The Board of Governors,  
The University of Western Ontario,  
London, Ontario.

Gentlemen:

I have the honour to present to you my report upon the University for the academic year of 1938-1939.

Respectfully yours,

W. Sherwood Fox  
President and Vice-Chancellor

-----  
OBITUARY

Dr. Arthur M. Overholt

On August 24, 1938, the University suffered a great loss in the sudden death of Arthur M. Overholt, LL.D., who for many years had served in the Senate as a representative of the Secondary Schools of Western Ontario. Having once been a member of the teaching staff of the London Collegiate Institute he was intimately acquainted with the problems of the University and thoroughly interested in its progress. He was ever a ready and wise counsellor. He contributed much to the expansion of the University's service in Western Ontario.

Professor Emeritus W.J. Patterson

In the course of the year Professor Emeritus W.J. Patterson passed away. He first joined the Faculty of Arts thirty-three years ago, directing the courses in Mathematics and Philosophy. His brilliant undergraduate attainments in Queen's University and his post-graduate studies in Clark University, Worcester, Mass., qualified him to undertake instruction in both of these important departments. Later he became head of the single Department of Mathematics. In 1922 because of advancing years he retired from the headship but continued to conduct a few courses in Higher Mathematics. Finally the burden of ill health compelled him to relinquish teaching altogether. Many generations of students will remember him as a vigorous thinker, a thorough teacher and as a man of the highest character.

Dr. George B. Sage

Dr. George B. Sage, who had been associated with the University from its opening, died on August 21, 1938. At the time of his retirement only a year or two ago he had been continuously a member of the Faculty of Arts for

fifty-six years. Though serving on only a part-time basis he exerted through unusual force of character and alert mentality, a strong and lasting influence in the University. His activities lay chiefly in the field of Philosophy. Many students will carry throughout their lives vivid recollections of his presentations of the vital problems of Logic and Ethics. As a living link between the University and Huron College he helped greatly to establish the foundations of the principle of collegiate affiliation in the development of a great university.

It is with the deepest sympathy that we record the losses of leaders in affiliated colleges.

Reverend George Sandrock, Waterloo College

Reverend George Sandrock was Professor of Hebrew and Old Testament in Waterloo Theological Seminary from 1931 to 1937. In this latter year he retired from the task of instruction to spend the remainder of his life in Bellevue, Iowa. On September 25, 1938, he passed away at the age of seventy-one. He is remembered by his former colleagues as a strong scholar and forceful teacher.

Father Henry S. Bellisle, Assumption College

Assumption College was bereaved during the Christmas season of 1938 by the passing of Father Henry S. Bellisle. He held the dual position in the College of Vice-President and Professor of Philosophy. His death brought to an end a distressing illness of several months. A native of Ontario and a graduate of the University of Toronto he brought lustre to this province through his scholarly attainments and services to education. He is one of those who have been chiefly responsible for the remarkable development of the Institute of Medieval Studies at St. Michael's College, Toronto. The University of Western Ontario is deeply conscious of the leadership he gave to scholarly achievement in Assumption College, a leadership whose influence appreciably touched the whole University.

Arthur Philemon Coleman, LL.D. '22

The ranks of our honorary alumni have been broken by death. Early in 1939 there passed away in Toronto Arthur Philemon Coleman, the most eminent of Canadian geologists, at the great age of eighty-seven years. In 1922 he retired from active teaching in the University of Toronto with the title of Professor Emeritus. Our University has had the distinction of being the first to confer upon him an honorary degree, the degree of Doctor of Laws being accorded him in 1922.

Mrs. John Jacob Hoff

The former Hellmuth Ladies' College was one of the institutions out of which the University of Western Ontario has sprung. Consequently, its alumnae are regarded as close associates of the University's graduate body. In December there died in Switzerland the most distinguished alumna of the Hellmuth Ladies' College, Mrs. John Jacob Hoff, formerly Grace Whitney of Detroit, who was a

student in London long before the founding of the University. In 1934 she accepted from the Senate the honorary degree of Doctor of Laws, the first woman to be offered this honor in the University's history. Her plans to come to London to receive the degree were frustrated by an illness which terminated in death in December last. Though for years permanently residing in France, she maintained interest in educational and philanthropic work for women in North America as well as in France itself. She was buried in her native city of Detroit; Professor Landon represented the University at the funeral ceremonies.

-----  
EVENTS OF THE UNIVERSITY YEAR

(1) The University's Diamond Jubilee -- 1878-1938

On October 14 and 15 the University formally celebrated the sixtieth anniversary of its founding. It was in March of 1878 that the original charter was granted by the Government of Ontario. The Diamond Jubilee ceremonies were most impressive. The account which follows is copied from the text of the proceedings published by the Board of Governors. The complete text includes the addresses delivered by His Excellency, Lord Tweedsmuir and by Principal R.C. Wallace of Queen's University.

Most fittingly, the first of the ceremonies was a religious service. Through a happy coincidence 1938 marks two major anniversaries in the University itself. Thus the divine service held in St. Paul's Cathedral in the evening of October 12th was at once a recognition of the University's origin and a public acknowledgement of gratitude to Providence for the blessings of the past. With ideal appropriateness the preacher was the Very Reverend Arthur Carlisle, Dean of Montreal, a graduate both of the University and of the College. The others who took part in the service represented the Diocese of Huron, the College and the University. The large congregation present were deeply impressed by the message of the preacher and the dignity of the entire service.

In the afternoon of October 14th before a company of the Faculty, graduates, and students, the University paid its tribute to the devoted service given in the Great War by the University's own unit, the 10th Stationary Hospital of the Canadian Expeditionary Force. The climax of the tribute was the unveiling and dedication of a beautiful memorial tablet. This tablet, placed in the spacious entrance of the Main Building of the College of Arts, will for all time to come keep alive the names of all the members of the original unit. The dedication address was delivered by the Right Reverend R.J. Renison, Rector of St. Paul's Church, Toronto.

The day was suitably ended by a banquet of the General Alumni Association held in the Hotel London -- the largest and most successful function of the kind in the University's history. The guest speaker was Principal R.C. Wallace of Queen's University, who brought, in his usual charming and forceful way, a most timely message -- "A Graduate Looks At Education." The rest of the programme recognized in topics and speakers every phase of the University's academic life -- the University as a whole, the Affiliated Colleges, the graduates of all three Faculties.

Of the Jubilee Convocation held in the morning of Saturday, October 15th, only the briefest word is needed, since the full text of the proceedings follows. Suffice it to say that its impressiveness was enhanced by the presence of Her Excellency, the Lady Tweedsmuir, wearing the scarlet academics of the University of Toronto into whose membership she had been received the day before. His Excellency gave the Jubilee address, a most inspiring message.

At noon the Board of Governors tendered a luncheon to His Excellency and representatives of sister institutions. At the same hour the Local Council of Women, acting in coöperation with the University, extended similar hospitality to Her Excellency. At neither function was there any programme other than the expression of a few words of welcome by hosts and hostesses to their guests.

In the afternoon was played Western's annual "home" football game with Queen's at which the Governor-General and other recipients of honorary degrees were special guests. Through the joint operation of a somewhat superior proficiency in football and of a sense of the fitness of things that seemed to preside over the day, Western's team won a hard-contested game.

The celebrations were brought to a close by the Alumni Jubilee Ball.

## (2) Spring Convocation Week

The annual Baccalaureate Service was held in the Dundas Centre United Church in the evening of Sunday, June 4. The Reverend W.A. Cameron, Pastor of the Yorkminster Baptist Church, Toronto, preached the Baccalaureate Sermon. The pastor of the Dundas Centre Church, Reverend Dr. C.V. McLean and the President of the University also took part in the service.

Convocation was held on June 7th in the J.W. Little Memorial Stadium and will long be remembered as occurring on the day of the visit of Their Majesties, The King and Queen to London. The special speaker was Harcourt Alexander Morgan, Chairman of the Tennessee Valley Authority, Knoxville. He was admitted by the Vice-Chancellor to the honorary degree of Doctor of Laws as was the Right Honorable Sir William Mulock, Chancellor of the University of Toronto. The honorary degree of Doctor of Divinity was conferred upon Reverend John Schmieder of Kitchener, former Chairman of the Board of Governors, Waterloo College.

After Convocation, through the courtesy and coöperation of the Faculty Women's Club, a reception was tendered to the members of the graduating class, their parents and friends, and the delegates of the Canadian Chemical Association.

## (3) Autumn Prize Day Exercises

The celebration of the University's Diamond Jubilee in October made it necessary to postpone the regular Autumn Prize Day Exercises. These were finally held on November 11th in the course of the morning lectures in Convocation Hall between the hours of eleven and twelve. The special speaker was John Dearness B.A. '02, M.A. '02, LL.D. '26, one of the oldest and best known graduates of the University. Out of a long experience in life and in educational work Dr. Dearness brought a most interesting and stimulating message to the students receiving

their degrees and awards from the Vice-Chancellor on this occasion.

(4) Inauguration of a System of Retiring Annuities

It is with a deep sense of gratitude to the Board of Governors that the President records here the success of the Board in establishing during the year a system of retiring annuities for the members of the Faculties and for other employees of the University. The fact that the Board has taken this important step at a time when the financial problems of ordinary administration of the University were very exacting only enhances the beneficiaries' appreciation of what has been done for them. For reasons that need no elucidation this action of the Board of Governors will add appreciably to the University's strength and influence.

The system of annuities finally adopted is probably unique among Canadian universities. It involves the cooperation of four of the strongest Canadian insurance companies and the Annuities Department of the Dominion Government. Associated with it is a type of group life insurance adapted to university conditions. The scheme is such as to be susceptible of changes that may be necessary from time to time to improve its effectiveness.

(5) Encouraging Development of the University

Human nature is such as to find it practically impossible to measure progress in essentials over short stages. For instance, it is exceedingly difficult to point convincingly to progress in these matters made by a university in the course of a single year. Growth in numbers and equipment is readily appraised, but not so the growth of mind, spirit and influence. These require years to become demonstrable.

An opportunity has just come to perceive clearly the advance achieved by Western. This was afforded by the task of assembling the summaries of the University's activities for the past ten years. Perusal of the large volume produced reveals striking progress in every worthwhile department of work. Perhaps the most outstanding feature is the great increase in the amount of research undertaken, completed and published. While the room for the enlargement of this comprehensive field is still vast, yet it is gratifying to have before one's eyes a demonstration that so much has actually been accomplished. The number of distinguished recognitions awarded to members of the Faculties and to graduates is conspicuously greater. The steady annual increase in the requests coming from various parts of Canada for speakers from the University staff is clear proof of the expansion of the University's influence in many phases of the nation's affairs.

In at least one respect -- and perhaps in more than one also -- material growth is an indication of the other and more subtle growth which a university seeks chiefly to attain: the increase in registration in most departments has been accompanied by evidences that it is due to a realization of the strength and soundness of the University's instruction and to the fine spirit dominating the life of the student body. All of these revelations coming from the survey of a decade are laden with encouragement regarding Western's bright prospects for the future.

(6) New Members of the Board of Governors

Dr. A.S. Duncan, M.L.A. was appointed to the Board of Governors as one of the four members representing the Province of Ontario.

Mr. Allan Johnston, Mayor of London, for 1939 became ex officio a member of the Board of Governors upon the assumption of his civic office.

Mr. John A. Crawford, Strathroy, became ex officio a member of the Board of Governors upon his election as Warden of the County of Middlesex.

(7) St. Peter's Seminary College of Arts -- A New Affiliation

In the course of the year St. Peter's Seminary, London, whose students in Arts courses have for many years been registered annually in the University through Ursuline College applied for direct affiliation to the University. After satisfying the Senate that the Seminary had met all the University's requirements for staffing a college of Liberal Arts, the Senate recommended to the Board that the Seminary be admitted to affiliation. The Board accepted the recommendation and beginning with the academic year of 1939-40 the Arts classes of the Seminary will be conducted in the name of St. Peter's Seminary College of Arts. The Rector of the College is Monsignor A.P. Mahoney. Like each other college of the Federation, St. Peter's will shortly have its quota of representatives on the Senate and other educational bodies of the University.

(8) Western Ontario Conservatory of Music -- A New Affiliation

In the President's report of last year will be found a statement setting forth the fact that a group of citizens had formed an independent board and taken over from the University the direction of the Western Ontario Conservatory of Music. This change took place only shortly more than a year ago. In this time the Director of Music, Mr. Harvey Robb, reconstituted the staff of the Conservatory, drew up a syllabus of the highest order, and prepared to conduct examinations leading to appropriate certificates and diplomas. His Board then applied to the University Senate for formal affiliation. The Senate, after adequate investigation, was satisfied that the standards of the Conservatory were of the highest and that the new management was able to maintain the musical activities continuously, recommended to the Board of Governors that the application be granted. The Board accepted the recommendation. The Conservatory is now formally affiliated to the University, a relationship that will now give validation to the Conservatory's certificates and diplomas.

Mr. Harvey Robb was appointed Director of Music in the University. His report upon the programme that was carried out will be found elsewhere.

(9) Announcement of Increase in Tuition Fees

The reduction in provincial grants to Western, Toronto and Queen's universities made an increase in fees imperative in these three institutions. In a conference in which representatives of the Department of Education and these Universities took part it was agreed that a uniform addition of \$25.00 to the fees of each student would be fair to the students and universities alike. It was understood that each university was free to designate the increase in a way

that would best serve its own individual conditions. After a thorough survey of her particular conditions, especially those resulting from her system of affiliated colleges, Western decided to call the increase an Annual Registration Fee rather than an addition to Tuition Fees. The terminology makes no difference to the student, since in either case he pays the same amount. The matters affect solely the internal financial affairs of the University itself. It should be noted that the payment of the Annual Registration Fee exempts full-time students from the payment of the First Registration Fee, the latter being now absorbed by the former.

(10) Addition to Victoria Hospital

It is with great satisfaction that one is permitted to record the final decision of the Council of the City of London to proceed immediately with the erection of the long-planned addition to the buildings of Victoria Hospital. The completion of this building which includes the Meek Memorial Laboratories, will increase substantially the teaching facilities of the Faculty of Medicine and will remove many of the disabilities which have hampered the work of instruction in Medicine for many years.

(11) Faculty and Institute of Public Health

The report of the Dean of the Faculty of Public Health reveals again, as in every previous year, a large increase in the number of laboratory examinations for the year. The exact number is 99,005, an increase of 8.97 per cent. Obviously, this augmented burden means a steady increase in the staff. However, through careful thought exercised by the Director, the increase has not been proportionate to that in the number of examinations, but the situation is such as to make clear the need for more additions to the staff in the not distant future. This fact stresses the need for greater income for this important department of the University, a department that touches intimately every municipality of Western Ontario.

It is also obvious that a continued increase in laboratory examinations makes it necessary to augment the amount of space in the Institute available for laboratory and allied purposes. Preparations are being made to divert for such purposes rooms hitherto employed otherwise. But this process of adjustment can continue only within the limit marked by the four walls of the building. If the present rate of increase is maintained or exceeded, enlargement of the present quarters or the erection of a new building will be imperative.

(12) Summer Schools

The nature of the reports on the Summer Schools is such as to merit special attention. The most impressive fact brought out concerning the attendance of summer students in London is that last summer the students were so numerous as to tax the building accommodation of the University College of Arts. If the growth of registration continues the Administration may find it necessary to limit it. Thus in an unexpected way the need of an enlargement of the equipment of University College is brought home.

This year the President was able to pay an official visit to the University's Summer School for French at Trois-Pistoles, Quebec. Although the attendance was slightly less than in 1938, the spirit of work and the results seemed to be better than ever before, which is the best possible kind of growth an

educational institution can have. The relations between the citizens of Trois-Pistoles in particular, and of the Province of Quebec in general, are becoming closer every year. The University has good reason to be proud of its branch in Trois-Pistoles because of its effect in promoting understanding between the two great elements in the population of Canada, as well as because of its success in attaining its immediate object, enabling English-speaking students to acquire a ready command of French.

(13) Changes in Student Organization

On their own initiative the students have made a number of changes, all of them improvements, in the set-up of their leading organizations. Probably the most significant are the changes that provide for continuity of administration from year to year. In the past considerable difficulty has been experienced each autumn because the new student officers entering upon their offices at the beginning of the winter session had lost touch with the officers of the preceding year. This was especially true of the senior offices since they are generally held by students who leave the University at the time of graduation at Spring Convocation. In this way the incoming officers often were without guidance as to the duties of their offices. The new changes have put an end to this state of affairs. Elections now take place sometime between February and April and the new incumbents then enter upon their several offices amply supplied with the information and the documents required for an intelligent understanding of their duties and obligations. The innovation will greatly enhance the students' administration of their own activities.

(14) Freshman Week

Any human institution that has any genuine vitality within it is subject to an evolution of some sort. Ten or twelve years ago Western embarked upon the plan, then unknown among Canadian universities, of devoting the larger part of the first week of the autumn term to making a special effort to facilitate the orientation of Freshmen to university life. The first endeavor was so successful that the University adopted it as the basis of a routine for each entering Class. But this successful experiment revealed where changes could be made to advantage. In the autumn of 1939 certain changes are to be made effective.

Formerly on the evening of the Monday of registration week the Board of Governors tendered a dinner to the entire Freshman group; at the close of this members of the Administration and Faculty gave a series of addresses on topics of vital interest to newcomers. The dinner was followed by a reception and dance. On the two succeeding days the men and women of the class were assembled in separate meetings to receive messages relevant to each group.

Since it has been felt that the after-dinner talks were of necessity too brief to permit adequate development of subject matter, the Faculty has decided to omit the dinner this year and to substitute for the former sketchy talks a series of orientation lectures, each of an hour's duration, to be delivered during the week from Tuesday to Friday. This change will permit speakers to select worthwhile subjects and to develop them with a measure of thoroughness. The Reception is to be retained. The President is convinced that the general plan of helping Freshmen to adjust themselves quickly to their new environment is sound and even indispensable. A progressive improvement in the plan may be expected.

(15) The University at the Western Fair

Again this year the University was represented at the Western Fair by a large and imposing exhibit. In the main the same departments contributed to the exhibit as in the previous year; two or three departments, however, appeared for the first time. Undoubtedly, as the years go by there will be a few annual changes of this sort effecting ultimately a sort of cycle and thus affording a measure of variety. As before the interest of the public was captured and a new understanding and a stimulated appreciation of the service of the University were aroused throughout Western Ontario. The exhibit was generally regarded as one of the most outstanding in the Fair. The effort was highly commended on every hand and the University was urged to continue its annual exhibit.

-----  
NEEDS OF THE UNIVERSITY

In order that the pressing needs of the University may not be obscured by extensive comment and argument they are presented herewith in barest outline. The order in which they appear is not, to be taken as indicating the order of urgency.

Increased income to make possible:

- (a) the complete restoration of salaries;
- (b) the raising of the whole scale of salaries.

A dormitory for women students.

A field-house and swimming pool associated with a building to serve as the centre of the students' social life.

An enlarged or a new building to serve the rapidly increasing work of the Faculty of Public Health.

Additional buildings for the University College of Arts; between the increase in registration in both Winter and Summer sessions and the increase in the number and varieties of educational activities, the present buildings are used to the limits of their capacity.

Establishment of special funds to maintain:

- (a) a more extensive programme of research;
- (b) expansion of the libraries and of their services;
- (c) bursaries, scholarships and fellowships for talented students of limited means;
- (d) special lectureships.

Installation of a high-grade electric organ in Convocation Hall.

### VISITORS

The life and thought of the University was enriched as in previous years by the visits of a number of eminent visitors. Of these visitors we may mention several.

In October Hugh Sellon, M.A. of the University of Oxford spent the better part of a week in the University. With groups of the Faculty and Students he discussed the outstanding problems of international affairs. He also addressed a public meeting, dealing chiefly with the attitude of Germany, at which many citizens of London were present. Mr. Sellon's visit was made possible through the cooperation of the Institute of International Education, New York.

Sir Edward Mellanby, the distinguished British authority on nutrition and on vitamins in particular, conferred with a number of members of the Faculty of Medicine in the course of a visit to London on October 3. In the large audience of citizens whom he addressed in the evening of that day were many members of the University staff and student body.

On November 23 the Honorable Norman Rogers, Minister of Labor in the Federal Government, spoke to a large group of the staff and students representing chiefly the Department of Political Science and Economics.

In the month of January, Dr. Fred C. Zapffe, Secretary of the Association of American Medical Colleges, spent several days in the Medical School conferring with administrative officers of the University and, both singly and as a group, with senior members of the Faculty of Medicine.

Early in February Professor Charles Drummond Ellis, Wheatstone Professor of Physics, King's College, University of London, made a sojourn of nearly a week in the University. Ample opportunity was given him to confer intimately and at leisure with members of the Department of Physics and allied departments in the Faculties of Arts and Medicine. He addressed a meeting of scientists of the University, of the secondary schools of Western Ontario, and of various industrial concerns of the region that are interested in the basic problems of physics and in the most recent discoveries in that and associated fields of investigation. His visit was most encouraging and inspiring in regard to activities already undertaken and planned by the University.

On April 11, Dr. Hans Simons, the eminent German authority on international affairs, now resident in New York, spoke to a group of staff and students. As usual Dr. Simons presented a very penetrating and clear analysis of the situation in Europe. For his visit the University is indebted to the London Branch of the Canadian Society for International Affairs.

Professor Anton de Haas, Professor of International Affairs, Harvard University, addressed a joint meeting of the Faculty and Students of the Departments of Business Administration and Political Science and Economics on April 3rd.

The special speaker at Spring Convocation, June 7, was a former Canadian, a native of Strathroy and a graduate of the Ontario Agricultural College, Class 1889. Dr. Morgan was President of the University of Tennessee from 1919 to

1933 and since the latter date has been a member of the three-man commission directing the Tennessee Valley Authority. In 1938 he became Chairman of the Commission. His address on the meaning of democracy and the application of its principles to national life was most comprehensive, timely and convincing.

Also at Spring Convocation was present the venerable Chancellor of the University of Toronto, Sir William Mulock, now in his ninety-sixth year. Upon receiving, along with Dr. Morgan, the honorary degree of Doctor of Laws, he brought a brief fraternal message from the University of Toronto. His appearance at Convocation with Dr. Morgan marked the fiftieth anniversary of the day -- most remarkably, also a June 7 -- on which as Vice-Chancellor of the University of Toronto he conferred the Bachelor's degree upon Dr. Morgan.

-----  
THE UNIVERSITY AS HOST

On June 22 and 23 the Ontario Historical Society held its annual meetings in London. In the afternoon of the second day the members conducted their session in the open air on the grounds of University College to the south of the Lawson Memorial Library. Afterwards tea was served indoors in the Reference Reading Room.

The Chemistry Department of the University played no small part in the organization of the Chemical Convention held in London on June 5, 6, 7, 8, when more than 300 Canadian chemists attended. Dr. J.A. Gunton, Professor J.W. Burns, Dr. W.K. Huntten, Dr. C. Sivertz. A. Gordon Adams, M.D. '30, Mr. Keith Watson, Miss Pauline Faust, B.A. '32, T.A. Fleming, B.A. '30, M.A. '33, J.H. Childs, B.A. '37, and T.W. Stewart were all busy making plans for the business and social sessions. The chemists took in the royal visit and were also guests at the annual Convocation exercises and at the President's reception which followed. Members of the Faculty of the University delivered papers to the various sections of the general meetings.

Meetings of the Western Ontario Chemical Association were held in the Science Building of the University on December 13, January 23, March 8, and 16, and April 21.

The annual meetings of the Canadian Association of Textile Chemists and Colorists were held in the Science Building.

Under the auspices of the Department of Education of the Province there was held at the University of Western Ontario during August of 1938 a two-weeks' course in library methods for librarians of smaller libraries in Western Ontario. There were twenty enrolled, and the instruction was in charge of Miss Dorothy Carlisle, of Sarnia Public Library. Special lectures were also given by Professor Fred Landon, Librarian of the University, and by Mr. Angus Mowat, Provincial Inspector of Libraries. This was one of two such courses given in Ontario in 1938. It was announced that during the summer of 1939 three such courses would be given in different parts of the Province.

REGISTRATION SUMMARY

1938-1939

Whole University

REGISTRAR'S DEPARTMENT

19

Registrar: K. P. R. Neville, M.A., Ph.D.  
 Associate Registrar: Helen M. Allison, B.A.  
 Assistant Registrar: Olga A. Miller, B.A.

- (1) The total of 2382, as contrasted with 2286 shown in other tables, includes 96 students who registered late.
- (2) It is interesting to note that last year's net registration is exactly the same as this year's.
- (3) There is an increase of 33 students or 2.61% in full-time registration.
- (4) The increase in full-time students in the University proper (exclusive of affiliates) is 21 or 2.48%.

OCCUPATIONS OF STUDENTS' PARENTS<sup>1</sup>

UNIVERSITY COLLEGE - STUDENT-CREDIT-HOURS BY DEPARTMENTS (continued)

Summary of Findings

1938-39

The average intramural teaching-load of the faculty (including the part-time staff) is 197.161 student-credit-hours a week, an increase of 5.297 student-credit-hours over the 1937-38 load.

The average intramural teaching-load of the faculty (including only full-time staff) is 230.477 student-credit-hours a week, a decrease of 9.123 student-credit-hours over the 1937-38 load.

The average intramural teaching-load of the faculty (including only the part-time staff) is 95.361 student-credit-hours a week, an increase of 18.261 student-credit-hours over the 1937-38 load.

Only the intramural teaching-load has been taken into consideration in making comparisons between 1938-39 and 1937-38, because the faculty-members are paid additional salaries for the work they do in the Summer School, Extension, and Extramural Departments.

The heaviest load of the year was again that of Dr. Liddy (for the third consecutive year), who taught 703 student-credit-hours, 539 intramurally, and 164 in the Extension and Extramural division. The second-highest intramural load was carried by Professor W.A. Thompson, who taught  $528\frac{1}{2}$  student-credit-hours intramurally. Dr. Frances Montgomery had the second-highest total load, with 580 student-credit-hours, 412 intramurally and 168 in the Extension and Extramural division.

The whole Faculty of Arts (University College only) showed an increase in student-credit-hours in 1938-39 over 1937-38:

Summer School	Decrease of $172\frac{1}{2}$
Extension Dept.	Decrease of 144
Extramural Dept.	Increase of $6\frac{1}{2}$
Intramural classes	Increase of $688\frac{1}{2}$

---

Net increase of  $378\frac{1}{2}$

# Of the 19 students shown above as coming from the other Canadian Provinces and Newfoundland, 7 are graduate students (3 of whom are registered in Intensive Business Administration at a tuition fee of \$200 each, and 4 are acting as Demonstrators on the Science staffs). Three others are undergraduates who are sons and daughters of graduates of our own institution. Some of the United States students in Medicine are also sons of our graduates. The one student from Denmark pays double tuition fees.

UNIVERSITY COLLEGE

Dean: K.P.R. Neville, M.A., Ph.D.

There has been no change or experiment of importance in our academic program this past year. The provision made for expansion in Economics and Business has proved of decided benefit to these departments partly by reason of the type of individuals who were secured to carry on the work. But it seems that the time has come for us to spend a good deal of energy in examining our objectives and more still our methods of instruction in every department. Our methods have become stereotyped in many phases, perhaps the present form is the best for the moment. But change is being forced on the world in every sphere: nowhere more than in education. It is worth our while justifying the faith that is in us. Individually the men in a department may be of a high class while the department lacks cohesion, purpose, effectiveness. Cohesion of departments is necessary too for an integrated university program. Team work is as essential in education as in athletics.

For the first time since the reorganization of the University in 1908 death invaded the ranks of the full-time staff. Professor W.J. Patterson, Professor Emeritus of Mathematics, died in March, 1939. Archdeacon G.B. Sage who had been connected with the staff longer than any other man died in the summer of 1938 after continuous part-time service in Arts since the organization of the work in 1882.

Probably the one item that affected the staff most vitally and widely was the institution by the Board of Governors of a pension and insurance scheme to which reference has been made in previous reports. While there were and are still admitted drawbacks in the plan, the advantages are so predominant that there is no doubt about the ultimate satisfaction the provision will bring to all participants, especially after the first few experimental years have passed and procedure becomes more nearly normal.

It is anticipated that the two members of the staff, Professor Stiling and Mr. Gar Elson, at present on leave of absence will resume their work next year. But the new man added to the Department of Mathematics, Dr. Hugh Dowker, resigned at the end of the year to become assistant to Dr. John von Neumann of the Institute of Higher Studies at Princeton University. His successor has not yet been found.

The distribution of staff for the year has been as follows:

Professors Emeriti	3
Professors	19
Associate Professors	16
Assistant Professors	13
Instructors	13
Lecturers	6
Assistants	9
Demonstrators	16
Clerical	8
	<hr/>
	103
Duplicates	6
	<hr/>
	97

It appears inevitable that as time goes on we shall find the higher ranks growing in numbers at the expense of the lower. This should mean an increase in salary costs for which no provision seems temporarily possible.

Changes in the Faculty will be found elsewhere in the summary of all changes of this kind in all departments of the University.

Again I would record my appreciation of the co-operation received from all departments of the University on which duties of office make us depend.

-----

FACULTY OF MEDICINE

Dean: F.J.H. Campbell, B.A., M.D., M.R.C.P., F.R.C.P.(C)

Following the session of 1938-1939 the Faculty of Medicine graduated twenty-eight students at the Spring Convocation and one candidate was granted the degree of Master of Science. The twenty-eight graduates have all obtained internships or teaching appointments for the current year. They were all successful in the Dominion Council Examinations.

Requests regarding post-graduate studies are continually being presented to the Faculty of Medicine. These requests are for advanced courses in the laboratory sciences leading to degrees of the Royal College of Physicians and Surgeons. In addition requests are also coming in for instruction in the clinical departments. In some cases refresher courses are asked for, in other cases quite detailed and comprehensive courses of instruction. It is, of course, impossible with our present staff to take care of all these requests without interfering with under-graduate instruction and research, our normal essential activities. Some measure of approach, however, can be effected. This spring the Department of Anatomy gave a review course for candidates wishing to try the primary examination of the Royal Colleges. The Department of Physiology held a series of seminars during the academic year for a similar purpose. With the prospective rebuilding of Victoria Hospital next year, the clinical departments will find difficulty in carrying on under-graduate instruction even without the additional load of many post-graduate activities, though a post-graduate course is again projected this fall for physicians of the district.

It should be pointed out that some of our Departments operate all the year round. The Departments of Pathology, Bacteriology, and Pathological Chemistry are responsible for a continuous service to Victoria Hospital.

In February Dr. Fred Zapffe of Chicago, Secretary of The Association of American Medical Colleges, made a three-day survey of the Medical School. In his report, recommendations were made to increase efficiency and to keep the School in line with the best practice of recognized institutions.

On account of the tremendous advance in medical knowledge in the last two decades, it seems necessary to change the technique of medical instruction to meet the requirements of the times. A comparison of the course in Medicine twenty years ago and that of today shows vast changes in technique of instruction and in emphasis upon subject matter. This means an almost continuous change in curriculum and method. For this reason, occasional inspections of the School by recognized authorities are very desirable.

The enrolment for the Faculty of Medicine for the session 1938-1939 was 212 students, including the first year.

A sub-committee of the Faculty Council, with the Dean as Chairman, has been the nucleus of the Committee on Medical Education of The Canadian Medical Association for the last four years. During the last year recommendations from this Committee, after consultation with the various bodies involved, were presented to and accepted by The Canadian Medical Association for coördination of the various medical services of Canada, including under-graduate instruction, interne education in hospitals, post-graduate facilities, and medical licensure. In addition, the Committee on Medical Education of The Canadian Medical Association submitted a report dealing with irregular practitioners and schools of therapy. The problem of degrees conferred by Universities at the time of graduation and after graduation in Medicine was also studied.

Dr. A.S. Duncan, M.L.A., was appointed to the Faculty Committee of the Board of Governors to succeed Mr. Justice J.G. Gillanders recently appointed to the Supreme Court of Ontario.

Promotions include the following: Dr. G.A. Ramsay to Professor of Orthopaedic Surgery, and Dr. R.A. Johnston to Assistant Professor of Surgery. Additions to the staff include Dr. N.W. Roome in the Department of Surgery and Dr. H.B. Hitchcock in the Department of Biology.

Dr. E. Seaborn began a series of lectures on Medical Ethics to the final year, while Dr. D.J. Ferguson introduced a series of lectures in Stomatology.

-----  
INSTITUTE OF PUBLIC HEALTH

Dean: A.J. Slack, Ph.C., M.D., D.P.H.

The laboratories of the Institute provide a public health service to more than two hundred municipalities of Southwestern Ontario. The demand for this service continues to increase, the total number of laboratory examinations for the year ending June 30, 1939 being 101,936 as compared with 93,959 examinations for the preceding year, an increase of 8.49 percent. Each year sees new and important diagnostic tests added to the laboratory routine, and the value of this service in the promotion of health and the prevention of disease is impossible to estimate.

The free laboratory examinations made by the Institute include all of the free examinations made by the Central Laboratory of the Ontario Department of Health at Toronto. Certain other examinations, not included in the free routine of the Department, are made for a moderate fee; the revenue thus obtained is deposited to the credit of the University and serves to decrease the cost of operating the Institute. However, of the total number of examinations made during the year 99,005 or 97.1 percent were made without charge. The bare statement that there was an increase of 8.49 percent in the number of laboratory examinations fails to show that such an increase places an added burden on practically every member of the staff.

The Institute serves as a Distribution Centre from which antitoxins, vaccines, serums, insulin, silver-nitrate, outfits for the collection of specimens, etc., provided by the Provincial Department of Health are supplied to Medical Officers of Health, physicians and hospitals of Western Ontario. Exclusive of free

insulin 18,003 packages of free biological products were distributed during the year ending June 30, 1938, as compared with 17,429 packages for the preceding year. Free insulin, provided by the Ontario Department of Health and distributed by the Institute amongst patients in this district who were unable to pay for the insulin they required, amounted to 3,487,000 units, which is practically the same amount as distributed by the Institute during the previous year. The cost to the Ontario Department of Health for this one item, the free insulin distributed by the Institute of Public Health during the year, was \$6,155.68, one quarter of said cost being borne by the municipality in which the patient resides. The amount of pay insulin sold during the year was 363,800 units as compared with 354,800 units during 1937. Counting all biological products the average daily distribution from the Institute during the year was in excess of 90 packages, the cost to the Department of the individual packages varying from as little as a few cents for Smallpox vaccine to as much as \$18.00 per package for a prophylactic treatment for rabies.

Outfits for the collection of specimens are charged against the supply item in the annual Government appropriation for the Institute; therefore, every effort has been made to reclaim used outfits in order to conserve the supply item for actual laboratory supplies. During the year ending June 30, 1939, a total of 37,600 used outfits were reclaimed. The replacement value of the outfits reclaimed is \$3,035.50. This important saving has been effected without increase in staff but under most unsatisfactory conditions, as the only space available for reclaiming has been a basement store-room without windows or adequate ventilation.

For the second consecutive year an exhibit was entered at the Western Fair as part of the University Exhibit. The Institute exhibit featured the sanitation of water and milk supplies and its educational value was indicated by the many intelligent questions which were asked relative to the protection of these two commodities.

In the academic year 1938-39, twenty-seven students were registered in the post-graduate nursing courses offered by the Faculty of Public Health, nineteen of whom were full-time students, while the remaining eight were part-time students. Registration in the Public Health Nursing courses remains at a high level. It has been necessary to restrict registration in the first year of the Bachelor of Science in Nursing course to a maximum of fifteen candidates. We are accepting each year as many students in Public Health Nursing as can be provided with satisfactory field work. At the present time these students are obtaining practical field work under competent supervision in London, St. Thomas, St. Marys, Ingersoll, Kitchener and Windsor. One graduate received the Certificate of Public Health Nurse at the Autumn Convocation. There were twenty-two graduates at the Spring Convocation, five of whom received the degree of Bachelor of Science in Nursing, three the Certificate of Instructor in Nursing and fourteen the Certificate of Public Health Nurse.

In addition to the twenty-seven students registered in the Faculty of Public Health regular lecture courses were given to one hundred and twenty-three students registered in the Faculty of Medicine and one hundred and eighty-seven individual undergraduate nurses in the Training Schools of the three local hospitals.

At the end of April 1939 the Institute library contained eleven hundred and seventy-three bound volumes, one thousand and ninety-three of which have been catalogued in the Library of Congress classification. Two hundred and ninety-one books were catalogued during the year. Accessions during the year include two

hundred and five books and twenty-two bound volumes of journals while six hundred and twenty-one books and eight hundred and twenty-two journals were loaned. Our library has been carefully selected to meet the requirements of our staff and student body and is being used more than ever before. Its greatest drawback is lack of space and if it were large enough to accommodate a greater number of students it would be used to a much greater extent.

Lack of space for expansion is not peculiar to the library alone but as indicated in previous reports affects practically every department within the Institute. Although all branches of our work have shown marked increases in recent years the accommodation for students and for laboratory work has remained unchanged.

DEPARTMENT OF SUMMER SCHOOL AND EXTRAMURAL STUDIES

Director: H.R. Kingston, Ph.D., F.R.A.S.

The following is a brief report on the Summer School of 1939 and the Extramural Department for the academic year 1938-39.

The total Summer School attendance this year was 1106, an increase of 86 over that of last year. The table below gives some comparison figures for the years 1938 and 1939.

<u>SUMMER SCHOOL</u>	<u>1939</u>	<u>1938</u>
Number registered in university credit courses:		
London .....	355	345
Trois-Pistoles .....	30	40
Number registered in university non-credit courses:		
Trois-Pistoles (associate students) .....	6	6
Master Vocal Classes .....	<u>45</u>	<u>42</u>
TOTAL NUMBER REGISTERED IN UNIVERSITY SUBJECTS .....	*438	*433
Department of Education--Vocal and Instrumental Music..	401	360
"       "       "       --Education .....	187	252
"       "       "       --Refresher Music Course.....	75	0
Rhythm Band .....	<u>67</u>	<u>74</u>
	1168	1119
Duplicates .....	<u>62</u>	<u>99</u>
NET TOTAL SUMMER SCHOOL ATTENDANCE .....	<u>1106</u>	<u>1020</u>

\*This figure does not agree with that in the Registrar's Report, since the former does not include those students who obtain credit in Psychology 46a from the Psychology taken in the Department of Education course in Education.

The increase in the attendance is due in large part to the inauguration of the Refresher Course in Department of Education music--an excellent course of one week's duration, which proved highly successful.

The regular music courses of the Department of Education experienced a considerable increase in registration and the success of this work was very marked. There is no doubt that these courses are doing a great deal for the teaching of music in our Elementary and Secondary schools. The course in Education was largely reorganized this year and students were enthusiastic about it. I think it very probable that the decrease in registration in this course will be only temporary.

The Master Vocal Classes under the direction of Mr. Alfred Spouse, Director of Music for the schools of Rochester, N.Y., were even more than excellent--precisely what we have been desiring except that they continued for only two weeks. However, this is the maximum amount of time that Mr. Spouse can spare us. In addition to the Master Classes he gave one lecture to the entire body of music students. I am very happy to be able to report that he has agreed to come to us again next summer and give a two weeks' course.

The extracurricular program included the usual broadcast over CFPL and public concert by the Department of Education music classes, and also social and athletic activities carried on by the students.

The Summer School Camp accommodated one hundred and one persons who often voiced their appreciation of this service rendered by the University. The Camp fee of \$5.00 per person covers the entire expense involved.

During the past year 335 students registered in the Extramural Department, a number of whom later transferred to extension courses offered at convenient centres.

Last June, eleven extramural and summer school students graduated with the B.A. degree, making a total of two hundred and seventy-seven such graduates up to the present time. Since June, nine others completed the work for the degree.

I should like to express my appreciation of the excellent coöperation of the members of the Staff, which has made it possible for us to provide an effective service to our extramural students.

DIVISION OF FRENCH SUMMER SCHOOL

Directors: Professor H.E. Jenkin  
Professor M.E. Bassett

ATTENDANCE AT FRENCH SUMMER SCHOOL FROM 1934-1939

<u>YEAR</u>	<u>MEN</u>	<u>WOMEN</u>	<u>TOTAL</u>
1934	12	32	44
1935	14	30	44
1936	14	29	43
1937	16	30	46
1938	14	32	46
1939	8	30	38

For the seventh session of the French Summer School thirty-eight students enrolled of whom eight students were associates. Besides Western the following universities were represented: Alberta, Mount Allison, McGill, Queen's and Toronto. Associate students came from Bishop Strachan School, Branksome Hall, Havergal College, Loretto Abbey and Osgoode Hall, in Toronto; and also from the Connecticut College for Women, New London, Connecticut, and from the Brantford, St. Mary's and Calgary Collegiate Institutes.

It was possible to rent three separate classrooms in the Convent this year and thus to avoid the inconvenience resulting from the division of one large room by a far from soundproof partition. Smaller sections could be handled and practical work facilitated.

Mlle Rose-Anna Morin ended a five-year teaching connection with the school when she left in July to take up a position in Montreal. She was replaced by Mlle Geraldine Bilodeau of Trois-Pistoles.

At the opening session a representative of the Trois-Pistoles Chamber of Commerce presented its cheque for twenty-five dollars to James Orr, and there

were indications at the closing exercises of a desire to renew the gift. The Mayor placed the Municipal Hall at our disposal, and since it now harbours a piano the soirées of a few seasons ago were again possible. Four were given to packed houses and valuable contacts were renewed.

The radio programmes were given from CJBR, Rimouski. The first, lasting forty-five minutes, resulted in an invitation to supper at the Station's expense; the artistes for the second, of twenty minutes' duration, did not have to sing for theirs. The programmes were very widely heard on the North Shore, in the Lake St. John District, in the Gaspé Region and in New Brunswick.

The President of the University who addressed the School at its last formal meeting, also spoke at the closing exercises. Dr. Fox's revelation of his French-Canadian ancestry and connection with the Rioux family added another to the close ties already existing between the University and the Village.

Dr. Campbell, Dean of the Medical School, spent a few days at Trois-Pistoles; other visitors included Mother Francis Clare of Brescia Hall, about a dozen former students of the School, and numerous relatives and friends of the group.

Prizes were again received from the Provincial Secretary's Department through the Honorable Cyrille Delâgé. The Honorable Jacob Nicol renewed two gifts of Five Dollars for the best speeches, and these were supplemented by another from Dr. O. Leclerc of Trois-Pistoles. A number of friends in Trois-Pistoles also contributed books as prizes.

The public spirit and co-operation of the group merit a special mention. Enquiries for next year have already been received and a number of provisional reservations made.

-----

#### EXTENSION DEPARTMENT

Director: S.F. Maine, Ph.D.

#### CREDIT AND NON-CREDIT CLASSES

The greatest single activity of the Extension Department was the conducting of classes open to both credit and non-credit students in courses of study outlined in the University Announcement. The credit students were proceeding to university degrees or were seeking to fulfil the requirements of the Department of Education for permanent first class certificates. These classes were conducted in the late afternoons, on Saturdays or in the evenings, in the following centres:- Brantford, Chatham, Exeter, Ingersoll, Kitchener, London, Leamington, Petrolia, Sarnia, St. Thomas, Simcoe, Stratford, Welland, Woodstock, Wingham and Windsor. A total of forty classes was conducted in sixteen centres as compared with thirty-seven classes in fourteen centres the previous year. Approximately five hundred and ten credit students were enrolled in the above-mentioned classes, and again the examination results of the Extension Department students proved highly satisfactory. It is of interest to note that new classes were organized in Wingham and Woodstock, centres in which extension work had not previously been carried on. It was again found necessary to utilize the services of instructors from affiliated colleges--Assumption and Waterloo--and also to bring lecturers, who had previously

been on our staff, from the University of Michigan.

Professor Jenkin continued his group in Conversational French, a class in which he endeavours to proceed as far as possible along the lines used in Trois-Pistoles. The London Browning Club also sponsored two series of ten lectures each, one dealing with the drama and the other with the lives and the activities of eminent Canadians. These lectures were quite on a par with many of the credit lectures.

#### POPULAR SHORT COURSES

Groups of various kinds in different centres of Western Ontario have sponsored lecture series given by University staff members. In Sarnia the Kinsmen's Club arranged a series of monthly lectures on Canadian and American history. In Chatham both the Kiwanis and the Kinsmen's Clubs have used the facilities of the University extensively in connection with their educational program. Several lecturers have been supplied to both the Ingersoll and St. Thomas Kiwanis Clubs and the London Rotary Club. In Petrolia and Forest the lecture series carried on for some years past were continued. A series of lectures was also supplied for the Westervelt School which used University staff members as speakers at the morning assembly.

#### VOCATIONAL INTEREST GROUPS

Instruction given to the local branch of the Chartered Institute of Secretaries has become an important teaching activity of the Extension Department. Approximately one hundred lectures were given preparing students for the intermediate and final examinations of the Institute. In return the University is reimbursed to the extent of Five Hundred Dollars by the parent body in England and the local branch of the Institute.

In conjunction with a group of local personnel managers, a course of ten lectures in Personnel Administration was arranged, eight lectures being given by the Business Administration Department and two by the Psychology Department.

#### WORKERS' EDUCATION

Coöperation with the Workers' Educational Association continues to be an important activity of the Department. While this Association is financed by the Provincial and Federal Governments and the Carnegie Foundation, our University has been requested to supply tutors in London, Woodstock, Stratford and Windsor. Our Director of Extension is a member of the Executive of the Association and of the Tutorial Committee and, with other staff members, is called upon to participate in the promotional activities of the Association.

#### OCCASIONAL LECTURES

The Extension Department distributes a Bulletin which lists approximately two hundred lectures offered by various staff members. These Bulletins are widely distributed and frequent calls are made by teachers' groups, service clubs, church associations, etc., etc. for speakers. There was a considerable increase in the demand for such lectures during the current year as compared with the previous season, lecturers going as far afield as Collingwood, Owen Sound and Port Colborne.

For two years Dr. Harrison F. Lewis of the Department of Mines and Resources, Lands, Parks and Forests Branch has offered his services to the Extension Department, which has arranged for lectures by Dr. Lewis on various phases of bird life. Dr. Lewis has spoken in schools, before ornithological societies, etc. and has been available in Western Ontario for a week. This coöperation of the Extension Department seems to have been appreciated by the groups affected and by Dr. Lewis.

#### PARENT EDUCATION

The Extension Department continued its coöperation with the local Home and School Council and arranged a series of eight lectures dealing with the adolescent child. The lectures were given by Miss Leola Neal of the Psychology Department and thirty persons were enrolled from the various Home and School Clubs.

#### VOCATIONAL GUIDANCE

The most unusual and possibly one of the most important of the activities of the year was a series of vocational guidance lectures given chiefly to the middle and upper school students of sixteen collegiates, high schools and continuation schools in Western Ontario. The schools visited were Strathroy, Watford, Sarnia, Petrolia, Woodstock, Paris, Brantford, Ingersoll, Galt, Preston, St. Marys and Stratford, Aylmer, Tillsonburg, Delhi and Simcoe.

The first four schools were visited by President Fox who described the opportunities offered by certain Arts courses to the high school graduate. Dr. Fox was followed a week later by Dr. Dearle, who explained the opportunities presented by the science courses. The remaining centres were visited but once, four schools by Dean Neville, five schools by Dr. Dearle and three by Drs. Neville and Dearle together. There was a total attendance of approximately two thousand students, with a certain duplication in the first four schools mentioned as two lectures were given in each case. Probably seventeen hundred different students listened to these talks on the opportunities presented by the various courses in the University. As many of the Principals were highly appreciative of the efforts of the University to guide the students, it would seem advisable to continue this service, extending it to other schools in the fourteen counties of Western Ontario.

#### NON-CREDIT BUSINESS COURSES IN WINDSOR

Because of its importance as the most populous centre in Western Ontario and its proximity to Detroit, various innovations have been undertaken in Windsor to meet local conditions. Mr. A.H. Lavery, M.A., of the Immigration Department, who has had considerable teaching experience with the Sir George Williams College of Montreal, was engaged to organize and teach courses in Business Administration and Business Psychology. Some seventy students were enrolled and classes were given twice weekly for a six-months period in the Windsor-Walkerville Vocational School. Sufficient interest was aroused to justify an expansion of this work during the coming year.

#### STATISTICS

Approximately 1050 lectures were given by the staff members under the various headings noted above. This is an increase over the two previous years. The income of the Department will be at least one thousand dollars less than the previous year, due to the decrease in credit students arising largely from certain changes in the Department of Education regulations.

THE LIBRARY BOARD

Chairman: Reverend C.C. Waller  
Librarian: Professor Fred Landon

In its annual report the Library Board has drawn particular attention to the growth of library resources during the last five years. In that time the number of volumes has increased from 113,959 to 143,978, a growth of more than twenty-five percent. The use made of the libraries has been equally gratifying. Records of loans during the past year show that 80,049 volumes were borrowed. The ratio of volumes loaned to students enrolled remains continuously high and in the judgment of the library staff the quality of students' reading steadily improves with the growth of the library itself. The greater variety of available sources offers a challenge to students to extend the range of their inquiry beyond the more common authorities.

A feature of the year just closed was the large number of important gifts which were received. As the library board's report says: "No university has ever grown great without a worthy library and in the building up of a university library one essential is the help and personal interest of loyal and wise friends." Conspicuous among the gifts of the past year was that of the library of the late Professor W.J. Patterson, chiefly mathematical in content, which came to the University at his death. Another gift made to the library during this past year is so unique in character and value that it deserves particular mention. In the spring of 1938 Mr. John Watt, architect, of London, informed the Library Board that he planned to bring together a collection of paper currency and place it in the library. Within the year he assembled more than four hundred individual specimens and mounted them most attractively for exhibition purposes. He is continuing to add to the collection which must be one of the most extensive of its kind in Canada. The number of Canadian examples is particularly impressive.

Of special interest also was the very considerable amount of manuscript material which was received, much of it relating to the earlier history of the western counties of Ontario, the special field of interest for this University. In the work of building up the general library special attention is being given to the bringing together of those source materials which may serve as the basis of future study of the economic and social life of the Province. Provision has been made in the medical library of source material for the study of man's physical well-being. It is also essential that there should be study of the bases of man's relations with his fellows, since to advance man's physical welfare without at the same time advancing his ability to live as a sane being with his fellows would be a contradiction. The study of social sciences has a definite place in a university and just as in medical sciences requires the material which will provide the requisite background. The Library Board has expressed the opinion that there should be mapped out a program of studies of certain aspects of life, past and present, in this Province, towards which attention might be directed and investigations inaugurated. Considerable work of this kind is being done even now by members of the faculty but coördination of effort and definite planning would give additional value to the effort.

Exchange relations have been established with a number of additional libraries during the year, including Harvard University, St. Lawrence University, Mt. Holyoke College and Drew University. Harvard University has already sent the library a number of the publications of the Harvard Press, while from St. Lawrence University there was received a notable collection of the early journals of the

Universalist denomination. Extensive exchange relations are maintained with the Library of Congress at Washington which in its two most recent reports has made particular mention of the material which was sent to them. Exchanges are carried on by mailing to other libraries lists of duplicate material and receiving their lists in return. Since the exchange is on a piece for piece basis it is easily put through, there being no bargaining as to value. The Medical School Library is a member of the Medical Exchange through which it receives and also sends lists. During the past year the Medical School Library received in this way 107 complete and 370 incomplete volumes of journals, the incomplete portions received being in many cases the numbers needed to fill out volumes.

In the report presented a year ago mention was made of the opening up of an art department in which the prints and pictures of all kinds, coming from the Barnett collection and elsewhere, were being classified and made available for use. During the past year this department has demonstrated its value to the teaching departments by numerous exhibitions of material in the library and by loans for use in class rooms. In the large case at the library end of the tunnel seventeen separate exhibitions were presented during the year, among the subjects being Renaissance Art, the evolution of printing, Mexican art and handicrafts, Canadian art, early London history, the changes in styles of dress in a century, portraits of eminent mathematicians, and modern dance forms. Exhibitions of photography were provided through loans from the London Camera Club and the London Fotoforum, and the college year ended with an exhibition of paintings by Mr. Arthur Armitage, of London. In the smaller wall cases there were numerous special displays, chiefly related to the courses of instruction in English, with collections of books, prints, facsimiles of manuscripts, etc. Special material was also sent to class rooms for instructors and, what was most gratifying, the students made considerable use of the material for seminars, public speaking classes, etc. Loans were made to the newspapers and to the London Little Theatre. This department also arranged the exhibits for the Western Fair in September, 1938, and for the second annual London Book Fair held in March of this year. Both of these exhibitions attracted much attention.

To provide for the regular growth of the medical school library which has now passed the 25,000 mark, a room immediately adjoining the lower stacks was opened. In this has been placed the valuable historical section of the library which includes copies of early editions of medical classics, autographed copies, etc. The extent of the yearly accessions of bound medical journals will render necessary the addition of further shelving in about two years. When this time comes it is planned to place additional shelving on top of the present stacks, increasing the book capacity of the library.

The library of the Institute of Public Health is badly in need of larger quarters, particularly of greater space for readers. Should any changes be contemplated in the building it is strongly urged that the requirements of the library should be given careful consideration. The use which is now made of the library by the students in the public health nursing course is the best possible evidence of its value.

-----

AFFILIATED COLLEGES

Assumption College

President and Superior: Father T. A. MacDonald, M.A.

The attendance for the year 1938-39 numbered 320 registered students, a slight decrease from the previous year. The students of Holy Names College numbered about the same as in 1937-38.

The staff of 1938-39 was increased by the addition of three new members, in Philosophy, Mathematics, and the Library. The College suffered a great loss by the death of Reverend H.S. Bellisle. His place was taken by Mr. Dwyer, M.A. from the Institute of Mediaeval Studies, University of Toronto. During the past year we were assisted considerably by the staff in general of the Institute.

Illness also took its toll from our library staff. Mr. John Loughlin was absent the whole year. Mr. Jerome Hartford took his place and did much good work. Under the able direction of Reverend Edward Lee many valuable books were added to the library. We are now faced with a shortage of library space and room must be made for expansion. The College is grateful to Professor Landon for his advice on many occasions, and also to all those who made donations to the library during the past year.

Under Reverend J.S. Murphy's able direction the "Christian Culture Series" has been expanded to include outstanding lecturers from Canada, United States and Europe. This series of lectures is a very important factor in the life of our students and also in the lives of many citizens of Windsor and Detroit. The lectures were always well attended and plans are being made to continue them, on even a greater scale, during the year 1939-40.

The staff of Assumption were pleased during the past year to be able to aid the Extension Department of the University by giving a number of courses in Windsor and surrounding districts.

In the field of athletics Assumption had a fairly successful year. Intramural athletics flourished more than usual and arrangements are being made to widen this field of activity. For the first time in its history Assumption engaged a full-time football and basketball coach and the results were satisfactory.

Dramatics flourished more than in previous years and the season was brought to a close by the presentation of Journey's End. It was a very ambitious undertaking and was received with much praise.

-----  
HURON COLLEGE

Principal: Reverend C.C. Waller, M.A., D.D.

The College joined with the University in October in celebrating the 60th anniversary of the granting of the original charter and the 75th year of continuous teaching by Huron College. Actually the date of the celebrations anticipated the completion of the 75th year of teaching by Huron College by about two months, for the inauguration of Huron College took place on December 2, 1863, and teaching began on January 9, 1864.

One of our most distinguished graduates, the Reverend Arthur Carlisle, B.A., was granted an Honorary degree by the University on that occasion. He was also selected by the College as the preacher on the occasion of the Thanksgiving Service held in St. Paul's Cathedral as the opening function in connection with the joint celebration. That the preacher should have been elected Bishop of Montreal at the first ballot on the resignation of the Right Reverend J.C. Farthing, was a gratifying endorsement of his selection to be honoured by both College and University.

The actual enrolment of students in Huron College was only 16, of whom 7 were already B.A.'s. Two completed the course for the B.A. degree and of the remainder all but two are working towards that degree. In addition there were 16 Ministerial students taking advantage of our Theological options.

Our staff underwent one important change. The Reverend R.T. Appleyard, M.A., B.D. resigned to accept a pastoral charge in the United States and his place was taken by the Reverend R.R. Latimer, M.A. (McMaster) with a Theological Diploma from Wycliffe College, Toronto, a member of the Graduate School of The University of Toronto as a candidate for a higher degree. He had been studying on leave from the Diocese, and the time allowed had expired.

Mr. Latimer threw himself into the work with great zeal and efficiency, and his services were particularly helpful owing to the condition of Dr. Waller's health, which prevented his taking part in the teaching work for the last four weeks before the Christmas vacation, and involved drastic curtailment of his teaching hours in the second term.

The College maintained the residence for non-ministerial students in the University and there were 25 of these under the care of Dr. Ralph as Dean of Residence. His promotion to the headship of the Department of Classics caused him to resign his position in Huron College, where his influence and services have left a deep impression and made a real contribution to the tone of the residence.

-----  
Ursuline College

Dean: Mother M. Francis Clare, M.A.

The year 1938-39 has been marked by calendar changes of importance. In the absence of Mother St. Anne in September 1938, Mother Francis Clare took over the work of Dean. Mother Rosanna, just returned from Washington, was named Registrar and lecturer in Sociology. Mother St. Michael, another Washington graduate and a new staff member, opened courses in Economics and in Latin 20. Mother St. Edward came to the French Department.

Miss Lorna Davis, M.A., began the degree course in Home Economics. Some students who are registered at University College are already enrolled in Brescia Home Economics classes. The exchange thus begun is both interesting and important.

Miss Jean Thomas, D.P.E., has done efficient work and coached the Brescia team to be winners of the honours in the Intra-university Basketball series for women students.

A change of very great consequence to Ursuline College has been ratified by the Senate this spring. St. Peter's Seminary has now, fittingly, an independent affiliation in Arts with the University of Western Ontario. The articles of affiliation for Ursuline College and Assumption College as originally drawn up did not permit such independence of St. Peter's Seminary at an earlier date. Now, however, its excellent body of lecturers and its large registration justify the new status. The staff of Ursuline College rejoices in this recognition of the development of St. Peter's Seminary, and gratefully acknowledges a great debt to its generous professors. The staffs of the two colleges will continue to work together as in the past.

-----

Waterloo College

President: Reverend F.B. Clausen

No changes were made in either the Administration or the teaching staff. This fact affords an atmosphere of stability and confidence. No serious illness handicapped the work of professors or students.

Upon the recommendation of the Faculty the University conferred the degree of Doctor of Divinity, honoris causa, upon Reverend John Schmieder, pastor of St. Matthews Lutheran Church, Kitchener, Ontario. Dr. Schmieder has been pastor of this congregation for twenty-two years. It is the largest Lutheran church in Canada. Dr. Schmieder has also been a member of the Board of Governors of Waterloo College and Theological Seminary. He served the Board as its president for five years.

-----

MUSIC

Director of Music: Mr. Harvey Robb

The most noticeable point in the year's work was the forming of the Orpheus Society, the executive of which is made up entirely of students. This Association has, very definitely, taken its place in the minds of the students as a very purposeful movement. The executive has undertaken to head up all representative musical activities and to encourage an ever increasing membership. They have done the executive work for the Glee Club rehearsals and have engineered two rather successful programmes. They express themselves mostly in what has been named The University Nine O'clocks. On both these occasions large audiences were on hand and although a large part of those in attendance were town people we are hoping this year to encourage greater attendance on the part of the students themselves.

We have had a number of lectures given on music appreciation, which had a fair response from the students themselves and quite a consistent attendance from musically inclined people throughout the city.

The re-organization of the University Concert Series may be considered to have come under last year's programme and the fruits of this new idea will be studied in the coming season.

We feel that in one way and another, there is a show of expectancy on the part of the student body which has its root in the preaching of the gospel during the past season. The transportation problem and a very crowded programme of curricular subjects militate very strongly against any great success at the present time within the walls of the University. Added to this, the fact that we have not yet worked out any plan of giving the students credit for their musical research makes the whole problem a matter of slow growth. However we feel your personal interest a great support and there is no doubt that a growing recognition is coming about on the part of your faculty.

-----  
ACTIVITIES OF WOMEN STUDENTS

Adviser to Women: Professor Dorothy Turville, Ph.D.

The activities of undergraduate women students under the supervision of the Adviser to Women may be reported as follows:

Undergraduate Women's Organization

During the academic term 1938-39 the Undergraduate Women's Organization, with the assistance of the Students' Administrative Assembly, has improved the quarters assigned to women students in University College, thus contributing to their general welfare. The wearing of academic gowns has been encouraged in an attempt to add an external appearance of dignity to students, and to this end gowns have been purchased to be rented to individuals desiring them.

In addition to the accustomed social activities, entertainment was offered to the visiting women artists in the University Concert Series.

The undergraduate women had also participated in money-making enterprises, their efforts resulting in the sum of \$258.15. As in past years the women of the graduating class were approached with a pledge to pay \$10.00 within five years to the Women's Building Fund, the total amount pledged being \$290.00. Thus the fund is increasing slowly but steadily toward the ultimate goal of a building appropriated to the use of women students, whether it be for purely social or for residential purposes. Were it not for the valuable coöperation of the three sorority houses, the domiciliary conditions of the out-of-town women students would be deplorable. The Freshman women, however, who are in major need of guidance and supervision are perforce excluded from these residences and this situation gives rise to anxiety. Not only would the social life of the students be improved and enhanced by university residences, but the prestige of the institution would be immeasurably increased in public opinion.

Sororities

The Greek-letter groups for women are satisfactorily fulfilling their two-fold purpose of encouraging academic proficiency and housing their members in suitably-directed residences. The adoption of a uniform set of house rules controlling hours of closing is an important achievement of the Panhellenic Council of 1938-39.

The active membership in the sororities is distributed as follows:

Gamma Phi Beta	28	in residence	12
Kappa Alpha Theta	22	"	10
Pi Beta Phi	27	"	13
	<u>77</u>		<u>35</u>

Interviews

The chief relationship between the Adviser to Women and students individually is established by personal interviews, an initial one compulsory for the Freshman women, and many voluntarily sought on a wide variety of problems pertaining to student affairs and graduate vocations.

Advice regarding health matters is given by the Directress of Physical Education, who investigates carefully all cases of illness among the women students, insists on proper treatment, and reports to the Adviser to Women.

-----

DEPARTMENT OF PHYSICAL EDUCATION

Director: Professor J. Howard Crocker, M.P.E.  
Directress of Women's Activities: Mary R. Barker

Competition in fourteen different intercollegiate sports during the season of 1938-39 gave a varied programme to the students for recreation and physical development.

Our team competition can be said to have been fairly successful. Although winning only two championships, none of our teams were placed at the bottom of their schedules.

Senior Rugby football, basketball and soccer teams each won four and lost two games. In Rugby, we were in the final play-off with McGill.

For the first time our students won the Intercollegiate Championship in fencing and in swimming.

The intramural programme was greatly increased. The summary of the Physical Education Report tells the actual participation of the students.

SUMMARY - MEN - 1938-39

Total who took part in Physical Department activities, including C.O.T.C. . . . .	521 out of 583
Teams engaged in C.I.A.U. Competition --- 20	
individuals actually taking part . . . . .	176 " " 583
Teams engaged in Intramural Competition --- 44	
individuals actually taking part . . . . .	471 " " 583
Physical Training Grades allowed --- 300	
plus C.O.T.C. . . . .	477 " " 583
Number who did not participate in any Physical Training activity . . . . .	62 " " 583

Women students, while their competition was not so extensive, were more active than the men in their intramural programme and were successful in getting a large percentage of their number to participate, as can be observed by the following summary.

SUMMARY - WOMEN - 1938-39

Total who took part in Physical Education activities . . . . .	204	out of	260
Teams in Intercollegiate Competition ---	5		
individuals . . . . .	36	" "	260
Teams in Inter-House and Intramural Competition - 31			
students . . . . .	234	" "	260
Physical Training Grades Allowed . . . . .	184	" "	260
Women who did not participate in any Physical Education Activity . . . . .	56	" "	260

Medical Examinations

No difficulty was presented this year in securing medical examinations of all the students, both men and women. We were successful in making a large part of these examinations on the days of registration.

A real need for a more thorough physical examination is felt and some system should be adopted that makes an X-ray examination obligatory for students who may have some pulmonary weakness.

CANADIAN OFFICERS' TRAINING CORPS

University of Western Ontario Contingent

Officer Commanding: Lieutenant-Colonel Arthur Woods

One hundred and seventy-four officers, non-commissioned officers and cadets were enrolled in the Contingent for the past training year. The unit has reached a commendable state of efficiency and all ranks are imbued with a spirit of enthusiastic coöperation.

At an officers' meeting held on September 20, 1938, plans were formulated to promote recruiting among the Freshmen and attract back to the unit as many men from the other years as possible. Two large display boards showing snapshots of the corps at work and play during the previous year were exhibited at the Arts College and Medical School during registration week. This was supplemented by the distribution of an illustrated pamphlet outlining the various activities of the C.O.T.C. and a brief address by Lieutenant F.A.N. Chesham before the Freshman Class.

The first parade was held on October 5 and the attendance was unusually large. It was particularly gratifying to see such a large turnout of men who had been members of the corps the previous year. They were thus eligible to write for War Office certificates. A syllabus prepared by a committee headed by Major H.M. Thomas was put into effect immediately and classes commenced as soon as all recruits had been medically examined, attested and outfitted.

As in the previous year, Colonel Woods delegated to subordinate officers responsibility for the supervision of the various branches of training. Major Thomas was placed in charge of all lectures in tactics and organization for infantry classes, Captain M.L. Barr was responsible for the training of the medical company, Major T.H. Kirkpatrick supervised the infantry drill, Captain J.F. Steadman looked after small arms training and firing on the indoor ranges, and Lieutenant Chesham was in charge of map-reading classes. The Contingent band of twenty-six pieces was directed by 2nd Lieutenant D.J.A. Wright.

Practically all instruction was furnished by the officers of the Corps. One exception was a lecture to recruits by Lieutenant Hughson of the Indian Army (attached to the R.C.R.) on military customs and procedure. The other was a lecture on artillery tasks by Captain D.A. Anderson, M.C. of the 55th Battery, R.C.A. Captain Barr also arranged a series of lectures to his candidates by prominent medical men of the city, most of whom have seen overseas service.

The introduction of two new infantry weapons, the Bren light machine gun and the Boys anti-tank rifle, necessitated a series of lectures and demonstrations by Permanent Force instructors.

On Saturday afternoon, November 5, the Contingent held a route march of about eight miles west of the city along the North River Road and Oxford Street. This provided practical instruction in march discipline and the use of advanced guards.

The Honorary Colonel of the unit, Major-General J.M. Ross, inspected the contingent on November 23 and presented a number of certificates awarded to members over the past several months. It was announced at that time that through the generosity of General Ross prizes were to be awarded to the cadet in each company showing the greatest improvement in general proficiency during the next month. These prizes were later presented by the donor at the annual regimental dance.

Company rifle competitions were held on three Saturday afternoons in February and March. The number of entries was large and some excellent scores were obtained. On March 18, the five best shots from each company competed for the title of regimental best shot and a handsome cigarette box donated by Colonel Woods.

Two social events contributed to the esprit-de-corps of the unit. On Wednesday evening, October 12, after parade all ranks enjoyed a theatre party at the Capitol Theatre. The Annual Regimental Dance was held at Hotel London on Wednesday evening, December 21, with all members present in uniform. It was a highly successful affair and representatives from the C.O.T.C. Contingents of the University of Toronto and the Ontario Agricultural College were present. Early in January Captain D. Ivor and Captain J.F. Steadman represented the unit at the Annual Regimental Dance of the University of Toronto C.O.T.C.

During the summer of 1933 the following members of the Corps attended the camps and obtained the qualifications noted below:

1. Captain T.H. Kirkpatrick and Captain M.L. Barr qualified for the rank of Major at the Royal Camp School, London.
2. Sergeants B. Martin and N. Lee attended "A" Wing of the Canadian Small Arms School, Ottawa, and qualified.

3. Captain M.L. Barr, Captain W.F. Maguire, Lieutenant D. Steadman and Lieutenant L. Hemsworth attended the District Camp at Pinchill.
4. Captain D. Ivor served as Adjutant, 7th Field Brigade, Royal Canadian Artillery at Camp Petawawa.
5. During the winter and spring Major T.H. Kirkpatrick, Captain D. Ivor and Captain J.F. Steadman qualified for the theoretical portion of the Militia Staff Course. Captain Ivor was granted a "Distinguished" in Military Law and Captain Steadman obtained the same rank in Map-reading. These were the only such honors obtained in the district. All three officers expect to complete the practical portion of the course at Port Hope this summer.

The results of the November and March examinations for "A" and "B" Certificates Infantry and Medical are as follows:

		<u>Passed</u>
"A"	Infantry . . . . .	8
"B"	" . . . . .	6
"A"	Medical . . . . .	3
"B"	" . . . . .	9

-----

THE ALUMNI AND ENDOWMENT DEPARTMENT

Director: J. Mackenzie Dobson, B.A. (Arts)  
 Associate Director: J.W. Crane, M.D. (Medicine)

Once more the University's exhibit at the Western Fair in September 1938 served as a rendezvous for the Alumni. Several hundred graduates and other friends of the University visited the exhibit and signed the Alumni register.

The celebration of the University's Diamond Jubilee afforded an exceptional opportunity for holding a grand reunion of the Alumni. Such special functions as the Alumni Dinner, the Jubilee Convocation, the Western-Queen's football game, the Alumni Ball brought great numbers of graduates together from all parts of Canada.

At the Alumni Dinner there were 350 persons present. The Ball was marked by the largest attendance of graduates at a single social function in the history of the University. At the football game and the Ball former members of the University's Tenth Stationary Hospital Unit were present as guests to the number of about one hundred.

The interest of the Alumni in the proposed Field House for the University is growing rapidly. At the Alumni Jubilee Dinner James Dean, Arts '26, President of the Toronto Alumni, presented to the University a cheque for \$1000.00 to be applied to the Field House Fund. The Committee on the Alumni Ball gave the sum of \$200.00 out of the net proceeds of the week-end activities. In November the Montreal Alumni pledged themselves to raise \$3000.00 for the Field House Fund. Alumni groups everywhere in Canada enthusiastically supported the idea of adding a modern type of field house to the University's equipment.

To the generous offer of the Board of Governors to give each Alumnus a copy of Dr. Tamblyn's history of the University, "These Sixty Years", the Alumni promptly sent in over two thousand applications. The distribution of the copies

began in December. Nothing but praise for Dr. Tamblyn's book has been heard from the Alumni.

For the preparations leading to annual reunions of the Alumni held in various places the Alumni office supplied lists of graduates.

The annual dance of the Toronto Alumni took place on October 29 in the Royal York Hotel after the Western-Toronto football game. It was in every way the most successful social evening ever held by the Toronto group.

In the course of the year the Montreal Alumni held several meetings.

The Kitchener-Waterloo Alumni held their annual reunion on November 16th.

Dr. George Stevenson, Professor of Psychiatry, Faculty of Medicine, was guest speaker and representative of the University at the annual dinner and dance of the Kent County Alumni on December 1st.

The graduates living in Tillsonburg and vicinity organized an Alumni Association this year and had a dinner and dance on June 1st last.

Two issues of a new publication, "The Alumni Gazette" were published during the year, in February and June respectively. This new source of news of the University activities was warmly welcomed by the Alumni.

The Alumni Office, acting as a placement bureau, aided a number of students and graduates in obtaining both summer work and permanent positions.

The Office also made eleven loans to certain needy students. A number of previous loans were repaid in full or on account. The attitude of those who borrow from the Student's Loan Fund is very gratifying to the officers of the University.

The Alumni Secretary secured a number of payments upon overdue pledges to the Endowment Fund.

On his way across Canada to deliver the Congregation address at the University of British Columbia, President Fox met with groups of Western alumni at Winnipeg, Regina, Calgary, Vancouver and Victoria, and describes them as very enthusiastic for the future of the University. In Winnipeg, graduates tendered him a luncheon, on April 28, at the Manitoba Club, and decided to have an Alumni dinner every year in the future.

Western graduates gathered at a dinner in his honour at Regina on April 29, and in Calgary on May 1 he was the guest of Dr. and Mrs. W.H. McGuffin. In Calgary, also, Dr. Fox addressed the combined luncheon meeting of the Rotary Club and the Knights of the Round Table. Vancouver alumni entertained him at dinner on May 9, and in that city he addressed the Kiwanis Club and delivered the Convocation address at the University of British Columbia. In Victoria he met Dr. Walter Bapty, one of our distinguished alumni.

DEPARTMENT OF INDIAN ARCHAEOLOGY

Honorary Curators: Messrs A.H. and Wilfrid Jury

During the year the University Museums Board and the Honorary Curators drew up a programme of activity and have already made an impressive start in carrying it out. The programme includes the progressive classification and preparation of specimens already in the museum and a definite plan of excavation on an important site. The site chosen is that of the so-called Indian fort at Clearville, between Morpeth and Duart, Kent County. In the 1880's Dr. Boyle, the Provincial Archaeologist noted its outstanding characteristics, importance and promise. In the interval elapsed since then no systematic attempts to excavate it have been made; it has been left to the random digging of mere curio hunters. The University's Curators, Messrs A.H. and Wilfrid Jury, realizing that unless some scientific study was made of the site its worth would soon be destroyed, laid before the Museums Board a plan for a series of annual campaigns of excavation. The Board approved and through the generosity of friends of the University who supplied the funds needed for the first season's campaign were enabled to authorize the undertaking.

The digging began about the twenty-fourth of May under the direction of Mr. Wilfrid Jury and continued for six weeks. In importance the results exceeded the expectations of the planners and workers. They revealed three different occupations spread over many hundreds of years. The specimens representing all these periods were carefully classified and preserved for thorough study. From time to time the University will publish reports upon the discoveries made and the conclusions to be drawn from them.

For subscriptions, for permission to excavate on the property, for gifts of supplies and equipment, and for actual work of various kinds, the University is indebted to many people, chiefly to those whose names are appended below. During the progress of the digging the site was visited by hundreds of people from other parts of Ontario as well as from the neighboring towns of Kent, Middlesex and Lambton Counties. The great interest that was aroused in the life and civilization of the prehistoric inhabitants of Western Ontario has already resulted in the voluntary contribution of many valuable additions to the University's Museum.

Donors and Assistants

Mr. Ray Lawson, London	Colonel W.J. Thompson, Wolverhampton, England
Mrs. W.J. Hanna, Sarnia	
Mr. John Cochrane (owner of the site), Duart	Mr. Fritz Knechtel, Hanover
Miss Mary Keil, Chatham	Mr. Louis Keohler, Duart
Mr. and Mrs. Howard Pitts, Highgate	Mr. and Mrs. James Lee, Highgate
Mr. and Mrs. John Keil, Chatham	Mr. Lorne Brock, Byron
Mr. George Meyers, Muirkirk	Mr. James Webster, Muirkirk
Mr. Donald McPherson, Duart	Miss Mary Lee, Highgate
Mr. Gus McGuire, London	Dr. and Mrs. J. McPherson, Duart
Mrs. Annie O'Neil, Duart	Mrs. Dorothy Locke, Detroit, Michigan
Mr. Alexander Kerr, Muirkirk	Mr. James Edwards, Komoka

Professors Reavely, Battle and Skinner of the University Faculty served as advisers in their several scientific fields. Former Inspector Smith made a tree survey of the adjoining forest area as a guide to the species of native woods used by the Indians who occupied the site.

It is hoped that it will be possible to continue exploration in the summer of 1940.

GIFTS

Gifts made in aid of the Library and of the projects directed by the Department of Indian Archaeology will be found listed in the reports submitted by these two departments of the University's work. Gifts made by Alumni groups are recorded in the report on Alumni activities.

The President was permitted by Mrs. Hume Cronyn of London to announce at Spring Convocation that she desires to give to the University, as a memorial to her husband, the late Mr. Hume Cronyn, an astronomical observatory equipped with a telescope of moderate dimensions. The announcement was received most enthusiastically. Since many details regarding the building and its equipment remain to be determined after thorough study it is not possible at the present to state when the erection of the building will be begun.

Their Excellencies, the Governor-General of Canada and Lady Tweedsmuir, have presented their autographed portraits to the University.

The late Mrs. G.A. Routledge made two provisions in her will for the benefit of the University. Through one a large part of her library is given to the University. Through the other the sum of \$15,000 will eventually come to the University for the support of some special work in the Faculty of Medicine, the determination of which will rest with the Board of Governors.

To the London Lodge of the B'nai Brith the University is indebted for the establishment of two scholarships to be awarded annually, one in the University College of Arts, one in the Faculty of Medicine.

The Chamber of Commerce of Trois-Pistoles, Quebec, the town in which the University conducts its Summer School for French, has granted a scholarship of \$25.00 to be awarded each year to a promising student of French in the University who, unaided, would be unable to enroll in the Summer School.

Dr. W.H. McGuffin of Calgary, gave a prize of \$50.00 for the best essay submitted by a student in the Faculty of Medicine in the academic year of 1938-39 on the subject of the sympathetic nervous system.

Mr. Edward Adie, an old Toronto friend of the University, made an unsolicited contribution of \$100.00 to the Field House Fund.

Mrs. Lionel Eliot, of London, presented to the University two folio volumes containing excellent reproductions of classical manuscripts.

The Canadian Association of Cost and Industrial Engineers has given to the Library of the Department of Business Administration a subscription to "Cost and Management", the Association's official publication.

The Controllers Institute of America has given a subscription to its monthly periodical, "The Controller", to the Library of the Department of Business Administration.

To many friends in London and elsewhere the University is gratefully indebted for a number of fine specimens of mounted native fish for the museum, and for many rare native shrubs and trees to be added to the growing and well-selected arboretum that is being developed on the Arts campus.

The graduating class of 1937 in the University College of Arts presented the University with a fine painting from the brush of Clair Bice, B.A. '28.

APPOINTMENTS AND AWARDS RECENTLY OBTAINED BY ALUMNI AND FACULTY

- Barkwell, G. Earle, B.A. '39  
Appointed Assistant in the Department of Economics at Brown University.
- Buchanan, Charles, B.A. '30, M.D. '34  
Received the Diploma of the American Board of Ophthalmology.
- Carrothers, C.C., B.A. '20  
Re-elected Chairman of the Board of Education in London.
- Childs, Herbert, B.A. '37  
Appointed Assistant to Head of Department of Chemistry, Institute of Public Health, University of Western Ontario.
- Cole, Randall, B.A. '36, and Bell, J., B.A. '37  
Received re-appointments as Assistants at the University of Wisconsin.
- Creech, Hugh, B.A. '33, M.A. '35, Ph.D. '38  
Awarded a Research Fellowship for work on Carcinogenic Compounds, by the International Cancer Research Foundation at Harvard University.
- Dorland, Rodger, B.A. '35  
Was admitted in June 1939 to the degree of Doctor of Philosophy at McGill University and was appointed to a position under the National Research Council of Canada for 1939-40.
- Elson, Paul, B.A. '34, M.A. '36  
Awarded the degree of Doctor of Philosophy in the Department of Biology, University of Toronto, June 9, 1939.
- Farrow, Norman, B.A. '37, M.A. '38  
Received a renewal of his fellowship in singing at the Juilliard School of Music, New York City.
- Ferguson, Arthur B., B.A. '35  
Appointed to the staff of Duke University.
- Ferguson, Malcolm, B.A. '32, M.A. '34, Ph.D. (Illinois)  
Appointed to the Department of Animal and Plant Pathology at Princeton, New Jersey, in the Rockefeller Institute for Medical Research.
- Ferguson, Wallace K., B.A. '24, Ph.D (Cornell) and Professor of History, New York University  
Awarded a Guggenheim Fellowship for study abroad.
- Fleming, T.A., B.A. '30  
Promoted to Head of the Department of Chemistry at the Institute of Public Health, University of Western Ontario.
- Ford, Robert, B.A. '38  
Awarded two scholarships for graduate work in history at either the University of Toronto or Cornell University. He chose the latter and has recently been appointed Assistant in History at Cornell.
- Fox, E.J., B.A. '35  
Re-appointed to the staff of the University of California.

Gordon, Roderick, John, M.D. '09  
Granted the degree of F.A.C.P.

Higgins, Benjamin H., B.A. '33  
Re-appointed Assistant at Harvard University for 1939-40.

Hoare, W.S., M.A. '36  
Appointed Assistant Professor in Zoology at the University of New Brunswick.

Ivor, David, B.A. '33, M.A. '39  
Awarded the British Council Scholarship for Post-Graduate Students from Canada for a year's study in Great Britain.

Johns, Percy, M.D. '26  
Appointed to the staff of the Department of Health of the Province of Ontario for scientific investigation during the next year or two. He will be in charge of a laboratory in Kingston.

Johnston, Robert A., M.D. '19  
Granted the degree of F.R.C.S. (Canadian).

Jones, W.A., M.D. '14, Professor of Radiology, Queen's University, Kingston  
Appointed President of the Ontario Medical Association.

Kingston, Maurice, B.A. '35  
Awarded the degree of Ph.D. on June 9 at the University of Toronto and appointed to the staff of the University of British Columbia.

Latimer, Kenneth, B.A. '35, M.Sc. '38 (Michigan)  
Awarded a fellowship with the Upjohn Company, Kalamazoo, Michigan.

Little, A.J., B.A. '35, Davis, L.W., B.A. '30, Denholm, E.M., B.A. '34, passed the final examinations of the Institute of Chartered Accountants. The last named was awarded the prize for the highest standing in Auditing.

Lucas, A.B., B.A. '29  
Appointed Assistant Public School Inspector for London.

McArthur, Charles, B.A. '35  
Appointed to the Banting Institute, University of Toronto.

McDougall, John, B.A. '37  
Passed the Intermediate Examination in the Institute of Chartered Accountants.

McWha, Albert, B.A. '38  
Awarded a War Memorial Graduate Fellowship in the University of Toronto.

Macklin, Dr. Madge, of the Faculty of Medicine, University of Western Ontario  
Received the honorary degree of Doctor of Laws from her Alma Mater, Goucher College, Baltimore, at the ceremonies held in October 1938 to celebrate the fiftieth anniversary of the founding of the College.

Mark, Carson, B.A. '35  
Awarded the degree of Ph.D. on June 9 at the University of Toronto and appointed to the staff of the University of Manitoba.

Middaugh, John, B.A. '38  
Awarded a Fellowship in the Graduate School, Western Reserve University, Cleveland, Ohio.

- Moore, Robert, B.A. '38  
Awarded a Research Fellowship in Organic Chemistry at the California Institute of Technology.
- Morrow, E.H., sometime head of the Department of Business Administration of the University of Western Ontario  
Appointed Head of the newly established department in the same field in the University of British Columbia.
- Neville, Dean K.P.R.  
Re-elected Secretary-Treasurer of the Canadian Universities Conference.
- Ponsford, Pete, B.A. '37, and Harrison, Jack, B.A. '37, graduated from Osgoode Hall in the spring of 1939. The former was awarded Highest Honors.
- Raymond, Ernest, B.A. '35  
Appointed for one year as Lecturer in Classics at the University of Alberta.
- Seaborn, Edwin, M.D. '95  
Granted the degree of LL.D. (University of Western Ontario), October 1938.
- Smith, Goldwin, B.A. '33  
Appointed Professor in History at the University of Iowa.
- Sowden, John C., B.A. '32, M.A. '33, Ph.D. '36 (Northwestern)  
Awarded National (U.S.A.) Research Fellowship at Ohio State University for 1938-39.
- Stevenson, George H., Professor of Psychiatry and Superintendent of the Ontario Hospital, London.  
Elected President of the American Psychiatric Association at the meeting of the Association held in Chicago.
- Stuart, Keith, M.D. '35  
Awarded a scholarship in Internal Medicine with the Lahev Clinic at Boston.
- Talman, James, B.A. '25, M.A. '27, for several years Archivist of Ontario and Provincial Librarian  
Appointed Assistant Librarian in the University.
- Wade, Donald, B.A. '39  
Awarded a \$500.00 Fellowship graduate study at the University of Toronto in Philosophy and Psychology.
- Watson, Professor Earle, of the Department of Physiological Chemistry, Faculty of Medicine  
Awarded a grant in aid of research in his department.
- Williams, Leverne, B.A. '39  
Awarded a Research Fellowship in Pathological Chemistry at the University of Western Ontario.
- Wilson, Wesley, M.D. '38, of the Provincial Department of Health  
Appointed Chief Pathologist in the Faculty and Institute of Public Health during the absence of Dr. Percy Johns, former Chief of Pathology.
- Wright, Mary, B.A. '39  
Appointed Class Assistant in Psychology in the University of Toronto.

UNIVERSITY REPRESENTATIVES

On October 29, 1938, Dean K.P.R. Neville represented the University at the Inauguration of President Cowley, Hamilton College, Clinton, New York.

Professor E.E. Reilly represented the University at the meetings of the Agricultural Conference of the Canadian Chamber of Commerce which were held in Toronto on November 9, 1938.

Professor J.W. Russell, Head of the Department of Geology, represented the University at the funeral of the late A.P. Coleman (LL.D. Western '22), former Professor of Geology in the University of Toronto.

Professor W.F. Tamblin, as official delegate of the University, attended the Consecration of Bishop Carlisle of Montreal (B.A. '06; D.D. '21; LL.D. '38) which took place in Christ Church Cathedral, Montreal, on April 25 last.

In April Mrs. Margaret Holmes (Peggy Gemmel, B.A. '21) of Chapel Hill, North Carolina, represented the University at the ceremonies marking the hundredth anniversary of Duke University (formerly Trinity College), Durham, North Carolina.

In the course of the academic year President Fox attended two convocations of other Canadian universities: the special Autumn Convocation of the University of Toronto held on October 14th, and the annual Congregation of the University of British Columbia in Vancouver. At the ceremony in Toronto he was admitted to the honorary degree of Doctor of Laws, a courteous and generous recognition of Western's attainment of her sixtieth anniversary. At the University of British Columbia he was guest speaker of Congregation.

-----

SCIENTIFIC MEETINGS ATTENDED BY MEMBERS OF THE STAFF

- Allison, Helen M.  
American Association of Collegiate Registrars, Annual Meeting, New York City,  
April 24 to 28, 1939.
- Battle, Helen I.  
Society of Biologists, Kingston, Queen's University, May 5 and 6, 1939.
- Barr, Murray L.  
American Association of Anatomists, Harvard Medical School, Boston, Mass.,  
April 6 to 8, 1939.
- Bittner, C.J.  
American Sociological Society, Detroit, Michigan, December 28, 29, 1938.
- Burns, J.W.  
American Chemical Society, Milwaukee, Wisconsin, September 5 to 9, 1938.  
Canadian Chemical Association, London, June 5 to 8, 1939.  
Chairman of the Education Section of local meetings of the Western Ontario  
Chemical Association.
- Campbell, F.J.H.  
Association of American Medical Colleges, Syracuse, N.Y., October 24 to 26,  
1938.  
Canadian Medical Association, Montreal, P.Q., June 19 to 22, 1939.

Detwiler, J.D.

Seventy-Fifth Annual Meeting of the Entomological Society of Ontario,  
Guelph, November 24 to 26, 1938.

American Association for the Advancement of Science, Richmond, Virginia,  
December 27 to 31, 1938.

Fourth North American Wild Life Conference, Detroit, Michigan, February 13  
to 15, 1939.

Conservation of Education, Hydrologic Research Station, Coshocton, Ohio,  
November, 1939.

Dorland, A.G.

Royal Society of Canada, Montreal, June 19 to 22, 1939.

Conference on Canadian-American Relations, St. Lawrence University, Canton,  
N.Y., June 19 to 22, 1939

Ferguson, Duncan D.

Interstate Postgraduate Medical Association Meeting, Philadelphia, Penna.,  
October 31 to November 4, 1938.

Meetings of the London Academy of Medicine.

Ferguson, Duncan J.

Ontario Dental Convention, June 5 to 7, 1939.

Meetings of London Dental Society and London Academy of Medicine.

Fisher, John H.

Ontario Association of Pathologists, Toronto, December 1938.

Canadian Public Health Association, Toronto, December 1938.

American Association of Pathologists and Bacteriologists, Richmond, Virginia,  
April 5, 1939

American Association for Cancer Research, Richmond, Virginia, April 6, 1939.

International Association of Medical Museums, Richmond Virginia, April 7, 1939.

Ontario Association of Pathologists, Hamilton, Ontario, June 1, 1939.

Ontario Medical Association, Hamilton, Ontario, June 1, 1939.

Official opening of new Memorial Hospital, New York, June 14, 1939.

Foster, Willena A.

American Physical Society, Washington, D.C., December 27 to 29, 1938.

American Physics Teachers' Association, Washington, D.C., December 28 to 31, 1938.

Optical Society of America, Niagara Falls, N.Y., October 27 to 29, 1938.

Fox, W. Sherwood

Progressive Education Association of Michigan and Western Ontario Meetings,  
Windsor, November, 1938.

Addressed a session of the Ontario Music Teachers' Association at its annual  
meeting in Hamilton, February, 1939.

Geddes, J.H.

Ontario Medical Association, Hamilton, May 31, 1939.

Canadian Medical Association, Montreal, June 22, 1939.

Grace, A.J.

Annual Meeting of Canadian Tuberculosis Association, London, Ontario  
June 10 to 11, 1938.

Ontario Medical Association Annual District Meetings:

District I. -- Chatham, Ontario, October 12, 1938

District II. -- Woodstock, Ontario September 28, 1938

District V. -- Oshawa, Ontario, September 21, 1938.

Ontario Medical Association Annual Meeting, Hamilton, May, 1939.

Canadian Medical Association Annual Meeting, Montreal, June, 1939.  
Meetings of London Academy of Medicine, London, Ontario

Hitchcock, Harold B.

American Association for the Advancement of Science, Richmond, Virginia,  
December, 1938.

Ontario Field Naturalists, Toronto, January, 1939.

Hobbs, George, E.

Ontario Neuropsychiatric Association, Ontario Hospital, Toronto, March 24,  
1939.

Academy of Medicine, Lecture in Psychiatry, Toronto, May 5, 1939.

Ontario Neuropsychiatric Association, Toronto Psychiatric Hospital, Toronto,  
May 5, 1939.

American Psychiatric Association Annual Meeting, Chicago, May 8 to 12, 1939.

Inman, M.K.

Conference on "Cooperation", Guelph, Ontario, September 20 to 22, 1938.

Annual Meeting of the American Economic Association, Detroit, Michigan,  
December 28 to 30, 1938.

Johnston, R.A.

Sectional meeting of American College of Surgeons, Toronto, Ontario,  
1938.

Royal College of Surgeons Annual Meeting, Ottawa, October, 1938.

Canadian Medical Association Meeting, Montreal, October, 1938.

Toronto Academy of Medicine, November, 1938.

Joint Meeting of the Noon-Day Study Club, London and Detroit, Detroit, Mich.,  
April, 1939.

Montreal Medicochirurgical Society, Montreal, June, 1939.

Kennedy, F.S.

Ontario Medical Association Meeting, Hamilton, May, 1939.

Canadian Medical Association Meeting, Montreal, June, 1939.

Landon, Fred

American Historical Association, Chicago, Illinois, December, 1938.

Conference on Archives in Toronto, March, 1939.

Canadian Historical Association, Montreal, May, 1939.

Royal Society of Canada, Montreal, May, 1939.

Ontario Historical Society, London, June, 1939.

Liddy, R.B.

American Psychological Association Meetings, Columbus, Ohio, September 3 to  
7, 1938.

Canadian Psychological Association Meetings, Toronto, Ontario, April 12,  
1939.

Ontario Educational Association Meetings, Toronto, Ontario, April 11, 1939.

Little, H.S.

Canadian Society for the Study of Diseases of Children, Alexandria Bay,  
N.Y., June 17 to 18, 1939.

Canadian Medical Association, Montreal, June 20 to 22, 1939.

Macallum, A.B.

Royal Society of Canada, Montreal, May 22 to 24, 1939.

Federation of American Societies for Experimental Biology, Toronto, Ontario  
April 26 to 29, 1939.

Canadian Chemical Convention, London, Ontario, June 6 to 8, 1939.

McAlpine, K.L.

Canadian Society for the Study of the Diseases of Children, Alexandria Bay,  
N.Y., June 16 to 17, 1939.

MacDonald, S.A.

American Urological Annual Meeting, White Sulphur Springs, West Virginia,  
May 29 to June 1, 1939.

Western New York and Ontario Urological Meeting

Canadian Medical Association Meeting, Montreal, P.Q., June, 1939.

Ontario Medical Association Meeting, Hamilton, Ontario, May, 1939.

Oxford County Medical Association Meeting

Elgin County Medical Association Meeting

London Academy of Medicine Meetings, London, Ontario.

McKee, Gordon

Engineering Institute of Canada, London, Ontario, monthly meetings.

Canadian Chemical Association, London, Ontario, June 5 to 7, 1939.

Macklin, Charles C.

American Association for the Advancement of Science, summer meeting, Ottawa,  
Canada, June 27 to July 2, 1938.

American Association for the Advancement of Science, winter meeting, Richmond,  
Virginia, December 28 to 30, 1938.

American Association of Anatomists, Boston, Massachusetts, April 6 to 8,  
1939.

Canadian Society of Laboratory Technologists, London, Ontario, May 20th,  
1939.

Miller, Frederick, R.

American Physiological Society, Toronto, Ontario, April 26 to 29, 1939.

Neal, Leola

Canadian Psychological Association Meetings, Toronto, Ontario, April 12, 1939.

Neville, K.P.R.

American Association of College Registrars, New York, N.Y., April 25 to 28,  
1939.

National Conference of Canadian Universities, Montreal, P.Q., May 29 to 30,  
1939.

Ramsay, George A.

Orthopaedic Congress, Memphis, Tennessee,

Ontario Medical Association, Hemilton, Ontario, May, 1939.

Canadian Medical Association, Montreal, P.Q., June, 1939.

Post Graduate Lectures,

Royal Canadian College of Physicians and Surgeons, Ottawa, Ontario

Robson, D.O.

Classical Association of the Middle West and South, Oberlin College, Oberlin,  
Ohio, April 6 to 8, 1939.

Sivertz, C.

Canadian Chemical Association, London, Ontario, June 5 to 7, 1939.

Slack, A.J.

Canadian Public Health Association, Laboratory Section, Mid-year Meeting, Toronto, Ontario, December 19 to 21, 1938.

Canadian Public Health Association and Ontario Health Officers' Association, Annual Meeting, Toronto, Ontario, June 12 to 14, 1939.

Stevenson, George H.

American Association for the Advancement of Science, Richmond, Virginia, December 27 to 30, 1938.

American Psychiatric Association, Chicago, Illinois, May 8 to 12, 1939.

Ontario Medical Association, Hamilton, Ontario, June 2, 1939.

Ontario Lemopsychiatric Association, Whitby, Ontario, June 16, 1939.

Tew, W. Pelton

Muskoka District Medical Society, Bracebridge, Ontario, September 23, 1938.

Highland Park General Hospital Annual Banquet, Detroit, Michigan, December 14, 1938.

Lincoln County Medical Society, St. Catherines General Hospital, St. Catherines, Ontario, January 19, 1939.

Genesee County Medical Society, Flint, Michigan, February 8, 1939.

Canadian Medical Association, Montreal, P.Q., June 21, 1939.

Walker, A.R.

The Society of Biologists, Kingston, Ontario, May 5 to 6, 1939.

Watson, E.M.

Federation of American Societies for Experimental Biology, Toronto, Ontario, April 26 to 29, 1939.

Waud, Russell A.

American Society for Pharmacology and Experimental Therapeutics, Toronto, Ontario, April 26 to 29, 1939.

American Physiological Society, Toronto, Ontario, April 26 to 29, 1939.

Wharton, G.K.

Ontario Medical Association Meeting, Hamilton, Ontario, June 2, 1939.

Wilcox, L.D.

Post-graduate course on Endocrinology at University of Toronto, Toronto, Ontario, September 19 to 21, 1938.

Meetings of the Association of American Medical Colleges, Syracuse, N.Y., October 24 to 26, 1938.

Fiftieth Anniversary Sessions at The Johns Hopkins Hospital, Baltimore, Maryland, May 5, 1939.

Ontario Medical Association Meetings, Hamilton, June 2, 1939.

Rounds and Conferences, New York Hospital, Cornell, June 10 to 13, 1939.

Canadian Medical Association Meetings, Montreal, June 22, 1939.

District meetings of the Ontario Medical Association during the year in Sarria, Chatham, Woodstock.

Regular meetings of the Academy, Noon-day Study Club, Victoria and St. Joseph's Staffs.

Wilson, D.J.

Council Meeting of the Progressive Educational Association, Grand Rapids, Michigan, May 3, 1939.

Canadian Psychological Association Meetings, Toronto, Ontario, April 12, 1939.

Effects of eserine, acetylcholine and atropine on the electroencephalogram  
(with F.R. Miller and G.W. Stavrakys). The Canadian Medical Association  
Journal, 38, 1938, pp. 294.

-----  
CHANGES IN STAFF

The following appointments were made:

Babb, Frank Shaleen, B.A., M.D.	Instructor in Anatomy
Collyer, Gerald Robert, B.A., M.D.	Instructor in Medicine
Duncan, Dr. A.S., M.L.A.	Appointed to the Faculty Committee of the Board of Governors
Hitchcock, H.B., A.B., A.N., Ph.D.	Instructor in Biology
Huff, Ralph H., M.D. (McGill)	Instructor in Pathology in Bacteriology
Large, George Eugene, M.D.C.M. (Queen's)	Instructor in Pathological Chemistry
Lewis, John Albert, M.D.	Instructor in Medicine
Reynolds, A. Keith, B.A., M.Sc.	Instructor in Biochemistry
Roome, H.W. M.D.	Instructor in Surgery
Williams, Harry Leverne, B.A.	Research Assistant in Pathological Chemistry
Willis, Ross, B.A., M.A.	Assistant Professor in the Department of Business Administration

The following resigned:

Adams, Gordon Albert, B.A. (Queen's), M.Sc. (Western), Ph.D. (Chicago)	Instructor in Biochemistry
Dowker, Hugh, B.A., Ph.D.	Instructor in Mathematics
Gillanders, Justice J.G.	Member of the Faculty Committee of the Board of Governors

Hensel, P.H., M.B.A.

Head of the Department of Business Administration

McArthur, Charles S., B.A.

Research Assistant in Pathological Chemistry

The following were promoted:

Burns, J.W., M.Sc.

From Associate Professor to Professor of Organic Chemistry

Collin, W.E., L. ès L.

From Assistant to Associate Professor of Romance Languages.

Johnston, R.A., M.D., F.A.C.A., F.R.C.S. (C)

From Senior Instructor to Assistant Professor of Surgery

Magee, G.R., Ph.D.

From Assistant to Associate Professor of Mathematics

Montgomery, Frances, Ph.D.

From Instructor to Assistant Professor of Romance Languages.

Ramsay, G.A., M.D., F.A.C.S., F.R.C.S. (C)

From Associate Professor of Surgery to Professor of Orthopaedic Surgery.

Thompson, Walter, M.B.A.

From Professor to Acting Head of the Department of Business Administration.

Watson, K., M.A.

From Demonstrator to Instructor in Chemistry

Woods, A., M.A.

From Associate Professor to Professor of Mathematics.
