two kinds: (a) complementary extramural courses, and (b) pure extramural courses.

(a) Complementary Extramural Courses

1. A complementary extramural course is the extramural complement of a summer course and must be completed at the May examinations of the winter term following the summer term attended. Only by fulfilling this condition may a student proceed to the more advanced courses offered in the summer or winter terms.

2. Each summer term course, together with its complementary extramural course, is equal in credits to the subject of the B.A. intramural course that corresponds to it in prerequisites and in difficulty.

3. Students are eligible to begin a complementary extramural course when they have passed the examination of the summer term course of which it is the complement.

4. A complementary extramural course has been completed when the student has submitted to the instructor in charge the prescribed exercises, essays, etc., has obtained satisfactory standing therein and has passed the final examination of the course for that year.

(b) Pure Extramural Courses

Pure extramural courses are independent of attendance on classes and are open primarily to students who have completed six summer terms or their equivalent in the B.A. General Course or Honour Courses. Courses in the Sciences, in the elements of any foreign language, and all honour courses not also given as pass courses, may not be included among these courses. Students pursuing pure extramural courses are subject to the same regulations in regard to exercises, essays, examinations, etc., as those pursuing complementary extramural courses.

SUMMER SCHOOL

1. Each year University College offers a summer session in addition to the winter session. This opens in the first or

second week in July and continues thereafter for six weeks, classes being held each day of the week. The curriculum of each subject offered in the summer session varies according to the nature of the subject, from one-third to one-half of the curriculum of the same subject as offered in the winter session (see paragraphs 5 and 6).

2. The Summer School is organized especially in the interest of:

I. Teachers who wish to improve their scholarship.

II. Extramural students who find it difficult to give up a whole year at any one time to satisfy the residence requirements for a degree.

III. Students who have received conditions on the regular university work the preceding session; this is the only exception to the rule that no work in the Summer School will be accepted in lieu of any or all of any year's work in an intramural course.

3. Admission to the Summer School is granted on exactly the same terms as to any winter session.

4. Students who are not candidates for degrees may be admitted to certain courses if they are qualified to pursue these courses profitably. They are expected to conform to the same rules of attendance and of application to the work of the class as are laid down for students who are seeking credit.

5. Each summer term course, together with its complementary extramural course, is equal in content and credits to the subject of the B.A. intramural course that corresponds to it in prerequisites and in difficulty. With the exception noted in the next paragraph, the work of the summer session in each course counts as one-third or one-half of the requirements for the whole year in that course.

The whole of a course listed in the winter session as a one credit course is covered in the summer session in which the course is offered.

6. Since no extramural work is offered in the Sciences, a student desiring to obtain the equivalent of one year's work of the B.A. General Course in a science option must attend two summer sessions.

7. A student who attends six summer sessions and obtains twenty-four credits for work taken therein will be considered to have satisfied the residence requirement demanded for graduation from this University and, if possessed of proper entrance qualifications, may proceed to the degree of B.A. in an extramural course without further attendance.

8. The subjects offered in the Summer School are taken from the courses offered in the winter session to the General Course students and in the first and second years of the Honour Courses leading to Specialist Certificates of the Department of Education of Ontario. No work of the third and fourth years of any Honour Course will be offered in Summer School unless it is also part of the General Course.

Complete information concerning the Summer School and extramural work is contained in the Summer School Announcement and the Bulletin on Summer School and Extramural Work. These may be had by applying to the Registrar or the Director of the Summer School and Extramural Department.

THE M.A. COURSE

Academic Qualification

Candidates must be graduates in Arts of this or some other accredited university with not lower than Second Class Honours (66 per cent.) in the Third and Fourth Years of a full Honour Course, or must have attained to the standing in the General Course indicated in the section below, and subsequently have completed in attendance a year's work such as will in the opinion of the committees supervising their graduate study bring them up to the status of graduates in an Honour Course. This year cannot be counted as satisfying the attendance requirement (mentioned below) imposed on all candidates for the degree of Master of Arts.

Graduates in Arts of this University, who in work of the last two years of the General Course obtained 66 per cent. of the aggregate possible marks, who did not fall below 60 per cent. in more than 6 credits, and who obtained Grade B or higher in the rest of the work required for graduation in their several courses, may become candidates for the degree of Master of Arts, but they cannot hope to obtain the degree in less than two years of graduate study.

Graduates of accredited universities who are candidates for the Degree of Master of Arts in this University must furnish official evidence that they have obtained the Degree of B.A., and that their standing in the third and fourth years of their course corresponds to the standard of the two sections above.

Each candidate must register not later than September 30th; the candidate shall then be placed, by the Council of the Faculty of Arts, under the guidance of two of the professors in whose departments the work to be taken lies, who shall be responsible for conducting the examination and for reporting to the Faculty

upon the result of the examination. The examination shall be given during the annual May examinations.

Attendance

All candidates must be in registered attendance in one of the Colleges of Arts of this University for at least one academic year, under the direction of the Council of the Faculty of Arts, though the work may be spread over two academic years at the option of the candidate.

Standards

All candidates must take a prescribed course, pass an examination therein and obtain at least Second Class Honours (66 per cent.) in it, if it lie in an Honour Department, or 75 per cent. if it lie in the General Course.

A candidate who passes the examinations of the Third and Fourth Years of the major subject or subjects of an Honour Course other than that in which he obtained Honours at graduation, and who obtains Second Class Honours (66 per cent.) therein and whose thesis is satisfactory, may be granted the Master's Degree.

A candidate who at graduation obtained First-Class Honours in each of the Third and Fouth Years of his Honour Course, whose thesis is satisfactory and who obtains First-Class Honours standing in the examination on his prescribed course may be granted the Degree of Master of Arts with Honours.

Thesis

Each candidate shall present a thesis embodying the result of his own investigation. II. Graduate

Daughters of the Empire Overseas Scholarship.

As part of their War Memorial the Imperial Order Daughters of the Empire offer in each Province in Canada a scholarship for post-graduate study in Britain. It will next be awarded to an Ontario candidate in 1929, for study during the academic year 1930-31. The value of the scholarship is $1,400, for one year.

These scholarships are subject to the following conditions:

(1) Candidates may be men or women. They must be British subjects, with at least five years' residence in Canada, and unmarried. Except in the case of a returned soldier, sailor or airman, they must have passed their 19th but not their 27th birthday in October of the year in which they begin their work in Britain. In the case of a returned man, he must not have passed his 33rd birthday in October of the year in which he begins his work in Britain. Each candidate must either hold a degree from a University or College in the Province in which he or she is making application, or be in his or her final year in a course proceeding to a degree.

(2) In each Province a committee of selection will award the scholarship. Other things being equal, preference will be given to a returned man, his sister, son or daughter. The Committee will consider not only the academic record of the candidate, but his or her character, physical fitness and promise.

(3) Applications for this scholarship should be sent, before October 26th, 1929, to the Provincial Educational Secretary, I.O.D.E., Y.W.C.A. Building, Hamilton, Ontario, who will provide additional information about the scholarships.

Federation Scholarship.

Value, one thousand dollars: the scholarship of the Federation of the University Women in Canada, available for study or research work, open to any woman holding a degree from a Canadian university. Preference will be given to candidates who have completed at least one or two years of graduate study and have a definite research in preparation. The award is based on evidence of character and ability of the candidate and promise of success in the subject to which she is devoting herself. Applications must be received not later than February 1st, each year, by the Convener of the Scholarship Committee, Mrs. Douglas Thom, 2220 16th Avenue, Regina, Sask.

The letter of application should contain an account of the applicant's educational training and a statement in full of the plan of study or research she intends to pursue. This information should be accompanied by:

1. A written statement from the President or Acting President of the college or university awarding the degrees held by the applicant to the effect that her application as a suitable candidate is approved.

2. Testimonials as to her health, character, ability and scholarship.

3. Theses, papers or reports of investigations published or unpublished. The Committee cannot assume any responsibility for collecting testimonials for an applicant.

These papers, etc., and letters submitted by the applicant will be returned if postage is sent for that purpose. Confidential letters sent are kept.

A candidate whose work is eminently satisfactory may be appointed for a second year.

The scholarship is payable in two equal instalments on July 1st and January 1st by the Treasurer of the Federation provided the successful applicant sends her address for those dates.

III. Matriculation

UNIVERSITY

I. O. D. E. War Memorial Bursary.

Three hundred dollars a year for four years.

Founded by the Imperial Order Daughters of the Empire, as part of their War Memorial.

Awarded to the candidate in either the Junior or Honour Matriculation examinations who, in the judgment of the Committee, best meets the purpose in view in the foundation of the Bursary. The candidate must be the son or daughter of a killed or totally disabled soldier, sailor, or member of the Air Force. The Bursary is tenable at any university in Ontario. If the holder of the Bursary chooses to attend University College of the University of Western Ontario, he or she will be granted exemption from tuition fees up to fifty dollars a year for four years.

In awarding the Bursary, the committee of selection will take into consideration the war service of the candidate's father, and the circumstances of the family, as well as the candidate's physical fitness and academic promise.

This Bursary will next be awarded to a candidate from Ontario in 1929. Application must be made by March 1, 1929.

Leonard Scholarship

The income of the trust estate of $500,000, created by Lieut.-Col. and Mrs. R. W. Leonard, St. Catharines, Ontario, will be expended in paying the college expenses of selected students at several institutions of Canada, including the University of Western Ontario, for from one to four years. The details of qualification, and the procedure of application for these scholarships may be secured by corresponding with the trustees of the foundation, The Toronto General Trusts Corporation, Toronto, Ontario, or the Registrar of the University of Western Ontario.

Ontario Hockey Association Scholarship

The Ontario Hockey Association has founded a scholarship to be awarded annually on the results of Pass Junior Matriculation or Honour Matriculation (or a combination of the two) held by the Department of Education of Ontario the June preceding the award. The following conditions obtain:

1. The candidate must have played in O. H. A. district hockey the winter preceding the award.

2. The candidate must have complete entrance requirements for the course he intends to pursue.

3. The marks on the candidate's six best papers only will be considered; minimum average for qualifying contestant, 75 per cent.

4. If in any year no candidate reaches the minimum qualifying average no scholarship for that year will be awarded.

In making the award the following points will be considered:

1. Acadamic qualification.

2. Financial need (to be supported by affidavits).

3. Ontario Hockey Association rating as a clean, effective hockey player.

The award shall be made by a committee of three members who shall be the Registrar of the University, the chairman of the Scholarship Committee of the University and a nominee of the Ontario Hockey Association executive, who may or may not belong to the University. The winner of the scholarship will receive $100 in cash, one half in October, the other half in February following: he will receive also free tuition up to seventy-five dollars per year for four years; total value of the scholarship $400. Special application forms for this scholarship should be obtained from the Registrar of the University on or before May 1, each year.

The Ontario Knights of Columbus Scholarships.

The Ontario State Council of the Knights of Columbus has established four scholarships for competition among the Catholic students writing upon the Pass Matriculation examination conducted for the University Matriculation Board by the Department of Education of Ontario. Each of these Scholarships is of the value of $100.00 per year, payable during the currency of the course chosen by the successful student not in excess of four years. Such a student may elect to attend any University in Ontario, or any other University approved by the State Executive, or Osgoode Hall, or any Catholic School of Philosophy in Ontario, provided that, where the University chosen has a Catholic college in federation or affiliation herewith, the student enrol through the said Catholic college; such student registering in the Faculty of Arts of the University of Western Ontario must enrol in either Assumption College, Sandwich, or Ursuline College, London.

Application forms for these Scholarships may be obtained from Mr. T. E. Brown, the State Secretary of the Knights of Columbus, 106 Caroline Avenue, Ottawa, with whom they must be filed on or before May 24th in the year in which the examination is to be completed, and all other communications with respect to these Scholarships must be made to the Secretary from whom further information may be obtained on request.

These scholarships will be awarded to the girl students who write at least six papers, obtain the highest average in the Pass or Honour Matriculation examination, and fulfill the requirements for admittance to the Faculty of Arts, as specified in the calendar of the University of Western Ontario.

Those wishing to enter this competition must make application before May 15th, and must state the centre at which they will write the Matriculation examination.

Address all communications about Ursuline College scholarships to

THE REGISTRAR,
"Brescia Hall," University Sub-Station,
London, Ontario.

PUBLIC SCHOOL INSPECTOR'S CERTIFICATE

By agreement with the Minister of Education a candidate who can present a certificate from the University of Western Ontario that he has fulfilled the requirements mentioned below will be considered to have secured the academic standing necessary for a Public School Inspector's Certificate:

(1) An Honour Degree in Arts in accordance with the present agreement as prescribed for Specialist qualification, or

(2) A Pass (or General Course) Degree in Arts with a standard of 66 per cent. at the final examination for the degree with standing in English for each of the four years.

A candidate shall extend his course over at least four years from Junior Matriculation and he shall attend the University Classes (a) for at least two complete sessions approved by the University, or (b) for at least one complete session, and two complete sessions of the Summer School, or (c) for at least six complete sessions of the Summer School, or the equivalent thereof, with the supervision prescribed by the scheme agreed upon between the Department of Education and the University.

A candidate must also meet the following requirements:

(1) Hold a Permanent First Class Public School Teacher's Certificate.

(2) Have at least seven years' successful experience in the provincial schools of Ontario, five of which must have been in one or more of the public schools; years spent as a principal of a continuation school which had connected with it a public school the work of whose teachers he supervised may be counted in this five.

(3) Pass the professional examination for 'Inspector's Certificate held in July of each year at the Parliament Buildings, Toronto. Details may be obtained from the Department of Education, Toronto.

HIGH SCHOOL ASSISTANTS' CERTIFICATES

I. ORDINARY CERTIFICATES

The academic standing for admission to the course leading to an Ordinary High School Assistant's Certificate is a degree in Arts from a British University, based upon courses approved by the Minister of Education.

II. SPECIALIST CERTIFICATES

Subject to the conditions specified below, the academic standing for admission to the courses leading to High School Specialist Certificates in Classics, Commerce, English and French, English and German or Spanish, French and German or Spanish, English and History, Mathematics and Physics, and Science is satisfied by an Honour degree in Arts from the University of Western Ontario.

1. The courses in the departments specified above shall be the Honour Courses as defined in the Calendar of the University for the year 1920-21. After due notice from the University, the Minister may accept modifications of its courses for Specialist standing. (The Minister has approved of the courses so indicated in the Calendar of the University of Western Ontario for 1929-30, instead of 1920-21. See pages 68 ff).

2. The courses shall extend over at least five years from Pass Matriculation or, as may be determined under the regulations of the University over four years from Honour Matriculation in four subjects.

3. Candidates shall attend for at least two full academic years—the third and the fourth. Under the direction of the University, the rest of the course may be taken by Summer School and extramural study.

4. The standard for each year shall be that prescribed by the University for candidates taking Honour Courses with the additional provision that in the final Honour work of the department in which Specialist standing is sought, the standard shall be at least Second-Class Honours (66 per cent.).

5. The Minister shall have authority to deal with any case not covered by the above. The University shall submit to the Minister a recommendation on any case whose merits justify special consideration.

6. Honour degrees in Arts from other British Universities on courses which are deemed to be the equivalent of those prescribed in the calendars of the four Ontario Universities may be accepted for Specialist standing.

Department of Mathematics and Business

Requirements for Admission—Complete Pass Junior Matriculation and Honour Matriculation in English, Physics, Mathematics (Algebra, Geometry, Trigonometry), and either French or German.

This course is designed for students who plan to become actuaries. It will prepare them for three of the four examinations required for Associateship in the Actuarial Society of America. The first of these may be taken during the first or second year, or along with the second examination during the third year; the third may be taken during the fourth year. These examinations are held in April, and may be written in London.

Students may elect this course only after consultation with the Head of the Department of Mathematics.

Note—This course does *not* satisfy the academic requirements for the Mathematics and Physics Specialist Certificate of the Department of Education of Ontario.

DESCRIPTION OF COURSES

DEPARTMENT OF APPLIED BIOLOGY

University College

JOHN D. DETWILER, PH.D., Associate Professor

400. **Arthropoda**: a study of the Phylum with particular reference to groups of economic importance. Elementary morphology, taxonomy and post-embryonic development of the insects will receive special consideration.

2 lectures and 6 laboratory hours per week: 2½ credits.
Prerequisite: Zoology 200.

402. **Hexapoda**: a continuation of the morphological and taxonomic study of the insects, together with their general histology, physiology and embryology. An insect collection will be required and credit will be given for it on the course.

2 lectures and 4 laboratory hours per week: 2 credits.
Prerequisite: Applied Biology 400.

404. **Soil Science**: the composition and properties of soil and their relation to crop growth, fertilizers and soil fertility. The course is designed to make the student think in terms of soil management and plant production.

2 lectures and 4 laboratory hours per week: 2 credits.
Prerequisite: Botany 100, Chemistry 100, Geology 100.

406. **Plant Culture**: a fundamental course in the care and development of plants. The course is intended to prepare students for the investigation of plant-cultural problems related to vegetable gardening, floriculture, fruit growing and field crops. This course must either be accompanied or preceded by Applied Biology 404.

2 lectures and 4 laboratory hours per week: 2 credits.
Prerequisite: Botany 100 and 200.

Courses Leading to the Degree of M.A.

A selection from the following courses will be offered from time to time to suit the qualifications and objectives of the candidates:

500. **Freshwater Biology.**
501. **Insect Ecology and Physiology.**
502. **Economic Entomology.**
508. **Genetics.**

DEPARTMENT OF BOTANY

REV. T. A. MACDONALD, M.A.,	Professor

Students taking work in this department will be required to make a deposit of two dollars with the Bursar to cover supplies and breakages. A refund of any surplus will be made at the end of the college year.

10. **Introductory Botany** for General Course students; a course dealing with the general principles of Botany.

2 lectures and 4 laboratory hours per week: 4 credits.

Prerequisite: complete college entrance requirements.

Text-book: Smith, Overton, etc., *A Text-book of General Botany.*

11a. **Elementary Botany** for Medical students; a course dealing with the general principles of Botany.

2 lectures and 4 laboratory hours per week, first term; 2 credits.

Prerequisite: complete college entrance requirements.

Text-book: See Botany 10.

20. **Plant Ecology and Physiology** for General Course students; a course dealing with the relationship between plants and their surroundings, and with some of the functions of the organs of plants.

2 lectures and 4 laboratory hours per week; 4 credits.

Prerequisite: Botany 10.

Text-book: Coulter, Barnes and Cowles, *Text-book of Botany, Vols. I and II.*

30. **Cryptogamic Botany** for General Course students; a course dealing with the Algae, Fungi, Mosses and Ferns.

2 lectures and 4 laboratory hours per week; 4 credits.

Prerequisite: Botany 20.

Text-book: Coulter, Barnes and Cowles, *Text-book of Botany, Vol. I.*

*On leave of absence, 1928-9.

40. **Phanerogamic Botany** for General Course students; a course dealing with the morphology, classification, and anatomy of selected groups of the Seed Plants.

2 lectures and 4 laboratory hours per week; 4 credits.

Prerequisite: Botany 30.

Text-books: Coulter, Barnes and Cowles, *Text-book of Botany, Vol. I.*
Strasburger, *Text-book of Botany.*

Honour Courses

100. **Introductory Botany** for Honour Biology, Honour Science, and B.A., M.D. students; a course dealing with the general principles of Botany illustrated by selections from the whole plant kingdom.

2 lectures and 4 laboratory hours per week; 2 credits.

Prerequisites: full entrance requirements for the Honour Biology, Honour Science, or B.A., M.D. courses.

Text-book: Smith, Overton, etc., *A Text-book of General Botany.*

200. **Phanerogamic Botany** for students in the Honour Biology, Honour Science and B.A., M.D. courses; a course dealing with the evolution, external morphology and anatomy of the Spermatophyta.

2 lectures and 6 laboratory hours per week: 2½ credits.

Prerequisites: Botany 100 and Zoology 100.

Text-books: Coulter, Barnes and Cowles, *Text-book of Botany.*
Gray, *New Manual of Botany.*

300. **Cryptogamic Botany** for students in Honour Biology, Honour Science and the B.A., M.D. courses; a course dealing with the morphology, classification and evolution of the Algae, Mosses and Ferns.

2 lectures and 6 laboratory hours per week: 2½ credits.

Prerequisites: Botany 200 and Zoology 200.

Text-books: Coulter, Barnes and Cowles, *Text-book of Botany, Vol. I.*
Strasburger, *Text-book of Botany.*

301. **Plant Physiology** for students in Honour Biology and Honour Science; a course dealing with the physiology of plants.

2 lectures and 6 laboratory hours per week: 2½ credits.

Prerequisites: Botany 200 and Zoology 200.

Text-book: Livingston, *Palladin's Plant Physiology.*

400. **Historical Biology.** See Zoology 400.

401. **Ecology and Taxonomy** for Honour Biology and Honour Science students; a course dealing with the principles of ecology, and the classification of the Spermatophyta.

2 lectures and 6 laboratory hours per week: 2½ credits.

Prerequisites: Botany 300 or 301, Zoology 300.

Text-books: McDougall, *Plant Ecology.*
Coulter, Barnes and Cowles, *Text-book of Botany, Vol. II.*

402. **Phytopathology and Mycology** for Honour Biology and Honour Science students; a course dealing with plant diseases and the classification, morphology and structure of fungi.

2 lectures and 6 laboratory hours per week: 2½ credits.

Prerequisites: Botany 300, Zoology 300.

Text-books: Stevens, *Plant Disease Fungi.*
Duggar, *Fungous Diseases of Plants.*

403. **Plant Anatomy** for Honour Biology students; a course dealing with the cytology and anatomy of the Pteridophyta and Spermatophyta.

2 lectures and 6 laboratory hours per week: 2½ credits.

Prerequisites: Botany 300, Zoology 300.

Text-books: Strasburger, *Text-book of Botany.*
Jeffery, *Anatomy of Woody Plants.*

404. **Bacteria, Yeasts and Molds:** a course dealing with the culture, classification and life histories of selected groups of fungi.

2 lectures and 6 laboratory hours per week: 2½ credits.

Prerequisite: Botany 402.

Text-books: Buchanan, *Bacteriology.*
Jordan, *General Bacteriology.*

406. **Advanced Cytology and Histology:** a continuation of 403, including the technique in connection with the preparation of materials for cytological and histological studies.

2 lectures and 6 laboratory hours per week: 2½ credits.

Prerequisite: Botany 403.

Text-book: Chamberlain, *Methods in Plant Histology.*

Courses Leading to M.A.

501. **Applied and Economic Botany:** a course dealing with the recognition of plant foods, fibres, adulterants, poisonous products, weed seeds, etc.

1 lecture and 6 laboratory hours per week: 2 credits.

Text-books and References: Hanauseck, *Microscopy of Technical Products.*
Winton, *Microscopy of Vegetable Foods.*
Kraemer, *Applied and Economic Botany.*
Sargent, *Plants and their Uses.*
Brown, *Forest Products, their Manufacture and Use.*

502. **Plant Genetics:** an elementary course of lectures, discussions, and readings on plant breeding and associated topics: 2 credits.

Text-book: Sinnot and Dunn, *Principles of Genetics.*
References: Coulter and Coulter, *Plant Genetics.*
Underwood, *New Creations in Plant Life.*
Punnett, *Mendelism.*
De Vries, *Species and Varieties—Their Origin by Mutation.*
Coulter, *The Evolution of Sex in Plants.*
Articles in various Magazines:—Genetics, etc.

503. **Plant Geography:** a course of discussions and readings on the distribution of plants, and related topics: 2 credits.

References: Schimper, *Plant Geography.*
Hardy, *The Geography of Plants.*
The National Geographic Magazine.
Campbell, *Plant Geography.*
Encyclopaedia Britannica.

504. **Advanced Phytopathology:** a course dealing with the symptoms, causes and control of the diseases of economic plants.

27. **Introduction to Business Organization:** this course is prescribed for Secretarial Science students.

1 hour per week: 1 credit.

Text-book: Marshall and Wiese, *Modern Business.*

30. **Accounting and Bookkeeping:** this course is prescribed for Secretarial Science students.

2 hours per week: 2 credits.

Text-book: Jackson, Sanders and Sproul, *Bookkeeping and Business Knowledge.*

39. **Commercial Arithmetic:** interest, discount, commission, duties and customs, stocks and investments, partnership settlements, partial payments, equating or averaging accounts, compound interest, exchange, practical measurements and the metric system.

2 hours per week: 2 credits.

107. **Introduction to Business Organization:** an introductory course designed to acquaint the student with the basic general principles underlying business administration. The work begins with a brief survey of the rise of modern industry and trade with particular emphasis on the significance of the Industrial Revolution. The student is then introduced to the main functions of present-day industry, such as manufacturing, marketing, finance, accounting, personnel, etc. The point of view is that of the business administrator; hence attention is given to such things as the form of the business unit, organization, leadership, control, risk, and scientific management.

1 hour per week: 1 credit.

Text-book: Marshall and Wiese, *Modern Business.*

109. **Commercial Geography:** a study of the geography, resources, industries, markets and trade routes of the principal countries of the world from the point of view of the importance of these countries as sources of the imports of Canada and markets for its exports. Place geography: origin and disposition of the chief commodities of commerce; the effect of climate and of relief on production; productivity of the soil; capacity of the different races; promotion and location of industries; industry in temperate and tropical countries; character of manufacturing

communities; development of lines of communication and of transportation. Each student is required to carry on a specific amount of research in some particular field.

1 hour per week: 1 credit.

Text-book: Huntington and Williams, *Business Geography*.

200. **Accounting Principles:** principles underlying modern bookkeeping and accounting, the use of fundamental books, preparation and analysis of financial statements, application of principles to problems of capital, revenue, maintenance, cost accounting, etc.

3 hours per week: 3 credits.

Text-book: Cole, *Fundamentals of Accounting*.

201. **Marketing:** the object of this course is to introduce the student to the principles and methods of marketing merchandise, and to afford training in the analysis of typical selling problems. The first half of the course deals with methods of marketing consumer goods; consumer buying habits and motives; and wholesale distribution. The work of the second half-year involves methods of marketing industrial goods; analysis of typical problems on selling policy which involves sales management, trade mark, brand, price, advertising and sales correspondence policies. The problem method will be used as the basis of study, supplemented by collateral readings on the principles of marketing. Written reports on assigned problems will be required at frequent intervals.

3 hours per week: 3 credits.

Text-book: M. T. Copeland, *Problems in Marketing*.

300. **Industrial Accounting:** this course examines the common methods of ascertaining prime costs and burden costs, and of distributing the latter over various products. The choice of methods and their application to particular types of industrial enterprises are considered, together with the relations of the cost records to the production planning. Attention is given to the content and form of operating reports for the guidance of various responsible officials. Each student is required to do practical field work in devising accounting systems, and opportunities are given to gain personal experience through constructive work in industry.

3 hours per week: 3 credits.

Text-books: Sanders, *Problems in Industrial Accounting*.

MODERN SCIENCE—AN INTRODUCTORY READING PROGRAM

FOR a layman to rush in where the expert fears to tread, and to suggest a course of reading in modern science, may well be dangerous business. Yet a report of a personal experiment may have a certain usefulness for some alumni who find themselves equally in need of enlightenment in this field.

We do not need the technocrats to emphasize the importance nowadays of the scientific outlook. It is a view we cannot afford to neglect if we are to understand contemporary life and thought in a new world of Mendelian inheritance, relativity, Freudian psychology, internal secretions, an expanding universe, ultramicroscopic bacteria, and what not. We are lost unless we attempt to arrive at some understanding as to what it is all about. What may we accept as reasonable and true; what is debatable or merely sensational?

The obvious remedy, of course, is study. This, unfortunately, is a remedy more easy for most of us to prescribe than to follow, since we cannot turn back the wheel and enter college once more. The only recourse for many of us lies in systematic reading programs which can at least give some conception of what the philosophers and scientists are thinking and discovering.

As far as the writer is concerned, it took some time even to realize the deficiencies in his undergraduate program and to recognize the existence of thrilling and practically unknown fields of study. But when the question arose as to what was to be done about it, there seemed to be no guides. One had to feel around, take what was offered, and judge for oneself whether or not the statements available were reasonable and sound. Fortunately we have today many efforts to set forth scientific conceptions in terms not too technical for the uninitiated, though the question of selecting a proper presentation remains.

The following list can be taken simply as one person's solution—the books that stand out. Others may be just as good or better, but for one adventurer these seem reasonably to have filled the bill. The list does not necessarily represent the order in which they were read; rather it must be taken as indicating a desirable program to be followed.

MAN AND HIS UNIVERSE. *By John Langdon Davies.* Harper & Bros., New York, 1930. 341 p.

It is always difficult to suggest the first book, particularly in such a field as the sciences. There are so many ways one might approach the program. This general survey, however, seems to cover the case rather well. It sketches the fundamental conceptions of science from ancient times to the present. Popular in style, it is far from difficult to read, and yet it suggests the philosophical problems of modern science. The chapters which deal with the long survival of Aristotle's limited conceptions and the heavy hand of medieval thought, which placed the earth at the center of the universe and saw science in terms of astrology and alchemy, form a valuable basis for proper appreciation of modern progress.

THE ADVENTURE OF SCIENCE. *By Benjamin Ginzburg.* Simon & Schuster, New York, 1930. 487 p.

A poor name for a good book. The author carries the survey of the field a step farther in a series of careful studies of leaders in scientific thought, from Pythagoras to Einstein, describing clearly their essential contributions. The concluding chapters on Einstein and the atom and quantum theory are especially good—at least in the view of one layman.

MICROBE HUNTERS. *By Paul de Kruif.* Harcourt, Brace & Co., New York, 1926. 358 p.

What the previous author did for science as a whole, Paul de Kruif, a graduate of the University's Medical School, does for bacteriology and the new discoveries of medicine in this book. Racy and sometimes flippant in style, his presentations of significant discoveries which have added years to human life are careful and sound. Again the biographical method

is followed, beginning with Leeuwenhoek, whose discovery of the microscope led to the recognition of bacteria.

THE NATURE OF THE WORLD AND OF MAN. *By sixteen members of the University of Chicago Faculty* (H. H. Newman, editor). The University of Chicago Press, 1927. 562 p.

A few years ago a company of scholars at the University of Chicago published this excellent general survey of modern science. The seventeen chapters comprise reviews of the latest conceptions in astronomy, geology, physics, chemistry, biology, bacteriology, botany, evolution, heredity, embryology, physiology, and psychology. It is perhaps inevitable that some of the authors are more interesting than others—more successful in presenting their material—but the book as a whole provides a very readable summary. It is an outcome of a survey course at Chicago, first projected by Ernest H. Wilkins, now president of Oberlin College, and carried out under the direction of H. H. Newman, the editor of this volume.

THE SCIENCE OF LIFE. *By H. G. Wells, Julian Huxley, and G. P. Wells.* Doubleday, Doran & Co., New York, 1931. 2 v. 1514 p.

With the effort of the Chicago scholars in mind, one can turn for a fuller treatment in certain fields to this work of Wells and his collaborators. It fills two volumes, 1,500 pages in all, and must be regarded as a far sounder piece of work than the *Outline of History*, which, stimulating and provocative as it is, is full of Wells' personal prejudices. Wells was a scientist himself before he became a writer; Julian Huxley ranks high among the younger British scientists; and the younger Wells is likewise a trained scientist. This "tripartite author," as Wells calls the group, has apparently functioned well; this is shown by the fact that the book is used as a textbook in several institutions. Specialists in different fields may find occasional opportunities for criticism, but in general the treatment is dependable as well as entertaining, though Wells himself breaks through occasionally to indulge in some characteristic observations, or to tilt with gusto against the anti-evolutionists. But the great merit of this book is its presentation of the various sciences as a unit, emphasizing the interrelation of all fields of knowledge. The many illustrations are distinctly helpful. Certainly there is no single book which comes so near serving the purpose for the college graduate who wishes to bring his ideas of modern scientific progress up to date.

THE UNIVERSE AROUND US. *By Sir James Jeans.* Revised edition, The Macmillan Co., New York, 1931. 351 p.

THE MYSTERIOUS UNIVERSE. *By Sir James Jeans.* Revised edition, The Macmillan Co., New York, 1930. 163 p.

Since Wells and his collaborators are dealing with life, they omit astronomy and physics. Yet the problems set by relativity, and the new conceptions of the atom and their relation to our ideas of the universe, are as interesting to us today as were the questions set by the Darwinian theory of evolution to our parents. Sir James Jeans' *The Universe Around Us* is a remarkably clear statement of the present-day conceptions in this field. He sets forth the breath-taking discoveries of the modern astrophysicist in terms that are comprehensible and, whenever possible, indicates the processes by which the scientists have reached their conclusions. In a second volume, *The Mysterious Universe*, Jeans suggests some of the philosophical implications of the new theories of matter and offers his own fundamental interpretation in terms of what might be called a "mathematical mysticism."

THE NATURE OF THE PHYSICAL WORLD. *By A. S. Eddington.* The Macmillan Co., New York, 1929; Reissued 1933. 361 p.

A. S. Eddington deals with the same general conceptions from the point of view of the physicist rather than the astronomer. He undertakes the very difficult task of translating mathematical abstractions into concrete terms for those of us who are not adepts in higher mathematics. While his chapters are not easy reading, here is a sincere and impressive effort to answer the questions we are asking about relativity, space-time, the quantum theory, and the theory of indeterminacy, and to give us at least a glimpse of the ideas which underlie the new physics. Bertrand Russell says, in reference to Eddington's interpretation of the quantum theory, "He conveys more of it to the nonmathematical reader than I should have supposed possible." In his concluding chapters, Eddington, like Jeans, sets forth his own mystical interpretation of the fundamental truth behind these conceptions.

THE SCIENTIFIC OUTLOOK. *By Bertrand Russell.* W. W. Norton & Co., New York, 1931. 277 p.

This is a convenient summary of science by a mathematical philosopher. Russell discusses the characteristics and limitations of the scientific method, scientific metaphysics, religion, the technique of science, and, in a concluding section, his ideas of a scientific society. Not the least interesting pages are his criticisms of Jeans' and Eddington's dif-

302. **Finance Problems:** the course in Finance Problems is based on the financial courses in the Department of Economic and Political Science, and will illustrate the practical application of finance principles. The course will be handled entirely by the discussion of problems which have actually occurred in the experience of business concerns, and written reports will be required from time to time.

3 hours per week: 3 credits.

Text-book: C. E. Fraser, *Problems in Finance.*

305. **Industrial Management:** this course will comprise a broad survey of the field of management, particularly the management of manufacturing concerns. It is the aim of this course to train students in effective methods of approach to administrative and executive problems related to production. Necessary descriptive background is drawn largely from the manufacturing industries. Excursions to view methods at first hand form part of the course. Problems arising in the location of an enterprise, the design and construction of buildings, the selection and arrangement of equipment, the procurement of the material, and labour requirements, are considered during the first half-year. In the second half-year the course deals primarily with the conduct and control of production. Executive organization, the services of functional specialists, labour relations, production control methods, and the uses of cost accounting are among the topics considered.

3 hours per week: 3 credits.

Text-book: Schell and Thurlby, *Problems in Industrial Management.*
References: Lansburgh, *Industrial Management.*
Taylor Society Bulletins.

309a. **Business Papers:** receipts, releases, promissory notes, chattel notes, lien notes, instalment notes, drafts, bills of exchange, orders, due bills, deposit slips, cheques, bank drafts, draft requisitions, deposit receipts, bank pass books, bills, invoices, credit invoices, accounts, monthly statements, warehouse receipts, bills of lading, freight bills, proxies, powers of attorney, agreements, bonds, debentures, leases, instalment scrips, stock certificates, stock transfers.

3 hours per week: 1½ credits.

309b. **Commercial Law:** this course embraces a general and particular outline of the principles of contract law from the elements to the remedies for breach, and includes special lec-

tures on such phases of Commercial Law as agency, banking and bills of exchange, partnerships, corporations and foreign judgments.

3 hours per week: 1½ credits.

Text-books: Anson, *Contracts.*
Falconbridge, *Banking and Bills of Exchange.*
References: Falconbridge, *Sale of Goods.*
Russell, *Bills.*
Pollock, *Partnership.*
Willis, *Contracts.*
Dominion and Provincial Statutes.

400. **Advanced Accounting and Auditing:** analytical power, breadth of view, initiative and resourcefulness, with regard to accounting, are cultivated in this course. The work undertaken covers dissolutions of partnerships, combination and consolidation of corporations, bankruptcy, settling of estates, conducting business in two currencies simultaneously, purchase and sale of special types of securities, etc. The course also deals with auditing from the stand-point of the treasurer, controller, or auditor in charge of the accounts of a commercial or industrial concern.

3 hours per week: 3 credits.

Text-book: Sweet-Hanson, *Problems in Advanced Accounting and Auditing.*
Reference: Montgomery, *Audit Procedure.*

401. **Sales Management:** a survey of the problems of the sales manager, such as those involving the sales organization, sales research, policies relating to the product, distribution policies, prices and terms of sale, methods of selling, management of the sales force, delivery policies, credits, collections and control of sales operations.

3 hours per week: 3 credits.

Text-books: Tosdal, *Problems in Sales Management.*

403. **Insurance Problems:** this course is for actuarial students and covers the organization, and financial and sale phases of Life Insurance Companies. The course will be handled entirely by Insurance Company executives. Given in 1929-30.

2 hours per week: 2 credits.

409. **Executive Problems:** the aim of this course is to correlate the work given in the specialized courses of the previous years, and to show the interdependence between different functional departments of business, and to suggest the solution of

problems affecting the broad general policy of an operating company. The approach of the course is that of a general executive who gives his attention to broad policy problems that touch all the departments of the business. One hour each week is reserved for visits from executives who will present their current problems for discussion and for written reports. Two hours a week will be devoted to the study and discussion of available case problems dealing with the production, marketing and financial aspects of business.

3 hours per week: 3 credits.

Text-book: Harvard Business Reports.

491. **Research:** before graduation the student must submit a report covering the constructive and finished investigation of a major problem, chosen in consultation with the Head of the Department and the manager under whose guidance the investigation will be made. Class hours are arranged so as to give the student as much uninterrupted time as possible for this work.

3 credits.

Students taking work in this department will be required to make a deposit of five dollars per laboratory course at the time of registration to cover breakages. A refund of any remainder will be made through the office of the Executive Seccretary at the end of the college year.

11. **General Chemistry:** a course of experimental lectures and laboratory work upon the metallic and non-metallic elements and their principal compounds, and an introduction to the fundamental laws of chemistry. The laboratory work consists of experiments covering the principles discussed and demonstrated in the lectures. Optional for first-year General Course Arts students and prescribed for first-year Premedical students.

2 lectures, 1 recitation and 4 laboratory hours per week: 4 credits.

Text-books: Deming, *General Chemistry* (Wiley).
Deming and Arenson, *Laboratory Manual in General Chemistry* (Wiley).

22. **Qualitative and Quantitative Analysis:** a laboratory course covering the principles of Qualitative and Quantitative Analysis; the laboratory work is largely individual in character, each student being required to work out a sufficient number of unknown compounds to ensure a working knowledge of the subject. Optional for second year students in the General Course.

1 lecture, 5 laboratory hours per week: 3 credits.

Prerequisite: Chemistry 11.

Text-books: Deming, *Laboratory Manual in Analytical Chemistry* (Wiley).
G. McP. Smith, *Quantitative Analysis.*

22a. As in Chemistry 22. Prescribed for second year Premedical students.

1 lecture, 4 laboratory hours per week: 1½ credits.

33. **Organic Chemistry:** a course of lectures dealing with the aliphatic and aromatic hydrocarbons and their derivatives; the carbohydrates, proteins and alkaloids. The laboratory work parallels the lectures and consists of the preparation and identification of a few of the more common carbon compounds. Optional for third-year students in the General Course and prescribed for second-year Premedical students.

2 lectures, 3 laboratory hours per week: 3 credits.

Prerequisite: Chemistry 11.

Text-books: Lowy and Harrow, *Organic Chemistry* (Wiley).
Burns, *Laboratory Manual in Organic Chemistry*.

Honour Courses

101. **Inorganic Chemistry:** for Honour Biology, Honour Chemistry, Honour Geology, Honour Science and B.A., M.D. students.

A course of experimental lectures and laboratory work in General Chemistry.

2 lectures, 1 recitation and 5 laboratory hours per week: 4 credits.

202. **Second Course in Chemistry:** for Honour Biology, Honour Geology, Honour Science and B.A., M.D. students.

1 lecture and 5 laboratory hours per week: 3 credits.

Text-books: Chapin, *Second Year College Chemistry*.
Chapin, *Exercises in Second Year Chemistry* (Wiley).

221. **Advanced Inorganic Chemistry:** for Honour Chemistry students.

1 lecture, 3 laboratory hours per week: 2 credits.

222. **Second Course in Chemistry:** for Honour Chemistry students.

2 lectures and 8 laboratory hours per week: 5 credits.

Text-books: Chapin, *Second Year College Chemistry*.
Chapin, *Exercises in Second Year Chemistry* (Wiley).

303. **Organic Chemistry:** a course of lectures and laboratory exercises dealing with the more common carbon compounds.

Prescribed for third-year Honour Science, Honour Biology, B.A., M.D., and Honour Chemistry students.

2 lectures, 3 laboratory hours, 1 recitation hour per week: 4 credits.

Prerequisite: Chemistry 101.

Text-books: Porter, *Organic Chemistry.*
Chamberlain, *Organic Chemistry* (Blakiston).

306. **Biochemistry:** laboratory course supplemented by lectures and demonstrations; optional for students in the Honour Science courses.

210 hours, 4 credits.

Prerequisites: Botany 100, Zoology 100, Chemistry 101, 202, 303. Given at the Medical School.

334. **Elementary Physical Chemistry:** a systematic derivation of the principles which govern reactions in chemical systems. The treatment will be more rigid and detailed than in Chemistry 404, emphasis being placed where most useful to the specialist in Chemistry; for third-year Honour Chemistry students.

2 lectures, 6 laboratory hours per week: 5 credits.

Text-book: Millard, *Physical Chemistry for Colleges.*

404. **Physical Chemistry:** a descriptive and non-mathematical treatment of the principles which govern reactions in chemical systems, with discussion of their application in relation to the other branches of science and the industries; for fourth-year Honour Science, fourth-year Honour Biology and optional for fourth-year students in the General Course.

2 lectures, 3 laboratory hours per week: 3 credits.

Prerequisite: Chemistry 11, 22, 33.

Text-book: Walker, *Introduction to Physical Chemistry.*

443. **Advanced Organic Chemistry:** for fourth-year Honour Chemistry students.

2 lectures and 3 laboratory hours per week: 3 credits.

Text-books: Thorpe and Whitely, *Organic Chemical Analysis* (Longmans, Green).
Read, *Organic Chemistry* (Bell).

444. **Advanced Physical Chemistry:** chiefly the kinetic theory, the electrochemistry of solutions and the phase rule, with emphasis on the thermodynamic foundation of the principles

encountered. Training in the practical use of the principles will be given by means of problem assignments; for fourth-year Honour Chemistry students.

2 lectures and 4 laboratory hours per week: 4 credits.
Prerequisites: Chemistry 334.

Text-books: Nernst, *Theoretical Chemistry.*
Lewis, *System of Physical Chemistry.*
Taylor, *Treatise on Physical Chemistry.*
Eucken-Jette-LaMar, *Fundamentals of Physical Chemistry* (McGraw-Hill).

445. **Research:** special topics and laboratory methods in the field of the student's individual interest. The second term will be devoted to a research problem, upon which a report will be required as a senior thesis. For fourth-year Honour Chemistry students.

9 hours per week: 5 credits.

448. **Seminar:** presentation of papers on topics selected from the current chemical journals, dealing with the more recent and fundamental developments of the science; for fourth-year Honour Chemistry students and desirable for all students majoring in Chemistry.

1 meeting per week: 1 credit.

Courses Leading to M.A.

551, 552, 553 or 554. Advanced work in Inorganic, Analytical, Organic or Physical Chemistry.

LATIN

Each student in any of the Latin courses is required to have at least one of the following Latin grammars: Bennett, Allyn and Bacon, Boston; Allen and Greenough, Ginn & Co., New York; Gildersleeve and Lodge, Heath & Co., Boston; and an Elementary Latin Dictionary, American Book Co.

Pass students may find Allen's Elementary Latin Grammar (Clarendon Press) sufficient.

10. Caesar, *De Bello Civili I;* Horace, *Odes; I*, 1, 4, 5, 8, 9, 10, 14, 21, 22, 24, 29, 31, 37, 38; *II*, 3, 10, 13, 14, 16; *III*, 1, 2, 5, 7, 9, 13, 18, 23, 29, 30; *IV*, 3, 5, 7.

3 hours per week: 3 credits.

Prerequisite: Middle School Latin.

Text-books: Peskett, *Caesar's Civil War, Book I* (Cambridge).
Page, *Horace, Odes*, Macmillan (Elementary Classics).
Allen, *Second Latin Exercise Book* (Oxford).

*On leave 1928-9.

20. Livy, *XXXI-XXXV;* Virgil, *Aeneid VI;* selected Latin poetry; composition; sight translation.

3 hours per week: 3 credits.

Prerequisites: Latin 10 or Upper School Latin.

Text-books: Sidgwick, *Virgil, Aeneid VI* (Macmillan).
A. C. B. Brown, *The Shorter Livy* (Bell).
Rieu, *A Book of Latin Verse* (Oxford).
North and Hillard, *Latin Composition* (Copp, Clark).

30. Cicero, *De Amicitia;* Catullus; Plautus, *Rudens;* Terence, *Andria;* lectures on the literature and the history of the Republic; composition; sight translation.

3 hours per week: 3 credits.

Prerequisite: Latin 20.

Text-books: E. A. Sonnenschein, *T. Macci Plauti Rudens* (Oxford).
E. H. Sturtevant, *P. Terenti Afri Andria* (American).
E. P. Simpson, *Select Poems of Catullus* (Macmillan).
E. W. Bowen, *Cicero's De Amicitia* (Heath).
Auden, *Latin Composition* (Blackwoods).

40. Cicero, *Letters;* Pliny, *Letters;* Tacitus, *Agricola;* Virgil, selections from the *Bucolics* and *Georgics;* lectures on the literature of the Ciceronian and Augustan periods; composition; sight translation.

3 hours per week: 3 credits.

Prerequisite: Latin 20.

Text-books: Abbott, *Cicero's Letters* (Ginn).
Westcott, *Pliny's Letters* (Allyn, Bacon).
Page, *Virgil, Bucolics and Georgics* (Macmillan).
Auden, *Latin Composition* (Blackwoods).

45. St. Augustine, *De Fide;* with the consent of the instructors concerned, theological students in affiliated colleges may substitute the above for an equivalent amount of the prescribed authors in Latin 30 or 40.

1 hour per week, 1 term: ½ credit.

Honour Courses

110. Livy, *XXI-XXX* (read intensively); Sallust, *Jugurtha;* Virgil, *Aeneid VI;* selected Latin poetry; composition; sight translation.

4 hours per week; 4 credits.

Prerequisite: Latin 10 or Upper School Latin.

Text-books: C. Georgin, *Tite-Live, Histoire, Troisième Decade* (Hatier).
W. C. Summers, *C. Sallusti Crispi Jugurtha* (Cambridge).

DEPARTMENT OF GEOLOGY

J. W. RUSSELL, M.A., Professor
G. H. REAVELY, M.A., Instructor

20. An Introductory Course in **General Geology and Meteorology:** (1) structure of the earth as a whole, and its astronomic relations to the other heavenly bodies; description and classification of the rocks of the lithosphere; rock weathering and soils; the common ores and their occurrence; erosion and deposition of sediments; fossils local to southwestern Ontario, and their interpretation; topographical features of the earth; an outline of the geological time: (2) accumulation of sediments, and deformation; mountain building, metamorphism and structural features resulting; volcanism; rivers, lakes and coastal features; glaciers and glacial deposits; a study of the Pleistocene ice age with reference to Ontario; the atmosphere, its composition, extent and circulation, the meteorological elements and weather forecasting; ocean currents and tides.

Laboratory work will consist in identifying specimens of minerals, rocks and fossils with field trips to various limestone quarries and for the interpretation of the glacial features of Ontario.

4 hours per week: 3 credits.

Prerequisite: Middle School Chemistry, or Chemistry 11.

Text-books: Pirsson and Schuchert, *Introductory Geology.*
Milham, *Introductory Meteorolgy.*

30. **Structural and Historical Geology:** (1) principles of earth movements, deformation, faulting, mountain building and peneplanation; elevation and depression; volcanism and deposition of ores; classification of ores and ore deposits: (2) study of fossil animal and plant life; fossils as indications of the timemarkers; historical evolution of America; geological age of the rocks of Ontario.

Laboratory work will consist in collecting and identifying Palaeozoic fossils; in examining rock, mineral and ore specimens.

3 hours per week: 3 credits.

Prerequisites: Upper School Biology or Botany 10 and Zoology 10; Geology 20.

Text-books: Pirsson and Schuchert, *Introductory Geology.*
Shimer, *Introduction to Study of Fossils.*

40a. **Crystallography:** the structure of crystals and crystalline matter, morphological and interfacial relations of crystals. Laboratory practice on crystal drawing and study of natural crystals.

2 lectures and 4 laboratory hours per week: 2 credits.

40b. **Mineralogy:** Lectures in determinative Mineralogy, and the occurrence of minerals. Laboratory practice on the determination of minerals with practice in elementary assaying.

2 lectures and 4 laboratory hours per week: 2 credits.

Text-books: Ford, *Dana's Manual of Mineralogy.*
Warren, *Determinative Mineralogy.*
Phillips, *Mineralogy* (Macmillan).

Honour Courses

100. **General Geology:** for students in honour courses in General Science, Geology, and Biology.

(1) Structure of the earth as a whole: description and classification of minerals, rocks and soils; ores and their depositions; rock weathering and the deposition of sediments; the principles of earth movements, deformation, metamorphism, volcanism; mountain building, faulting and rock structures resulting therefrom; glaciers, and glacial deposits with special reference to the Pleistocene ice sheet of North America.

(2) Identification of the invertebrate fossils local to south-western Ontario, and an outline of Historical Geology; age relation of the rocks of Ontario; elementary Meteorology.

The laboratory work consists in examination and identification of specimens of minerals, rocks, ores, and fossils with a collection from the local neighborhood.

4 hours per week, with field trips: 3 credits.

Prerequisites: complete entrance requirements for an Honour Science Course or Chemistry 11, Botany 10 or Zoology 10 taken concurrently.

Text-books: Pirsson and Schuchert, *Text-book of Geology.*
Milham, *Elementary Meteorology.*

200. **Historical Geology and Introductory Paleontology:** an historical outline of the continents with special reference to North America; a study of invertebrate and vertebrate fossils and plant fossils. For students in the honour courses in General Science, Geology and Biology.

4 hours per week, with field trips: 3 credits.

Prerequisite: Geology 100.

Text-book: Pirsson and Schuchert, *Text-book of Geology, Part II.*

300. **Mineralogy:** comprising crystallography which will include lectures on the structure of crystals and their morphological relations with laboratory work in the drawing of ideal

and natural forms. Also Physical Mineralogy dealing largely with an introduction to Optics with laboratory practice in the use of the petrographic microscope. The course will also include Chemical Mineralogy comprising determinative work and practice in assaying.

3 lectures, and 4 laboratory hours per week: 5 credits.

Text-books: Warren, *Determinative Mineralogy.*
Dana, *Text-book of Mineralogy.*
Winchel, *Elements of Optical Mineralogy.*
Phillips, *Mineralogy* (Macmillan).

301. **Economic Geology:** a course of lectures with reading and laboratory work.

3 hours per week: 3 credits.

Text-books: Lindgren, *Mineral Deposits.*
Reis, *Economic Geology.*
G. A. Young, *Economic Geology Series of Canada.*

400a. **Descriptive Mineralogy** comprising a description of mineral species with practice on their Optical and Megascopic determination.

2 lectures, 4 laboratory hours per week: 2 credits.

400b. **Petrology.** Lectures on the constitution of rocks, their associations and laboratory practice on their identification in hand specimens and thin section.

2 lectures, 4 laboratory hours per week: 2 credits.

Text-books: Pirsson and Knopf, *Rocks and Rock Minerals.*
Luquer, *Minerals in Rock Sections.*
Iddings, *Igneous Rocks.*
Winchel, *Elements of Optical Mineralogy, Parts I, II.*

401. **Regional Geology of Canada** with descriptions of the Geology of the various mining camps. A reading course based on the recent government reports. Seminar.

2 credits.

402a. **Field Geology:** principles of surveying, mapping and map reading with field practice.

2 lectures per week, with field trips: 2 credits.

402b. **Structural Geology:** principles of rock structure, tectonics and dynamics of rocks and the construction and reading of geological maps. Lectures will be given on continental formation and drift and the Vagnor Theory.

1 lecture, 3 laboratory hours per week: 2 credits.

403. **History of Geology:** a reading course in the development of the geological sciences.

2 credits.

General Courses

1. **Preparatory German:** the work of the middle school or its equivalent is covered.

3 hours per week: 3 credits.

Text-books: Vandersmissen and Fraser, *High School German Grammar.*
Märchen und Erzählungen (Heath).

10. Grammar, pronunciation, translation from English into German, translation at sight from easy modern German prose.

3 hours per week: 3 credits.

Prerequisite: Middle School German or German 1.

Text-books: Vandersmissen and Fraser, *High School German Grammar.*
Stern, *Geschichten von deutschen Städten, Vol. I.*
Baumbach, *Waldnovellen.*

15. Grammar, pronunciation, translation from English into German, translation at sight from easy modern German literary and scientific prose. Prescribed for science and pre-medical students.

3 hours per week: 3 credits.

Prerequisite: Middle School German or German 1.

Text-books: Vandersmissen and Fraser, *High School German Grammar.*
Stern, *Geschichten von deutschen Städten, Vol. I.*
Gore, *German Science Reader* (Heath).

20. Grammar, conversation, translation into German, translation from modern German.

3 hours per week: 3 credits.

Prerequisite: German 10.

Text-books: Stern, *Geschichten von deutschen Städten Vol. II.*
Fulda, *Das verlorene Paradies.*
Carmen Sylva, *Aus meinem Königreich.*
Meyer, *Gustav Adolfs Page.*
Supplementary Reading.

30. Grammar, translation into German, outline of German literature from the beginning up to 1740.

3 hours per week: 3 credits.

Prerequisite: German 20.

Text-books: Lessing, *Minna von Barnhelm.*
Heine, *Prosa* (Buchheim Edition).
Auf der Sonnenseite (Heath).

35. The reading of scientific works in German.
1 hour per week: ½ credit.
Prerequisite: German 10 or 15.

40. Grammar, translation into German, outline of the history of German literature from 1740 to the present.
3 hours per week: 3 credits.
Prerequisite: German 30.
Text-books: Schiller, *Jungfrau von Orleans.*
Goethe, *Iphigenie.*
Freytag, *Journalisten.*

45. The reading of scientific works in German.
1 hour per week: ½ credit.
Prerequisite: German 35.

Honour Courses

All Honour students must satisfy the department as to correct pronunciation of German.

100. Grammar, pronunciation, translation into German, translation from modern German.
4 hours per week: 4 credits.
Prerequisite: Upper School German or German 10.
Text-books: Carmen Sylva, *Aus meinem Königreich.*
Fulda, *Das verlorene Paradies.*
Meyer, *Gustav Adolfs Page.*
Keller, *Das Fähnlein der sieben Aufrechten.*
Supplementary Reading.

200. First term: The life and works of Lessing.

Second term: The life and works of Schiller.
3 hours per week: 3 credits.
Prerequisite: German 100.
Text-books: Lesssing, *Minna von Barnhelm.*
Lessing, *Nathan der Weise.*
Schiller, *Die Jungfrau.*
Schiller, *Wilhelm Tell.*

201. Grammar, conversation, translation into German.
1 hour per week: 1 credit.
Prerequisite: German 100.

300. A general acquaintance with German literature of the XVIII century. The life and works of Lessing.
2 hours per week: 2 credits.
Prerequisite: German 200.
Text-books: Lessing, *Minna von Barnhelm.*
Lessing, *Nathan der Weise.*
Lessing, *Hamburgische Dramaturgie.*

301. Grammar, conversation, translation into German.
1 hour per week: 1 credit.
Prerequisite: German 200, 201.

310. The life and works of Goethe.
2 hours per week: 2 credits.
Prerequisite: German 200.

Text-books: Goethe, *Hermann und Dorthea.*
Goethe, *Iphigenie.*
Goethe, *Faust.*

400. A general acquaintance with the German Literature of the nineteenth century.
4 hours per week: 4 credits.
Prerequisite: German 300.

Text-books: Kleist, *Prinz von Homburg.*
Oxford Book of German Verse (Selections beginning with Novalis).
Hebbel, *Agnes Bernauer.*
Grillparzer, *Sappho.*
Ludwig, *Zwischen Himmel und Erde.*
Keller, *Romeo und Julia auf dem Dorfe.*
Sudermann, *Der Katzensteg.*

401. Grammar, conversation, translation into German.
1 hour per week: 1 credit.
Prerequisite: German 300 and 301.

402. **Elements of Middle High German Grammar:** History of Middle High German literature with reading of selected texts.
1 hour per week: 1 credit.
Prerequisite: German 300, 301.

DEPARTMENT OF HEBREW

University College

REV. C. C. WALLER, M.A., D.D., F.A.G.S., Professor

Waterloo College

REV. E. AKSIM, S.T.M., Lecturer

The object of the course in Hebrew is chiefly to provide instruction for intending theological students to enable them to read the Hebrew Bible with a thorough knowledge of grammar, pointing and a general acquaintance with the Old Testament literature as a foundation for more advanced study of Semitic languages; but any student desiring a fuller acquaintance with the Old Testament is at liberty to choose the Hebrew options.

Every student must provide himself with a *Hebrew Bible*, Bagster's *Hebrew-English Lexicon* and Davidson's *Hebrew Grammar*, twentieth edition, revised by McFayden; earlier editions will not be permitted in the classroom. Third-year students must have Davidson's *Hebrew Syntax;* advanced students are recommended to provide themselves with the *Oxford Hebrew Lexicon.*

The Professors reserve the right to rearrange or change the prescription of authors in any year of the pass and honour courses for the intramural students.

General Courses

10. Grammar, selections and exercises in translation from English to Hebrew and from Hebrew to English; translation of *Genesis*, 1-4, 18; *Psalms*, 2, 8, 19, 23, 51. Grammatical analysis, parsing and vocabulary.

3 hours per week: 3 credits.

(This course is also given at Waterloo College as Hebrew 19.)

20. Grammar; exercises in translation from Hebrew to English and from English into Hebrew; pointing of simple passages; translation of *Genesis* 37, 40-45; *Exodus* 1-4; *I Kings* 17-19; *II Kings* 2, 17.

3 hours per week; 3 credits.

Prerequisite: Hebrew 10.

30. Grammar and syntax; exercises in translation from Hebrew into English and from English into Hebrew; pointing; introduction to prophetic writings; *Amos; Isaiah* 1-6, 40, 50-55; *Jeremiah* 7; *Ezekiel* 14.

3 hours per week: 3 credits.

Prerequisite: Hebrew 20.

40. Grammar, syntax, pointing, exercises in translation from English into Hebrew and from Hebrew into English; introduction to poetical writings; principles of Hebrew poetry; *Numbers* 23, 24; *Psalms* 1, 16, 24, 29, 37, 45, 50, 80, 84, 90, 110, 121-134; *Ecclesiastes* 12; *Proverbs* 1-4, 8; *Job* 28.

3 hours per week: 3 credits.

Prerequisite: Hebrew 30.

Honour Courses

100. Grammar; exercises in translation of Hebrew into English and English into Hebrew. Davidson, pp. 1-126, 208-221. Translation of prescriptions in Hebrew 10 and *Exodus* 1-4, *I Kings* 17-19, *II Kings* 2, 17; grammatical analysis, parsing and vocabulary.

4 hours per week: 4 credits.

200. Grammar; exercises in translation of Hebrew into English and of English into Hebrew; pointing of simple passages; translation of *Genesis* 37, 40-45; introduction to prophetic writings; *Amos; Isaiah* 1-6, 40, 50-55; *Jeremiah* 7; *Ezekiel* 14.

4 hours per week: 4 credits.

300. Grammar, syntax, pointing, composition, sight translation; introduction to poetical writings; principles of Hebrew poetry; *Numbers* 23, 24; *Psalms* 1, 16, 24, 29, 37, 45, 50, 80, 84, 90, 110, 121-134; *Ecclesiastes* 12; *Proverbs* 1-4, 8; *Job* 28.

4 hours per week: 4 credits.
Prerequisite: Hebrew 200.

400. Exercises in grammar, syntax, pointing and composition, sight translation; the *Psalms* not previously read.

3 hours per week: 3 credits.
Prerequisites: Hebrew 300.

401. Aramaic; Brown, *Aramaic Method, Parts I, II;* exercises, grammar, syntax, pointing, composition.

3 hours per week: 3 credits.
Prerequisite: Hebrew 300.

20. **Ancient Civilization:** Early Egyptian, Babylonian, Hebrew History; Greece; Rome to 200 A.D. Lectures, reading and essays. (Not given in 1929-30).

3 hours per week: 3 credits.

Text-book: Breasted, *Ancient Times* (Ginn).

25. **History of England to 1713:** the social life of the English people, the Renaissance and Reformation in England will be stressed. Lectures, prescribed readings and essays. First term covers to 1485 with special emphasis on the period after 1066.

2 hours per week: 2 credits.

Text-book: Trevelyan *History of England, Vols. I, II* (Longmans).

30a. **Mediaeval History (295-1300):** lectures, prescribed reading and essays.

3 hours per week, first term: 1½ credits.

Text-books: Munro and Sontag, *The Middle Ages* (Century) or Thorndike, *History of Medieval Europe.*

30b. **The Renaissance and the Reformation (1300-1600):** lectures, prescribed reading and essays.

3 hours per week; second term, 1½ credits.

Text-books: Hulme, *The Renaissance and The Reformation* (Century) or Schevill, *Political History of Modern Europe.*

31. **History of Canada:** lectures, prescribed reading and essays. A survey of the History of Canada from the beginning of the French Regime to the Great War. (See History 301).

2 hours per week: 2 credits.

40a. **Modern History (1600-1815):** lectures, prescribed reading and essays. The period down to 1763 will be reviewed in outline with a more detailed study of the Revolutionary and Napoleonic era.

3 hours per week, first term: 1½ credits.
Prerequisite: History 30a, 30b or an equivalent.

Text-books: Hayes, *A Political and Social History of Modern Europe,* 1500-1815, *Vol. I* (Macmillan).
Robinson and Beard, *Readings in Modern European History, Vol. I.*

40b. **Modern History (1815-1915):** lectures, prescribed reading and essays. The growth of nationalism and of democracy in Europe; the colonial and commercial expansion of the European nations as the background of the Great War will be especially studied.

3 hours per week, second term; 1½ credits.
Prerequisite: History 30a, 30b or an equivalent.

Text-books: Hayes, *A Political and Social History of Modern Europe,* 1815-1915, *Vol. II* (Macmillan).
Robinson and Beard, *Readings in Modern European History, Vol. II.*

43. **The Development of Colonial Self-Government in the British Empire:** lectures, prescribed reading and essays. The lectures will be grouped under the following heads: British Colonial Policy at the beginning of the Nineteenth Century; the Colonial Reformers; the development of self-government in Canada, Australasia and South Africa; the constitution of Canada, of the Australian Commonwealth, of South Africa and of the Irish Free State; the growth of colonial nationalism and autonomy.

3 hours per week, first term: 1½ credits.

Prerequisite: History 31.

Text-books: Barnard, *The Expansion of Anglo-Saxon Nations.*
Currey, *British Colonial Policy.*
Egerton, *Federations and Unions in the British Empire.*
Scott, *Short History of Australia.*
Fairbridge, *History of South Africa.*

44. **History of the United States:** the colonial period, the revolution, making of the constitution, westward development, the slavery struggle, the Civil War, reconstruction and later political history to the present day. Attention will be given to the character of both federal and state government. The period down to the Civil War will be covered in the first term and the period since the Civil War in the second term. Lectures, prescribed reading and essays.

2 hours per week: 2 credits.

Text-book: Muzzey, *History of the American People* (Ginn).

45a. **Mediaeval, Renaissance and Reformation History, and The Wars of Religion:** a rapid survey of Continental Europe from 295-1648. Lectures, essays and prescribed reading.

3 hours per week, first term: 1½ credits.

Prerequisite: History 31.

Text-book: Robinson, *An Introduction to the History of Modern Europe, Vol. I. The Background of Modern History.*

46b. **Modern History:** a rapid survey course of Continental Europe from the Treaty of Westphalia, 1648, down to the present.

3 hours per week, second term: 1½ credits.

Prerequisite: History 31.

Text-book: Robinson, *An Introduction to the History of Western Europe, Vol. II. The Emergence of Existing Conditions and Ways of Thinking.*

Honour Courses

105. **History of England to 1713:** the social life of the English people, the Renaissance and Reformation in England will be stressed. Lectures, prescribed reading and essays. First term covers to 1485 with special emphasis on the period after 1066.

2 hours per week: 2 credits.

Text-book: Trevelyan, *History of England, Vols. I, II* (Longmans).

200a. **Mediaeval History (295-1300):** lectures, prescribed reading and essays.

3 hours per week, first term: 1½ credits.

Prerequisite: History 105.

Text-book: Munro and Sontag, *The Middle Ages* (Century).

200b. **The Renaissance and the Reformation (1300-1600):** lectures, prescribed reading and essays.

3 hours per week, second term: 1½ credits.

Prerequisite: History 105.

Text-book: Hulme, *Renaissance and Reformation* (Century).

300a. **Modern History (1600-1815):** for details, see History 40a. Honour students will be required to do special reading and reports in this course.

3 hours per week, first term: 1½ credits.

Prerequisite: History 200a, 200b.

Text-books: Hayes, *A Political and Social History of Modern Europe*, 1500-1815, *Vol. I* (Macmillan).
Robinson and Beard, *Readings in Modern European History, Vol. I.*

300b. **Modern History (1815-1915):** for details of course, see History 40b. Honour students will be required to do special reading and reports in this course.

3 hours per week, second term: 1½ credits.

Prerequisite: History 200a, 200b.

Text-books: Hayes, *A Political and Social History of Modern Europe*, 1815-1915, *Vol. II* (Macmillan).
Robinson and Beard, *Readings in Modern European History, Vol. II.*
Flick, *Modern World History*, 1770-1926.

301. **History of Canada:** a survey of the History of Canada from the beginning of the French regime to the Great War. Lectures, prescribed reading and essays.

Students in this course will be expected to do wide reading in *The Chronicles of Canada, The Makers of Canada, Canada and Its Provinces, etc.*

2 hours per week: 2 credits.

400. **British Political Parties:** a reading and lecture course conducted in connection with weekly seminars. Fourth year honour intramural students only admitted to this course. Lectures and discussions will be grouped around the following topics: The Rise of the Tory and Whig Parties; the Revolution of 1688; the Tory Reaction in the Reign of Anne; the "Reign of the Whigs"; the experiment in personal government of George III; The Disruption of the old Whig Party; the new Tory Party under Pitt; the Growth of Parliamentary Reform and Free Trade; Peel and Liberal Conservation; Disraeli and Democratic Toryism; Gladstone and Modern Liberalism; the Irish Parliamentary Party; the Unionist Party.

3 hours per week: 3 credits.

Text-books: Traill, *Shaftesbury*,
Morley, *Walpole*.
Williams, *Life of William Pitt, Earl Chatham*.
Newman, *Edmund Burke*.
Drinkwater, *Charles James Fox*.
Rosebery, *Pitt*.
Thursfield, *Peel*.
Morley, *Cobden*.
Froude, *Beaconsfield*.
Morley, *Life of Gladstone*.

402. **The Mediaeval Background of English Constitutional History:** lectures, prescribed reading and essays. A special study will be made of the origin of the English constitution. The following topics will be considered: Anglo-Saxon institutions and government; Norman institutions and government; the development of the Judicature; Magna Carta; the growth of Parliament; the legal reforms of Edward I; the Lancastrian Experiment in Constitutional Government; the Yorkist Reaction.

3 hours per week, second term: 1½ credits.

Text-books: Adams, *Constitutional History of England*.
Medley, *Constitutional History of England*.
Adams and Stephens, *Select Documents of English Constitutional History*.

403. **The Development of Colonial Self-Government in the British Empire:** for details, see History 43. Honour students will be required to do special reading and reports in this course.

3 hours per week, first term: 1½ credits.

404. **History of the United States:** see History 44. Prescribed for students of the fourth year in the Honour Course in History. Lectures, prescribed reading and essays.

2 hours per week: 2 credits.

Courses Leading to M.A.

500. **Colonial and Imperial History:** a seminar course in Colonial and Imperail problems for advanced students who have the necessary prerequisite courses, or for graduate students.

504. **American History:** a seminar course in selected problems in Canadian and United States history for advanced students who have the necessary prerequisite courses, or for graduate students.

The hours and credits to be assigned for 500 and 504 will be decided by the Department. Students desiring to take these courses must notify the Department of their intention not later than the June preceding the Fall Term in which the work will be taken.

DEPARTMENT OF LAW

F. E. PERRIN, B.A., K.C., Lecturer

500. **Domestic Relations:** Eversley, substituting the Canadian Statutes for the English Statutes in the text-book. The parts to be read are: Parts I, II, and IV to page 811; Part V, 875-9 inclusive, 884-94 inclusive and 919-34 inclusive.

Text-book: Eversley, *Domestic Relations*, Fourth Edition by A. Cairns.

501. **Corporations:** The following of the text named below: Part I: ch. 1 to 4, inclusive; Part II: ch. 1 to 5, inclusive; Part III: ch. 2 to 3, page 198, ch. 4 to 13, inclusive; Part IV: ch. 1 and 2, sections 3 and 4; Part V: ch. 1 to 6, inclusive; Part VI: ch. 1 to 6, inclusive.

Text-book: Brice, *Ultra Vires* (Third English Edition).

502. **Medical Jurisprudence:** the following portions will be read from the text named below: Volume I., sections 1, 2, 4, 5, 6, 10, 11, 13; Volume II., sections 1-13, inclusive, 15.

Text-book: Taylor, *Medical Jurisprudence* (edited Smith, 7th edition, 1920).

503. **Theory of Obligation:** Institutes of Justinian.
Book I: Titles 1, 2, 3.
Book III: Titles 13-29, inclusive.
Book IV: Title 1.

504. **Thesis.** See page 47 (d).

DEPARTMENT OF LIBRARY SCIENCE

University College

CATHERINE CAMPBELL, B.A., Instructor
BEATRICE WELLING, B.Sc., M.A., Instructor

Assumption College

REV. E. J. WELTY, PH.D., Lecturer

10a. A course of instruction in the use of books and libraries, prescribed for all students in the first year. Classification and arrangement of books in the University library; the card catalogue; the most common reference books; bibliography. Those who fail to obtain 50 per cent. in the first term will repeat the course as 10b in the second term.

1 hour per week, first term: ½ credit.

31. **Reference Work:** a critical study of selected standard reference books, with problems on the use of these; use of bibliographies and indexes; lectures and assigned readings on use of books and other printed materials in business.

2 hours per week: 2 credits.

DEPARTMENT OF MATHEMATICS AND ASTRONOMY

University College

H. R. KINGSTON, M.A., PH.D., F.R.A.S., Professor
W. J. PATTERSON, M.A., Professor
ARTHUR WOODS, M.A., Assistant Professor

Assumption College

REV. V. J. GUINAN, B.A., Associate Professor
Rev. J. W. DORE, M.A., Lecturer

Ursuline College

M. M. IMMACULATE, B.A., Professor

Waterloo College

ROY J. E. HIRTLE, M. Sc., Associate Professor

10a. **Algebra**; linear and quadratic functions of two variables—graphs, maximum and minimum values, linear factors; quadratic equation in one variable—solution, discriminant, sum and product of roots, construction of equations whose roots are functions of roots of given equation; ratio and proportion; variation; arithmetic, geometric and harmonic series; annuities; permutations and combinations as a prerequisite for the binomial theorem; binomial theorem proved for positive integral exponent and applied also with negative and fractional exponents; logarithms with simple applications.

3 hours per week, first term: 1½ credits.

Prerequisite: Pass Matriculation in Mathematics.

Text-book: Wilson and Warren, *An Intermediate Algebra* (Oxford).

12b. **Analytic Geometry**: the analytical geometry of the point, straight line, circle, parabola, ellipse and hyperbola to page 131 of text; application to curve of flight and reflectors.

3 hours per week, second term: 1½ credits.

Prerequisite: Pass Matriculation in Mathematics.

Text-book: Barnett, *Plane Analytic Geometry* (Wiley).

18a. **General Mathematics** (for premedical students): trigonometric ratios; applications to simple problems in heights and distances; trigonometric functions of $90° \pm A$, $180° \pm A$, $-A$; logarithms; arithmetic and geometric progressions; application to compound interest, annuities and life insurance; permutations and combinations; binominal theorem.

2 hours per week, first term: 1 credit.

Prerequisite: Pass Matriculation in Mathematics.

Text-books: Hall and Knight, *Elementary Trigonometry* (Macmillan).
Wilson and Warren, *An Intermediate Algebra* (Oxford).

19b. **Analytic Geometry** (for premedical students): graphs of statistics; selected portions of the analytical geometry of the point, straight line, circle, parabola and ellipse; application to curve of flight and parabolic reflector.

2 hours per week, second term: 1 credit.

Prerequisite: Pass Matriculation in Mathematics.

Text-book: Brink, *Analytical Geometry* (Century Co).

20a. **Pre-calculus Mathematics**; review of binominal theorem; logarithms; exponential and logarithmic series; mathematical induction; loci; curve tracing; selected portions from the analytical geometry of the parabola, ellipse and hyperbola.

2 hours per week, first term: 1 credit.

Prerequisites: Mathematics 10a and 12b, or Upper School Mathematics.

Text-book: Barnett, *Plane Analytical Geometry* (Wiley).

23b. **Trigonometry:** trigonometrical ratios and their relations; values of ratios of common angles; formulae of circular measure; applications; ratios of the sum and difference of two angles with derived formulae; logarithms; solution of triangles with derivation of the necessary formulae; radii of inscribed, escribed and circumscribed circles of a triangle; perimeters and areas of inscribed and circumscribed regular polygons of a circle.

2 hours per week, second term: 1 credit.

Prerequisite: Mathematics 10a.

Text-book: Hall and Knight, *Elementary Trigonometry* (Macmillan).

24b. **Calculus:** an elementary course stressing practical applications.

2 hours per week, second term: 1 credit.

Prerequisite: Mathematics 20a.

Text-book: Woods and Bailey, *Elementary Calculus* (Ginn).

25. **Descriptive Astronomy:** the constellations; systems of co-ordinates; shape, size and motions of the earth; the moon; eclipses; time; the solar system; the planets; comets and meteors; the sun; evolution of solar system; the stellar universe. Evening observations. The lectures will be illustrated with lantern slides. This course is not mathematical.

2 hours per week: 2 credits.

Text-books: Moulton, *Introduction to Astronomy* (Macmillan).
Kingston, *An Easy Pocket Star Guide for Beginners.*

27b. **The Mathematical Theory of Investment:** interest; annuities; amortization of debts; valuation of bonds; sinking funds and depreciation.

2 hours per week, second term: 1 credit.

Prerequisite: Mathematics 20a.

Text-book: To be determined later.

Honour Courses

100a. **Algebra:** review of permutations, combinations and binomial theorem; exponential and logarithmic series; interest and annuities; inequalities; limiting values and vanishing fractions; convergency and divergency of series; undetermined coefficients; partial fractions; recurring series; continued fractions; indeterminate equations of first degree; recurring continued fractions; summation of series.

3 hours per week: 1½ credits.

Prerequisites: Upper School Mathematics, or Mathematics 10a, 12b, 23b.

Text-book: Hall and Knight, *Higher Algebra*, pp. 187-340 (Macmillan).

102a. **Analytic Plane Geometry:** review of first course in analytic geometry; general treatment of the principal properties of the parabola, ellipse and hyperbola; polar co-ordinates with applications; transformations; the general equation of the second degree; the lines $ax^2+2hxy+by^2=0$; invariants of conics; asymptotes.

3 hours per week: 1½ credits.

Prerequisites: As for Mathematics 100a.

Text-book: Grace and Rosenberg, *Co-ordinate Geometry* (Tutorial Press).

103b. **Higher Trigonometry:** perimeter and area of regular polygon and circle; inscribed, escribed and circumscribed circles; pedal triangle; inverse notation; general values of inverse functions; triangulation of heights and distances; limiting forms; maximum and minimum values of trigonometric functions; development of trigonometric functions in power series; applications; evaluation of π; De Moivre's Theorem; n^{th} roots of ± 1; expanison of $\sin n\theta$ and $\cos n\theta$; exponential values of $\sin\theta$ and $\cos\theta$; expansion of $(2\cos\theta)^n$ and $(2\sin\theta)^n$ in power series; factors of $x^{2n}-2x^n\cos\theta+1$; hyperbolic functions; summation of trigonometric series.

2 hours per week: 1 credit.

Prerequisites: As for Mathematics 100a.

Text-books: Lock, *Higher Trigonometry* (Macmillan).
Hobson, *Plane Trigonometry* (Cambridge).

104b. **Elementary Differential and Integral Calculus:** functions and limits of a variable; definition of derivative and its geometrical interpretation; differentiation of elementary functions; simple geometrical applications; maxima and minima; the indefinite integral as the inverse of the derivative; simple integrals; geometrical and physical significance of the constant of integration; the definite integral and its interpretation; simple applications to calculation of areas of plane curves and volumes of solids of revolution.

2 hours per week: 1 credit.

Prerequisites: As for Mathematics 100a.

Text-book: Granville, *Differential and Integral Calculus* (Ginn).

111b. **Synthetic Solid Geometry.**

2 hours per week: 1 credit.

Prerequisites: As for Mathematics 100a.

Text-book: Wentworth and Smith, *Solid Geometry* (Ginn).

200a. **Algebra and Determinants:** theory of numbers as covered by Hall and Knight; perfect numbers; the integral solutions of $x^2+y^2=z^2$; an introduction to the theory of probability; theory of determinants and applications.

2 hours per week: 1 credit.

Prerequisite: Mathematics 100a.

Text-book: Hall and Knight, *Higher Algebra* (Macmillan).

202a. **Analytic Plane Geometry:** the circle through three points; the conic through five points; number of conditions applicable to general equation of conic; line co-ordinates and their reciprocity with point co-ordinates; equation of conic in line co-ordinates with deductions therefrom; ratios of lengths of chords, diameters and tangents drawn through a given point to a conic; homogeneous and trilinear co-ordinates; applications to the geometry of points and lines related to triangle; centre and axis of homology of two triangles; Desargue's Theorem; harmonic and anharmonic pencils; harmonic properties of complete quadrilateral; conic referred to pair of tangents and chord of contact; similar and confocal conics; orders of contact

of conics; osculating circles to conics and methods of obtaining radii of curvature; conics as plane sections of cone and interrelations therefrom; invariants of general conic.

2 hours per week: 1 credit.

Prerequisite: Mathematics 102a.

Text-books: C. Smith, *Conic Sections* (Macmillan).
Salmon, *Conic Sections* (Longmans).

204. **Differential and Integral Calculus:**

First term: Differential Calculus: successive differentiation; maxima and minima of f(x); points of inflexion; curve tracing; differentials; rates; change of dependent and independent variables; curvature; envelopes; evolutes; involutes; Mean Value Theorem; indeterminate forms; partial differentiation; Taylor's and Maclaurin's Series applied to expansions of functions; asymptotes; singular points; tangent planes and normal lines to surfaces; tangent lines and normal planes to twisted curves.

Second Term: Integral Calculus: integration as inverse of differentiation and as the limit of summation; methods of integration; reduction formulae; definite integrals; applications.

3 hours per week: 3 credits.

Prerequisite: Mathematics 104b.

Text-books: Granville, *Differential and Integral Calculus* (Ginn).
Williamson, *Integral Calculus, Elementary Treatise* (Longmans).

210b. **Theory of Equations:** as in text.

2 hours per week: 1 credit.

Prerequisite: Mathematics 100a.

Text-book: Dickson, *First Course in the Theory of Equations* (Wiley).

212b. **Analytic Solid Geometry.**

2 hours per week: 1 credit.

Prerequisites: Mathematics 102a and 104b.

Text-book: C. Smith, *Solid Geometry*, pp. 1-96 (Macmillan).

301b. **Modern Synthetic Projective Geometry:** geometric continuity; selected theorems on ranges of points and pencils of lines; collinearity and concurrence; perspectivity; inversion; poles and polars; polar reciprocation and the principle of duality; harmonic and anharmonic ratios; projection.

2 hours per week: 1 credit.

Prerequisites: Mathematics 200a-212b.

Text-book: Altschiller-Court, *College Geometry* (Johnson Publishing Co., Richmond, Va.).

303a. **Spherical Trigonometry:** the solutions of the spherical triangle with applications to problems in geodesy; introduction to Theory of Least Squares.

2 hours per week: 1 credit.

Prerequisites: Mathematics 200a-212b.

Text-book: Todhunter and Leatham, *Spherical Trigonometry* (Macmillan).

304. **Differential Equations:** differential equations of first order; singular solutions; applications; linear equations with constant coefficients; with variable coefficients; exact differential equations; integrations in series; equations of second order; equations with more than two variables; partial differential equations.

2 hours per week: 2 credits.

Prerequisites: Mathematics 200a-212b.

Text-book: Murray, *Differential Equations* (Longmans).

305a. **Descriptive Astronomy:** the constellations; systems of co-ordinates; shape, size and motions of the earth; the moon; eclipses; time; the solar system; the evolution of the solar system. Evening observations.

2 hours per week: 1 credit.

Text-books: Moulton, *Introduction to Astronomy* (Macmillan).
Kingston, *An Easy Pocket Star Guide for Beginners.*

305b. **Mathematical Astronomy:** time, the conversion of time; the ephemeris; corrections of observations for refraction, parallax, aberration and dip; description and working principles of astronomical instruments; errors of instruments, and how to eliminate their effects; determination of latitude, longitude, azimuth and time.

2 hours per week: 1 credit.

Prerequisites: Mathematics 303a, 305a.

Text-books: Barlow and Bryan, *Elementary Mathematical Astronomy* (Briggs and Bryan, Tutorial Series).
The American Nautical Almanac for 1930 (Eastern Service Supply Co.).

307a. **Finite Differences:** fundamental difference forms; factorial expansions; interpolation formulae; statistical applications; mechanical quadratures; integration; central differences.

2 hours per week: 1 credit.

Prerequisites: Mathematics 200a-212b.

Text-book: Henry, *Calculus and Probability* (C. and E. Layton).

307b. **Statistics.**

2 hours per week: 1 credit.
Prerequisites: Mathematics 200a-212b.

Text-book: Gavett, *First Course in Statistical Method* (McGraw-Hill).

312. **Analytic Solid Geometry:** plane sections of conicoids; generating lines of conicoids; systems of conicoids; tangential equations; reciprocation; confocal conicoids; foci of conicoids; quadriplanar and tetrahedral co-ordinates; surfaces in general; twisted curves; curvature of surfaces.

2 hours per week: 2 credits.
Prerequisites: Mathematics 200a-212b.

Text-book: C. Smith, *Solid Geometry* (Macmillan).

400. **Vector Analysis.**

2 hours per week: 1 credit.
Prerequisites: Mathematics 200a-212b.

Text-book: Gibbs-Wilson, *Vector Analysis* (Yale University Press).

402. **Advanced Geometry:**

First Term: Theory of Conics: study of conics by abridged notations; points and lines at infinity; Pascal's and Brianchon's Theorems; parametric equations of conics; envelopes; harmonic and anharmonic properties of ranges and pencils related to conics; projective properties of conics; involution; polar reciprocation; applications.

Second Term: Higher Plane Curves: inverse curves; pedal curves; reciprocal polars; order and class of a curve; Joachamsthal's method of investigating singularities; multiple points; tangents and pseudo-tangents; kth polars and polar k-thics; deficiency; Plücker's numbers; residuation; genesis and properties of various plane curves.

2 hours per week: 2 credits.
Prerequisites: Mathematics 200a-212b.

Text-books: Salmon, *Conic Sections* (Longmans).
Williamson, *Differential Calculus* (Appleton).
Williamson, *Integral Calculus* (Longmans).

404. **Advanced Calculus:** selected topics.

2 hours per week: 1 credit.
Prerequisites: Mathematics 200a-212b.

References: Williamson, *Integral Calculus* (Longmans).
Byerly, *Integral Calculus* (Ginn).
Goursat-Hedrick, *Mathematical Analysis, Vol. I* (Ginn).

406. Theory of Functions of Complex Variable.
2 hours per week: 2 credits.
Prerequisites: Mathematics 200a-212b.

Text-books: Townsend, *Functions of a Complex Variable* (Holt).
Fiske, *Functions of a Complex Variable* (Wiley).

407. The Mathematics of Life Insurance: annuities, the general theory of probability; the mortality table; probabilities of life; expectations of life; survivorship probability; the law of mortality; life insurance premiums; policy reserves.
2 hours per week: 2 credits.
Prerequisites: Mathematics 200a-212b.

Text-books: Rietz, Crathorne and Rietz, *Mathematics of Finance* (Holt).
Spurgeon, *Life Contingencies* (C. and E. Layton).

408. History of Mathematics.
1 hour per week: 1 credit.

Text-books: Cajori, *A History of Mathematics* (Macmillan).
Fink, *A Brief History of Elementary Mathematics* (Open Court).

Courses Leading to the Degree of M.A.

A selection from the following courses will be offered from time to time to suit the qualifications of candidates:

500. Theory of Numbers.
501. Synthetic Projective Geometry.
502. Modern Analytic Geometry.
504. Elliptic Integrals.
505. Celestial Mechanics.
506. Theory of Functions of a Real Variable.
507. Advanced Actuarial Science.
510. Theory of Invariants.
514. Projective Differential Geometry.
517. Insurance Problems.
520. Theory of Algebraic Functions.

31. **Ethics:** the history of early modern ethics up to Kant; theory of obligation; applied ethics; prescribed for third year students in the General Course.

1 hour per week: 1 credit.

Text-books: Mackenzie, *Manual of Ethics.*
D'Arcy, *A Short Study of Ethics.*
Dewey and Tufts, *Ethics.*
Sidgwick, *History of Ethics.*

39a. **Ethics** (equivalent of 31): a general course in Ethics in which the Christian point of view will be maintained and emphasized, while the value of the study of Philosophic Ethics will be pointed out. Offered in Waterloo College only.

2 hours per week, first term: 1 credit.

Text-books: Mackenzie, *Manual of Ethics.*
Sidgwick, *History of Ethics.*
Keyser, *General Ethics.*

39b. **Logic** (equivalent of 20); an introductory course in the principles of Deductive and Inductive Logic. Offered in Waterloo College only.

2 hours per week, second term: 1 credit.

Text-book: Creighton, *An Introductory Logic.*

40. **History of Modern Philosophy:** an option for students in the fourth year of the General Course; lectures, prescribed reading and essays; Kant and his immediate successors; the English Philosophers, especially Mill and Spencer; more recent philosophic theories; outstanding problems of Modern Philosophy.

2 hours per week: 2 credits.

45. **Metaphysics:** the soul; false theories on the nature of the soul; union of soul and body; theory of Plato; occasionalism; pre-established harmony; Aristotelico-Scholastic doctrine; theories of emanation; traducianism; evolution theory; creation doctrine.. Offered in Ursuline College only.

1 hour per week: 1 credit.

Text-book: Maher, *Psychology.*

Honour Courses

Offered in Assumption College and Ursuline College only.

200. **Elementary Psychology:** a course in Elementary Psychology: Sensation: Perception: Imagination: Instinct: Memory: Sensuous appetites and feelings: Intellect: intellect and sense; intellectual cognition; theories of conception: process of intellectual development: Rational appetite; necessary voluntary acts; free acts; emotions and sentiments.

3 hours per week: 3 credits.

Text-book: S. A. Lortie, *Elementa Philosophiae Christianae.*

220. **Logic:** a course in Formal Logic; the three operations of the mind; the idea; the term; various kinds of idea; definition; division; categories and predicables; judgment; the propositions, various kinds, their nature and division: Reasoning: deductive and inductive: The Syllogism: rules, modes and figures; the use of the syllogism: Fallacies.

2 hours per week: 2 credits.

Text-book: S. A. Lortie, *Elementa Philosophiae Christianae.*

230. **History of Philosophy:** a course in Greek Philosophy. The history of Philosophy in general: Oriental Philosophy: the transition from superstition to Philosophy: the progress of Greek thought from its birth among the Ionians to its perfection in Plato and Aristotle: The Post-Aristotelian Philosophy: Graeco-Oriental Philosophy.

2 hours per week: 2 credits.

Text-book: William Turner, *History of Philosophy.*

300. **Metaphysics: Logic.**

Ontology: being; essence; existence; the transcendental qualities of being; substance; accident; properties of being; nature; subsistence; person; time; space; cause and effect; quantity; quality; relation.

Cosmology: theories of the property and constitution of matter; Scholastic theory of matter and form; critical examina-

tion of the atomic and dynamic theories; properties of physical substances; laws of nature; miracles.

Criteriology: nature and existence of certitude; logical truth; criteria; the senses and consciousness as means of certitude; objectivity of our concepts.

5 hours per week: 5 credits.

Text-book: S. A. Lortie, *Elementa Philosophiae Christianae, Vol. II.*

320. **Ethics:** General: the last end of man; its nature and attainment; morality of human acts; the norm of morality; law, eternal, natural and positive in relation to morality; right reason; conscience; influence of passions on moral acts; habits; virtues; vices; general notions of right and duty.

3 hours per week: 3 credits.

Text-book: S. A. Lortie, *Ethica et Philosophia Moralis.*

330. **History of Philosophy:** Patristic and Mediaeval.

Patristic: Heretical systems; Ante-Nicene Fathers; Post-Nicene Fathers.

Mediaeval: Arabian, Jewish and Scholastic Philosophy; formation, culmination and decline.

3 hours per week: 3 credits.

Text-book: William Turner, *History of Philosophy.*

400. **Theodicy: Rational Psychology.**

Theodicy; the idea of the Divine Being; proof of the existence of God; the divine attributes; the immanent operations of God; the transient operations of God; the unicity of God.

Rational Psychology; life; plant life; animal life; origin of species; Mendelism; rational life; the human soul and its essential qualities; union of soul and body; origin and destiny of the human soul.

5 hours per week: 5 credits.

Text-book: S. A. Lortie, *Elementa Philosophiae Christianae, Vol. II.*

420. **Ethics:** Special: duties and rights. The individual: his duties of justice and charity to God, his neighbor and himself. The family: marriage; polygamy; divorce; monogamy, celibacy; relations between parents and children. The state: origin and forms of civil society; origin of civil power; forms of government; rights and duties of the state; citizenship.

3 hours per week: 3 credits.

Text-book: S. A. Lortie, *Elementa Philosophiae Christianae, Vol. III.*

430. **History of Philosophy:** Modern: the history of modern Philosophy from Descartes to the present: the Idealistic Movement: German Transcendentalism: Evolutionism: Positivism: Rationalism: Pragmatism.

3 hours per week: 3 credits.

Text-book: Turner, *History of Philosophy.*

DEPARTMENT OF PHYSICAL EDUCATION

Ursuline College

NELLIE TOPLEY-THOMAS, Assistant

Waterloo College

LOUIS HAGEY, Assistant

Physical Examinations

A physical examination by practising physicians, under the supervision of the Department of Physical Education, is required for students, men and women, of the first and second years. Physical examinations will be made by appointment during registration week. Students who have registered and who have not been examined during the prescribed period will be required to pay $1.00 for late examination.

All students participating in indoor and outdoor sports are required to pass this examination.

No medical fees will be paid from the funds of the Department of Physical Education unless the obligation has been sanctioned in advance by the Director of Physical Education or the department physicians.

Timetable

Autumn Activities—September to November

For Men:

Rugby, each day, 4 to 6 p.m.
Track, Monday and Wednesday, 4.30 to 5.30 p.m.
Soccer, Tuesday and Thursday, 4.30 to 5.30 p.m.
C.O.T.C., Wednesday, 7 to 9.15 p.m., begins Oct. 2nd.

For Women:

Field Hockey, Monday and Wednesday, 4.30 to 5.30 p.m.
Track, Tuesday and Thursday, 4.30 to 5.30 p.m.
Tennis, Monday, Tuesday, Wednesday and Thursday, 4.30 to 5.30 p.m.

Winter Activities—November to April

For Men:

Gymnastics, Monday and Thursday, 4.30 to 5.30 p.m.
Boxing and Wrestling, Monday and Thursday, 4.30 to 5.30 p.m.
C.O.T.C., Wednesday, 7 to 9.15 p.m.
Hockey, basketball, life-saving and swimming, to be arranged.

For Women:

Basketball, Monday and Wednesday, 4.30 to 5.30 p.m.
Gymnastics, Tuesday and Thursday, 4.30 to 5.30 p.m.

Note—Where weather does not permit outdoor work, students will report to their dressing-rooms as usual for information regarding the particular session concerned.

Electives

A student will elect one from each of the following Autumn and Winter groups within the Physical Education program, and if his performance justifies it, he will receive credit for the prescribed or elective work of his year.

Autumn:—
- University Rugby
- University Soccer
- University Track
- Military Training, C.O.T.C.

} Men

- University Track
- University Field Hockey
- University Tennis

} Women

Winter:—
- University Boxing and Wrestling
- Military Training, C. O. T. C.
- University Hockey
- University Basketball
- University Gymnastics

} Men

- University Hockey
- University Basketball
- University Gymnastics

} Women

Other activities from which a student may elect his Physical Training Course will be decided upon from time to time by the Committee on Physical Education.

MILITARY TRAINING

The course as approved by the Military Committee is as follows:

First Year—Elementary Theory and preliminary practical training.

Second Year—Theoretical and practical training leading up to Certificate "A" Infantry.

Third Year—Medical Students will join "B" Company and take Certificate "A" Medical.
Remainder will take Certificate "B" Infantry.

Fourth Year—"A" Company will train in Specialist lines, "B" Company will take Certificate "B" Medical.

The military training of the first two years consists of two parts: theoretical, 1 hour per week; practical, 2 hours per week.

Theoretical: this consists of lectures on Organization and Administration, Duties, Military Law, Principles of War and Characteristics of Fighting Troops, Infantry in Battle, Protection, Infantry in Attack and Defence, Information, Movements by Land and Sea, Quarters, Messages, Orders and Appreciations, and Topography.

Practical: Platoon and Extended Order Drill, Company Drill, Various Formations used in Attack and Defence, and Musketry.

The work of the C. O. T. C. offers an unusual opportunity to students to pass examinations for lieutenants' and captains' certificates. The examinations are conducted by the staff of the Imperial War Office, and the certificates are standard throughout the British Empire.

Rifle Association: all members of the University Contingent are entitled to the privilege of the Rifle Association.

Credits

Students securing a First Grade University Colour will be given credit for P. T. 10, 11, 20 or 21.

Students securing Second Grade University Colour will be given one term's credit for P. T. 10, 11, 20 or 21.

Students will be excused from Physical Training 10, 11, 20 or 21, while practising for University teams.

Students must present doctor's certificates to be excused for failure to attend regular classes for P. T. 10, 11, 20 or 21.

Students must attend ninety per cent. of the training hours for credit.

10. **Physical Training for Women:** required of all women students of the first year—an elective autumn activity and an elective winter activity. The gymnastics include Swedish gymnastics, calisthenics, simple folk and artistic dancing, basketball, etc.

2 hours per week: 1 credit.

11. **Physical Training for Men:** required of all men in the first year. This course consists of one elective autumn activity and one elective winter activity.

2 hours per week: 1 credit.

20. **Physical Training for Women:** required of all women students in the second year—an elective autumn activity and an elective winter activity. The gymnastics include Swedish gymnastics, calisthenics, advanced folk and artistic dancing, basketball, etc.

2 hours per week: 1 credit.

21. **Physical Training for Men:** required of all men in the second year. This course consists of one elective autumn activity and one elective winter activity.

2 hours per week: 1 credit.

30–40. **Advanced Physical Training for Women:** optional for women of the third and fourth years. Open only to those who have had Physical Training 10 and 20. This course consists of one elective autumn activity and one elective winter activity.

2 hours per week each year: 1 credit each year.

31–41. **Advanced Physical Training for Men:** optional for men of the third and fourth years. Open only to those who have had Physical Training 11 and 21. This course consists of one elective autumn activity and one elective winter activity.

2 hours per week each year: 1 credit each year.

DEPARTMENT OF PHYSICS

REV. T. A. MACDONALD, M.A.,	Professor

All students taking laboratory work in Physics must make a deposit of five dollars with the Bursar to cover breakage; a refund of any surplus will be made at the end of the college year.

10. **Mechanics and Heat:** an elementary course covering the general principles, presented from a non-mathematical point of view. Optional for students in the General Course.

2 lectures and 3 laboratory hours per week: 3 credits.

Text-books: Merchant and Chant, *Mechanics for the Upper School.*
Stewart and Satterly, *Senior Heat.*
Watson, *General Physics.*

20. **Electricity, Sound and Light:** supplementary to 10, but requiring more mathematical knowledge.

2 lectures, 3 laboratory hours per week; 3 credits.

Prerequisites: Physics 10, Mathematics 18a and 19b, or 23b.

Text-book: Watson, *General Physics.*

30. **Physical Measurements:** lectures on laboratory methods and practical work with emphasis on precision. Training is given in contracted methods of calculation, graphical solution of problems, also in some of the simpler laboratory arts, such as glass-blowing, etc.

3 laboratory hours per week: 1 credit.

Prerequisite: Physics 20.

Text-book: Goodwin, *Precision of Measurements.*

Honour Courses

101. **Mechanics:** fundamental laws of statics and dynamics with applications to machines, elasticity, rotational motion, periodic motion; laws of liquids and gases; surface tension.

2 lectures, 3 laboratory hours per week, first term: 1½ credits.

Text-book: Duncan and Starling, *Dynamics.*

102. **Heat:** fundamental laws with applications, of thermometry, calorimetry, vapor pressure, hygrometry, conductivity, radiation; first and second laws of thermodynamics.

2 lectures, 3 laboratory hours per week, second term: 1½ credits.

Text-book: Edser, *Heat for Advanced Students.*

110. **Physical Measurements:** similar to 30; prescribed for students in the first year of the Mathematics and Physics course.

3 laboratory hours per week: 1 credit.

Text-book: See Physics 30.

201. **Sound and Light:** lectures on the principles involved, including an elementary mathematical treatment of reflection and refraction of light, mirrors and lenses, lens systems, dispersion, interference, diffraction, polarisation; wave-motion, propagation of sound waves, measurement of wave-length, velocity and pitch; musical scales, standards of pitch, characteristics of musical sounds, speech.

2 lectures, 3 laboratory hours per week, first term: 1 lecture, 3 laboratory hours per week, second term: 3 credits.

Text-books: Poynting and Thomas, *Text-book of Physics, Vol. II.*
Edser, *Light for Students.*

202. **Electricity:** lectures on the principles involved, including an elementary mathematical treatment of magnetic and electric fields, measuring instruments, electromagnetism, dynamos and motors, conduction through gases.

1 lecture, 3 laboratory hours per week: 2½ credits.

Text-book: R. W. Hutchinson, *Intermediate Text-book of Magnetism and Electricity* (Tutorial Press).

220. **Elements of Mechanics:** a mathematical treatment of the principles of statics and dynamics with numerous applications of physical principles.

2 lectures per week: 2 credits.

Text-book: Miller and Lilly, *Analytic Mechanics.*

300. Particle Dynamics: an advanced course in the dynamics of a particle making use of calculus and differential equations.

2 lectures per week: 2 credits.

Text-book: Loney, *Dynamics of a Particle and of Rigid Bodies* (Cambridge).

301. **Geometrical and Physical Optics:** a more advanced treatment of theoretical and applied optics, including an historical treatment of the development of the modern conceptions of light.

2 lectures, 6 laboratory hours per week: 5 credits.

Text-book: Houston, *A Treatise on Light*.

302. **Electron Theory of Matter and Electromagnetic Theory of Light:** a study of the development of Maxwell's equations for the electromagnetic field with applications to various magneto-optical phenomena.

1 lecture per week: 1 credit.

Text-book: As for 301.

303. **Properties of Matter and Heat:** a mathematical treatment of periodic motion, gravitation, elasticity, surface tension, osmosis, changes of state, laws of gases.

2 lectures, 3 laboratory hours per week: 3 credits.

Text-book: Edser, *General Physics*.

304. **Fourier Series:** an introduction to Fourier's analysis of wave-motion with applications to the theory of heat conduction, and to the vibrations of plucked strings.

1 lecture per week: 1 credit.

References: Byerly, *Fourier Series and Spherical Harmonics*.
Ingersoll and Zobel, *Mathematical Theory of Heat Conduction*.

400. **Electricity and Magnetism:** an advanced course: a discussion of the general phenomena of static electricity and magnetism; an introduction to the theory of potential and electromagnetic induction.

2 lectures per week: 2 credits.

Text:book: Starling, *Electricity and Magnetism for Advanced Students*.

401. **Recent Advances in Physics:** a course on selected topics with outside reading, including atomic theory, radioactivity, conduction through gases, magneto-optics, etc.

2 lectures per week: 2 credits.

References: Richardson, *Electron Theory of Matter.*
Rutherford, *Radioactive Substances and their Transformations.*
Zeeman, *Magneto-Optics.*
Thomson, *Positive Ray Analysis.*
Current Periodicals.

402. **Elementary Thermodynamics and Theory of Gases:** a treatment of the laws of thermodynamics, heat engines, reversible cycles, radiation, energy distribution.
2 lectures per week: 2 credits.

Text-book: Poynting and Thomson *Text-book of Physics, Vol. III.*

403. **Theory of Electricity:** an intermediate course, not essentially mathematical, consisting of topics selected especially for their historical and practical importance, including electrolysis, dissociation, radioactivity, elementary theory of alternating currents, generation and distribution of electrical energy, etc. Prescribed for third or fourth year students in the Honour Science Course. Offered in alternate years.
2 lectures, 3 laboratory hours per week: 3 credits.

Text-book: J. A. Crowther, *Ions, Electrons, and Ionizing Radiations.*

404. **Laboratory Course:** designed as an accompaniment to the lecture work of the fourth year. Especial emphasis is laid upon individuality of work and resourcefulness. As far as possible training is given in research methods.
9 laboratory hours per week: 3 credits.

408. **Seminar:** preparation and reading of articles from current magazines as well as historical essays. Prescribed for fourth-year students and optional for all students in the Mathematics and Physics course.
1 hour per week: 1 credit.

DEPARTMENT OF PUBLIC HEALTH AND BACTERIOLOGY

University College

A. J. SLACK, PH.C., M.D., D.P.H., Professor

Assumption College

W. J. BEASLEY, M.D., Lecturer

Waterloo College

R. G. RATZ, M.D., Lecturer

10. A series of lectures and demonstrations is given to students of the first year dealing with public health, preventive medicine and hygiene, and describing the essentials of bacteriology so far as applicable to modern life. Modern methods of handling and preventing infectious diseases; the sanitation of water, milk, food; flies and contact; the physiological principles involved in and the significance of ventilation, foods and feeding; water supplies, sewage disposal, vital statistics, infant mortality, etc., are included. All subjects are so treated from a practical standpoint as to outline the principles and show the general methods based upon them. Technicalities are avoided, the aim being not to train public health specialists, but to give that information which every educated person should have concerning the great advances of modern public health in order that he or she may be able to understand and fit in with them.

1 hour per week: 1 credit.

10 and 11. **Religious Knowledge:** Lectures, prescribed reading. Revelation in general; Pre-christian revelation; Christian revelation; Foundation and Marks of the Church; Nature of God; The Trinity; Creation; Redemption.

2 hours per week: 2 credits.

Text-book: Wilmers, *Handbook of the Christian Religion.*

20 and 21. **Religious Knowledge:** A course on the dogmatic and moral teachings of the Catholic Church; Grace, The Sacraments, Christian Morality, Basis of Morality, Duties towards God, Duties towards our neighbor, Capital and Labor. Lectures and prescribed reading.

2 hours per week: 2 credits.

Text-book: Wilmers, *Handbook of the Christian Religion.*

30. **Apologetics:** lectures and prescribed reading. De vera religione; religion in general; Revealed Religion; Divinity of the Christian Religion.

2 hours per week: 2 credits.

Text-book: A. Tanquerey, *Synopsis Theologiae Dogmaticae, Vol. I.*

31. An introductory course on the Bible; lectures. Inspiration; methods of interpretation; canonics; Biblical history.

1 hour per week: 1 credit.

References: Gigot, *General Introduction to the Study of Scripture.*
Seisenberger, *Practical Handbook of the Study of the Bible.*

40. **Apologetics:** lectures and prescribed reading. De Ecclesia Christi; Divine institution; constitution. De Fontibus

DEPARTMENT OF SECRETARIAL SCIENCE

MARGARET THOMPSON, Graduate, Kensington College, London, England, Instructor
LORNA BIRTLES, Graduate, Kensington College, Assistant
MABEL A. HYND, Assistant

Students are warned that the difficulty of adjusting timetables makes it impossible for those who are unable to pass the *final* tests of *each* year to take general Arts subjects of a succeeding year in conjunction with their Shorthand and Typewriting. Therefore students who fail to pass in one or more of their subjects are faced with the possibility of having to repeat an entire year.

25b. **Tabular and Graphic Construction:** instruction and practice involved in graphic and tabular methods of analysis and presentation.

1 hour a week, one term: ½ credit.

Shorthand and Typewriting

These two subjects are interdependent. As soon as speed has been attained by the student, combined tests are given weekly, and the student progresses in these subjects concurrently, unprepared matter being taken down in shorthand and transcribed on the typewriter. The Shorthand and Typewriting are organized into sections based on relative speeds. Should a student remain more than six weeks in any one speed section she must drop to the section below, and repass the test at the lower speed. To pass the tests the student's transcript must show not more than 2 per cent. error, and her shorthand notes not more than 5 per cent. error.

28-29. **Shorthand and Typewriting:**

Section A: theory of Pitman's Shorthand. Touch system in typewriting, care of machine, typewriting of correspondence and other straightforward work from printed copies.

Section B: 40 words per minute in shorthand, transcribed at 10 words per minute on the typewriter.

Section C: 50 and 60 words per minute in shorthand, transcribed at 12 and 15 words per minute respectively on the typewriter; work in centering and setting out on the typewriter.

12 hours per week: 6 credits.

Prerequisites: First year General Course without conditions: tests in spelling and writing.

Text-books: *Pitman's Shorthand Instructor.*
Pitman's Shorthand Dictionary.
C. E. Smith, *Practical Course in Touch Typewriting.*

35. **Office Practice:** the foundation of the work in Office Practice is laid in the third year. Lectures are given in office methods, and actual duties are undertaken in the Secretarial Science Office of the University.
6 hours per week: 3 credits.

38–39. **Shorthand and Typewriting:**
Section D: 70 and 80 words per minute in shorthand transcribed on the typewriter at 20 words per minute.

Section E: 90 and 100 words per minute in shorthand transcribed at 25 and 30 words per minute, respectively, on the typewriter; typing from manuscript and tabular work. Minimum typing speed required, 50 words per minute.
12 hours per week: 6 credits.
Prerequisite: Secretarial Science 28-29, Section C.

Text-books: See 28-29 above.

45. **Office Practice:** in the fourth year students are on duty every afternoon in the Secretarial Science Office; they are given the responsible work of the various members of an office staff, and learn to operate modern office equipment.
15 hours per week: 7 credits.

48–49. **Shorthand and Typewriting:**

Section F: 110 and 120 words per minute in shorthand transcribed at 35 words per minute on the typewriter. Minimum typing speed required, 60 words per minute.
6 hours per week: 3 credits.
Prerequisite: Secretarial Science 38-39, Section E.

Text-books: See 28-29 above.

Hyman, *A Laboratory Manual for Elementary Zoology.*

200. **Invertebrate Zoology:** for Honour Biology, Geology, General Science and B.A., M.D., students. The purpose of this course is to give a general idea of the important phyla leading up to the Chordates and to show from selected forms how the animal functions are carried out and what adaptations and advances are made as specialization increases.

2 lectures and 6 laboratory hours per week for one term: 2½ credits.

Prerequisites: Zoology 100 and Botany 100.

Text-books: Borradaile, *Manual of Zoology.*
Petrunkevitch, *Morphology of Invertebrate Types.*
Hyman, *A Laboratory Manual for Elementary Zoology.*

300. **Comparative Anatomy:** for students in the Honour Biology, Geology, General Science and B.A., M.D., courses; a course dealing with the structure and evolution of the Chordates.

2 lectures and 6 laboratory hours per week for the whole year: 5 credits.

Prerequisites: Zoology 200 and Botany 200.

Text-books: Kingsley, *Comparative Anatomy of the Vertebrates.*
Newman, *Vertebrate Zoology.*
Hyman, *A Laboratory Manual for Elementary Zoology.*
Hyman, *A Laboratory Manual for Comparative Anatomy.*

400. **History and Theory of Biology:** for students in the Honour or General Courses; a course dealing with the history, theory and problems of Biology.

2 lectures per week: 2 credits.

Prerequisites: Zoology 200 and Botany 200; or Zoology 22.

Text-books: Newman, *Readings in Evolution, Genetics and Eugenics.*
Locy, *Biology and Its Makers.*
Kellogg, *Darwinism of To-day.*
Bateson, *Mendel's Principles of Heredity.*
Morgan, *Experimental Zoology.*
Osborn, *Origin and Evolution of Life.*
Morgan, *Physical Basis of Heredity.*
Punnet, *Mendelism.*

401. **Experimental Zoology:** for students in Honour Zoology, Honour Biology and Honour Science; a course dealing with the biological reactions of animals. The course will consist of two parts; 401a given during the first term will deal with animal metabolism and physiology, 401b given during the second term will deal with tropisms, regeneration, genetics, etc. Either part will be available for Honour Biology students taking the Biology option during the fourth year and for Honour Science students.

8 hours per week: 4 credits.

Prerequisite: Zoology 300.

References: Jennings, *Behaviour of the Lower Organisms.*
Mast, *Light and the Behaviour of Organisms.*
Loeb, *Forced Movements, Tropisms and Animal Conduct.*
Roaf, *Text-book of Physiology.*
Morgan, *Regeneration.*
Sharpey-Schafer, *Experimental Physiology.*
Lillie, *Protoplasmic Action and Nervous Action.*
Child, *Physiological Foundations of Behaviour.*
Mitchell, *Text-book of General Physiology.*
Current Periodical Literature.

402. **Animal Ecology:** for Honour Biology and Honour Science students; a course in descriptive and physical animal ecology and zoogeography. In this course special problems will be assigned to the students.

2 lectures and 6 laboratory hours per week for one term: 2½ credits.

Prerequisites: Zoology 300 and Botany 300.

References: Ward and Whipple, *Fresh Water Biology.*
Needham and Lloyd, *Life in Inland Waters.*
Shelford, *Animal Communities in Temperate America.*
Borradaile, *The Animal and Its Environment.*
Pearse, *Animal Ecology.*
Chapman, *Animal Ecology with Special Reference to Insects.*
Wallace, *The Geographical Distribution of Animals.*

403. **Histology:** for Honour Biology students; a course dealing with the histology and cytology of animals.

8 hours per week for one term: 2 credits.

Prerequisites: Zoology 300 and Botany 300.

Text-book: Jordan, *Text-book of Histology.*

404. **Embryology:** for Honour Biology students; a course dealing with the embryology of animals.

8 hours per week for one term: 2 credits.

Prerequisites: Zoology 300 and Botany 300.

Text-book: McEwen, *Text-book of Vertebrate Embryology.*

406. **Entomology, Morphological and Systematic:** for students in Honour Biology and Honour Science; a course dealing with the elementary morphology, life histories and classification of insects.

2 lectures and 6 laboratory hours per week for one term: 2½ credits.

Prerequisites: Zoology 300 and Botany 300.

This course is optional with 402 for students who intend to

pursue further work in Entomology in this or some other university.

Text-books: Comstock and Kellogg, *Insect Anatomy.*
Comstock, *An Introduction to Entomology.*
Imms, *A General Text-book in Entomology.*

408. **Animal Phylogeny:** for students in Honour Zoology; a course dealing with the phylogenetic relationships of animals, with particular attention to vertebrate descent.

4 hours per week; 2 credits.

Prerequisite: Zoology 300.

Text-books: Pratt, *Manual of the Common Invertebrate Animals.*
Pratt, *Manual Vertebrate Animals.*
Newman, *Vertebrate Zoology.*
